

## Introduction

ABALIMI is a Non-Governmental Organisation (NGO) working to empower the disadvantaged through urban agriculture and environmental programmes and projects. Harvest of Hope is a project of Abalimi. Harvest of Hope was launched at the beginning of 2008. The aim was to sell vegetables in a very direct, friendly and personal way so that farmers would benefit from a secure and fair income while customers would benefit from reasonably priced and locally produced (low carbon footprint!) organic vegetables. Situated in Philippi, Cape Town, the Pack Shed of Harvest of Hopes is looking towards investing in a more efficient and hygienic Packing Area. The University Of Cape Town Architecture Department has been sought after to work on the design.
