Guide to the usage of this Handbook

The following is a general overview of the structure of this Handbook for the guidance of users. The contents are organised in a number of different sections (see below) each of which has a particular focus. The sections are interlinked by cross-references where relevant.

- (a) *General Information:* This section includes information on the professional status and recognition of the Faculty's degrees, its links with professional bodies and the list of qualifications offered. It also includes lists of the various prizes, medals and scholarships awarded on academic merit and contains information on the criteria for the Dean's Merit List.
- (b) *Rules for degrees:* This section covers the Faculty rules for each of the various degree programmes. These rules should be read in conjunction with the general University rules in the General Rules and Policies Handbook (Handbook 3). Students are expected to acquaint themselves with the rules in both Handbooks and to check annually whether the rules or curriculum requirements have changed since the last edition. *Important rules:* All students must familiarise themselves with the Degree Rules in this Handbook. In addition, students must refer to Handbook 3, General Rules and Policies and particularly take note of the following:
- rules relating to registration and examinations;
 - rules relating to changes of curriculum;
 - rules relating to leave of absence;
 - rules on Academic Conduct, N.B. the rules concerning dishonest conduct and plagiarism.

Detailed information on the undergraduate entrance requirements can be found in the University Prospectus. The PhD Degree rules are published in *Handbook 3, General Rules and Policies*.

- (c) *Departments and Programmes:* This section contains entries for each department in the Faculty. Each lists members of staff, a summary of laboratory, workshop and other facilities, the research entities, and the programmes of study administered by each department. The curriculum for each programme (list of required courses) is set out in table form. The curriculum tables must be read together with (cross-referenced to) the lists of courses in the Courses Offered section which is described under (e) below.
- (d) *Centres/Units established in the Faculty and Centres, Departments, Schools and Units Established in other Faculties:* There are entries for the principal Faculty entities/units which do not fall directly under academic departments e.g. the Centre for Research in Engineering Education and the Continuing Professional Development Programme and entries for the centres, units and departments in other faculties which offer courses for students registered in the Faculty. This is cross referenced to the list of courses offered in section (e).
- (e) *Courses Offered:* The full list and descriptions of courses offered by the Faculty, both undergraduate and postgraduate, is set out in this section in alpha-numeric order (i.e. based on the course code prefix) which identifies the department offering the course and the course number. The courses offered by other faculties which are more commonly taken by students in the Faculty of Engineering & the Built Environment are also listed and described. N.B. A key (guide) to the course code system, the credit system and terminology (definitions) is set out at the beginning of this section.

Structure of Course Codes

The code structure is uniform and it gives important information about the course. Each code has eight characters, as follows: AAA1nnnS, where

AAA	is a 3 alpha-character group identifying the department
1	is a number representing the year of study in which the course is usually taken
nnn	is a 3 character number that identifies the course uniquely
S	is a single alpha-character suffix, giving information about the duration and semester placement of the course

Suffixes which are most frequently used in the Faculty are:

F	First semester course
S	Second semester course
W	Whole-year course
H	Half-course taught throughout the year
Z	Non-standard period

Summer/Winter Term courses:

P	November - December
U	November - January
L	June -July

The following examples show how the codes work:

ELL1013F	English Literary Studies
ELL	designates an English course
1	designates a first year course
013	serves to distinguish this course from other first year English courses
F	designates a first semester course

HST2047S Gender and History

HST	designates a History course
2	designates a second year course
047	serves to distinguish this course from other second year History courses
S	designates a second semester course

12 GENERAL INFORMATION

Abbreviations and Definitions

Concession: Formal Senate approval exempting a student from complying with a required rule.

Co-requisite: A subject or course for which a student must be registered concurrently with (at the same time as) another course.

Pre-requisite: A subject or course that a student must have completed in order to gain admission to another (usually a more senior) course.

Curriculum: Prescribed course of study for a degree or diploma.

DP (Due Performance) requirement: Required minimum level of performance during the semester or year to qualify a student to do an examination in a particular course or module.

Exemption: Exemption from a course means that the student need not register for this course since he/she has studied a sufficiently similar course before. He/she is granted credit for the course studied before.

Continuous assessment: Evaluation of a student's performance (by means of written, oral or practical work) during the year, before the final examination in a particular course.

NQF credits, HEQSF qualification levels and HEQSF course levels:

All South African tertiary institutions are required to align their qualifications with the prescriptions of the national Higher Education Qualifications Sub-Framework. Each qualification has an exit level and is required to have a minimum number of HEQSF credits at that level. One credit equals 10 notional hours of learning.

The HEQSF requires the following credits per qualification:

- Postgraduate Diploma (exit level 8): Minimum total credits: 120, minimum credits at level 8: 120.
- Bachelor Honours degree (exit level 8): Minimum total credits: 120, all at level 8.
- Master's degree (exit level 9): Minimum total credits: 180. Minimum credits at level 9: 120; maximum credits at level 8: 60. (A full dissertation master's will be 180 credits at level 9).
- Doctoral degree (exit level 10): Minimum total credits: 360 at level 10.

Programme, qualification and specialisation: A programme is a purposeful and structured set of learning experiences that leads to a qualification. Within a qualification (e.g. Master of Social Science) there may be various specialisations (for example a Sociology or Justice and Transformation specialisation in the MSocSc). In some cases there is a single programme within a qualification.

Specialisations: Within a postgraduate programme there may be several "specialisations," each of which has its own plan code.

Named qualification vs. specialisations in a "generic" qualification: Special application must be made to the Higher Education Qualifications Council to use the full name of a programme, e.g. Master of Arts in Clinical Psychology as opposed to Master of Arts with a specialisation in Creative Writing.

Programme/course convener: Academic staff member in charge of offering the degree or diploma programme or a course within the degree or diploma programme.

Psychology

To become a Psychologist in one of the recognised areas of Psychology, namely Neuropsychology, Clinical, Counselling, Educational, Organisational and Research Psychology, a student must complete a recognised Master's degree in Psychology and an appropriate practicum at a recognised training institution. The duration of a practicum is 12 months. Persons registered from 1 January 2005 in addition will have to write an examination set by the Professional Board for Psychology.

The Department of Psychology at the University of Cape Town provides training leading towards registration in Clinical Psychology and registration in Neuropsychology. The School of Management Studies in the Faculty of Commerce provides training leading towards registration in the fields of Organisational Psychology.

Social Work

Practice in the field of Social Work is regulated by the Council for Social Service Professions, with which all Social Workers must register. The Council lays down the minimum standards of both academic and practical training requisite for professional registration, and the Department of Social Development provides training in terms of these standards.

Under current legislation, the minimum requirement for professional registration with the Council is a 4-year BSW degree. Students registered for the BSW degree are required to register as student social workers from the second year of study.

The South African Council for Social Service Professions will accept the UCT 3-year BSocSc(SW) degree plus an Honours degree offered by the Department of Social Development as equivalent to the BSocSc(SW) 4-year degree for registration as a Social Worker.

NOTE: Those students who registered prior to 1988 and completed the BSocSc (B curriculum) degree must be in possession of the BSocSc(SW) Honours degree or the Advanced Diploma in Social Work to qualify for professional registration with the Council for Social Service Professions.

- (a) a graduate of the Faculty who has been awarded a Bachelor's degree with the equivalent of a major in the subject in which

- he/she proposes to proceed to Honours, or has subsequently met the conditions which would have enabled him/her to be awarded the degree with that subject as a major subject, and has satisfied such other conditions as departmental rules may require; or
- (b) a graduate of any other faculty in the University who has completed courses accepted by the Senate as equivalent to those required under 3.1(a) above; or
 - (c) a graduate of any other university recognised by the Senate for such purpose who has completed courses accepted by the Senate as equivalent to those required under 3.1(a).
- 3.2 A person must comply with any additional admission requirements prescribed for the programme for which he or she wishes to be admitted as a candidate.

Registration date

FH4 Except where another date is set, a candidate for the Honours degree shall register not later than the Friday of the week preceding the start of the academic year.

Registration and readmission requirements

- FH5
- 5.1 *Full-time study*
Except by permission of Senate, a full-time candidate shall attend and complete the work prescribed for the degree within one year of full-time study.
 - 5.2 *Part-time study*
 - (a) A two-year programme may be offered for *bona fide* part-time students by any department in the Faculty which offers an Honours course, at the discretion of the Head of the Department concerned. Applications from students for the two-year programme shall be submitted, together with evidence that the applicant is a *bona fide* part-time student, by the Head of the Department concerned to the Board of the Faculty for approval.
 - (b) A part-time candidate shall attend and complete the prescribed work for the degree within two years of part-time study.
 - 5.3 *Readmission requirements*
Except with the permission of Senate, students registered for a programme of study towards an Honours degree shall be excluded from the Faculty if they have not passed at least half of the credits required for the programme.

Extended Honours programme

FH6 In exceptional circumstances, the Senate may permit a graduate it deems worthy on academic grounds but who does not have an adequate undergraduate background, to undertake a full-time Honours programme over two years. In such a case, the candidate must complete in the first year courses prescribed by the Senate, chosen to strengthen his/her background, and may undertake a portion of the Honours programme, provided that this portion does not exceed 30% of the full programme. In cases where prior approval is not appropriate, the research proposal should be subjected to appropriate deliberative procedures, according to faculty-specific guidelines. Research papers or dissertations that involve human participants or animal use may not be submitted for examination if they have not undergone any ethics review process.*
- 8.2 A candidate is required to pass each component of the Honours programme.

The Master of Fine Art is intended for those wishing to undertake advanced study in any studio work discipline or an interdisciplinary course of study approved by the School. Examination is by way of an exhibition (or an equivalent approved by the School) and appropriate documentation.

This programme develops the ability to conduct independent research in an area of choice, with a methodology appropriate to the project. Students refine their proposal in consultation with supervisors during the first semester of study and expand this into a professional exhibition that demonstrates a sound understanding of a range of historical, theoretical and philosophical approaches to art. Theory and practice is seen as integral and the practical submission is accompanied by a 5 000 – 10 000-word explication, the form of which is dictated by the nature of the research project. The programme includes a weekly reading group in the first year, regular seminars, annual progress reviews and a fieldtrip to a major contemporary exhibition.

Admission requirements:

- (a) Faculty rule FM3 applies.
- (b) Programme requirements:
 - An upper second-class pass in Fine Art IV.
 - An upper second-class pass in an approved 3000-level Humanities course or an overall upper second class-pass in Theory and Practice of Art.
 - A portfolio of recent work and a clear description of the proposed field of study.
 - In exceptional circumstances, the attainment of a level of academic or professional competence which in the opinion of Senate, on the recommendation of the Board of the Faculty of Humanities, is adequate for the purpose of undertaking both the creative and theoretical aspects of the course, may qualify a candidate for admission.
- (c) The deadline for receipt of these application materials is 31 October each year. Late applications may be considered at the discretion of the Director of the School.

Acceptance is on the recommendation of the Head of Department and is based on the assessment of the research proposal and portfolio of creative work and the availability of a suitable supervisor and studio space.

International Relations [POL03]

Programme Convener:

Associate Professor J Akokpari

Application and Admission requirements:

General application information - External candidates and UCT students must apply formally via Admissions. Candidates for the coursework degrees are required to submit a letter of motivation and sample of academic writing as part of their formal application. Candidates for the research degrees (by dissertation only) are encouraged to request a preliminary assessment with the department before submitting a formal application. The questionnaire is available on the Political Studies website.

Department admission criteria – Honours and Coursework Master’s:

Refer to faculty rules FH3 and FM3 for minimum admission criteria.

Admission to the Department's specialisations is selective and highly competitive. The Department admits only those candidates that it judges are likely to complete the degree programme successfully.

Criteria taken into consideration for admission include:

- Previous academic performance in undergraduate and postgraduate degrees;
- Suitability, viability and acceptance of research proposal for Master’s degree;
- Adequate and available supervisory capacity in the department for Master’s degrees;
- Proportionate representation of candidates from designated groups will be considered.

Additional admission criteria for applicants from UCT:

- A 65% minimum average for the overall undergraduate degree and consideration given to academic performance in Politics courses;
- A 65% minimum average in all undergrad 3rd years courses, with special consideration given to academic performance in 3rd year Politics courses;
- An overall upward trend in course grades;
- Proportionate representation of candidates from designated groups will be considered.

Additional admission criteria for non-UCT applicants:

The same criteria generally apply as for UCT applicants above. The requested supporting documentation (questionnaire, writing samples) must be supplied and is a determining factor in the assessment.

Specialisation objectives:

International Relations at the University of Cape Town tries to strike a balance between International Relations as a field of study that evolved over centuries and International Relations as it is currently studied. International Relations as traditionally studied usually meant a focus on three concerns: war, diplomacy and trade. Now described respectively as conflict or security, diplomacy and negotiation and the international political economy, these remain the central subjects we want to study. Our approach also values, however, the contributions of other sub-fields of Political Studies, especially Comparative Politics, and contributions from other disciplines. In International Relations scholarly debates, African cases and issues are crucial and, for this reason, graduates of our specialisation are often called upon to show their expertise in African and/or Southern African material.

Additional admission requirements:

Specific additional entry requirements for this specialisation are a past academic history in International Relations, Political Studies/Science or a strong academic background in a related discipline.

The same criteria generally apply as for UCT applicants above. The requested supporting documentation (questionnaire, writing samples) must be supplied and is a determining factor in the assessment.

Specialisation objectives:

The honours/master’s specialisation has been designed to locate current concerns and topical interests in justice and transformation in the more general perspectives of normative theory and comparative studies. It is inspired by the new directions in writing, research and teaching generated by the South African TRC-process but not confined to these. Instead, it links these new research interests and current debates in the area of transitional justice (including human rights law, conflict-

resolution and peace-building, and social justice in transformation) with the more lasting intellectual perspectives provided by a thorough grounding in relevant academic disciplines.

Additional admission requirements:

Applicants should ideally have a major in, or some exposure to, Politics as an undergraduate subject. However, depending on which area of concentration the applicant is interested in, the following additional study backgrounds may be taken into account when assessing applications:

- **Transitional Justice** Majors in Politics, History, Law, Philosophy, Sociology, Literature
- **Human Rights** Senior courses in Law, LLB
- **Conflict Resolution** Majors in Politics, Psychology, Law, Social Anthropology, Sociology
- **Social Justice in Transformation** Majors in Politics, History, Law, Sociology, Social Anthropology, Psychology, Development Studies

The full specialisation comprises a minimum of 4 semester courses in each of the honours and master's years plus an independent research project at honours level and a master's minor dissertation component. The specialisation offers a choice between two core courses and a selection of electives in the areas of Transitional Justice, Human Rights, Conflict Resolution, and Social Justice in Transformation. Course selections are made with the following aims in mind:

1. Transitional Justice

Courses in the area of Transitional Justice aim to provide a theoretical grounding and comparative understanding of the interdisciplinary field of Transitional Justice at the intersection of human rights discourses, democratic transitions and post-conflict reconciliation.

2. Human Rights Law

Courses in the area of Human Rights Law aims to ground the professional and specialist studies in law in a broader theoretical and comparative understanding of the historical and political contexts in which Human Rights Law functions.

3. Conflict Resolution

Courses in Conflict Resolution aim to provide a comparative understanding and practice-orientated introduction to current approaches to peace operations and post-conflict reconciliation in the African context.

4. Social Justice in Transformation

Courses in Social Justice in Transformation are designed to combine a focus on issues of social justice related to poverty and development with the combating of legacies of racism and redressing racial, gender and social inequalities within more general normative and theoretical perspectives.

Some of the areas of concentration provide for *Internships*, which may be substituted for one of the elective options (but not for the core courses).

Religious Studies [REL]

The Department of Religious Studies is committed to the study of religions which will contribute to public life in our local, regional, national and continental contexts. It is dedicated to:

- an open, plural, intercultural, and interdisciplinary study of religion in all its forms;
- the in-depth study of African religious traditions;
- the creative and critical analysis of religion as a force in personal, social, economic and political life;
- the promotion of quality education and research in the study of religion as a vital contribution to the transformation and development of South Africa.

The mission statement is implemented through degree specialisations that focus on the broad theme of religion, culture and identity. The Department offers a systematic study of religion in public life, its meaning and significance in South Africa in particular and Africa in general. This broad theme is explored in core courses team-taught by faculty members and also reflected in various research projects and institutes presently housed in the Department.

Core courses provide the thematic, methodological and theoretical foundations for all students who choose to pursue degrees in this department. Additional courses continue this focus within the established areas of specialisation: African Studies, Christian Studies, Comparative Studies, Islamic Studies, Jewish Studies, Buddhism and Critical Theory.

Courses in areas of specialisation

Hereunder follows a broad map of the courses offered in the areas of specialisation. Not all courses indicated below will be offered in any given year. However, they will follow the pattern outlined here.

African Studies

The courses in African studies explore the varieties of indigenous religious belief systems as well as the impact of global religions like Christianity (especially Pentecostalism) and Islam on the continent. Students will be prepared to do research on religion in Africa through different methodological and theoretical paradigms. A specialization in African studies can be pursued in combination with a focus on Christian and/or Islamic studies.

Buddhism

The department offers postgraduate study and supervision in Asian religious traditions with a special emphasis on Buddhism. Currently an Honours level course on Buddhism and Modernity and guided reading projects through Reading Religious Texts are offered. Research interests include the contemporary spread and transformations of Buddhism, Buddhism and Globalisation, conversion and socially and environmentally engaged Asian spiritualities, with a particular focus on Japan.

Christian Studies

The courses in Christian Studies focus mainly on the Sociology of Christianity and on the study of African Pentecostalism. The latter section debates the social impact and trajectories of Christian new religious movements and new forms of believing and being Christian as espoused by the Pentecostal-charismatic churches and ministries, their engagement with media (Internet use,

QUALIFICATION AND SPECIALISATION RULES AND CURRICULA FOR HONOURS AND MASTERS PROGRAMMES OF STUDY 129

religious broadcasting, production and reproduction of books, DVDs & podcasts, Pentecostal advertising: posters, billboards, handbills), fiscal and political practices.

Comparative Studies

The courses in Comparative Studies are divided into two categories: Issues in the Study of Religion and Religion in Contemporary Society. The first area includes courses in the Problem of Religion, Religion and Ritual, Sacred Space, Religion, Gender and Embodiment, and the History of Religions in Southern Africa. The second area includes courses in Religion and Popular Culture, Religion and Urban Culture and Religion, Education and Society in South Africa.

Islamic Studies

The courses in Islamic Studies explore Islam as religion, culture and civilization in particular contexts and themes. An Honours level course covers fundamental concepts within Islam from phenomenological and socio-historical perspectives. This course is indispensable for any student embarking on research relating to Islam at a post-graduate level. At the Master's level, we offer specialized courses on Sufism, Islam in Africa, Gender, Islam and Feminism.

Philosophy of Religion/Critical Theory

The courses in Philosophy of Religion, Critical Theory and Post-Structuralist Thought address contemporary issues in European philosophy, philosophy of religion, modern Jewish thought and post-colonial theory. Courses such as Philosophers on Religion, Critical Theory, and Levinas, Derrida and the "Other" explore how reason, religion, ethics and subjectivity constitute meaning and value and how our social and historical conditions also contributes to life and meaning formation.

Weekly seminars

In addition to the normal course requirements, students are required to attend the seminars hosted during the course of the year. The intention of the seminars is to expose all postgraduates to seminars delivered by staff members and visitors to the Department. Attendance at all colloquia is compulsory and students will be required to reflect knowledge of their content in examinations. Details of these events will be advertised during the course of the year.

DOCTORAL DEGREES

Doctor of Philosophy (PhD)

The PhD is a research degree on an advanced topic under supervision which can be taken in any of the Departments in the Faculty. Examination is by thesis alone. It is subject to the general rules for the degree of Doctor of Philosophy as published in Handbook No 3, and to the following Faculty rules. Prospective candidates should consult the Head of the Department concerned to discuss both the topic and the availability of suitable supervision.

By virtue of inclusion on the Institution's DHET approved Programme and Qualification Mix (PQM), all qualifications included in this Handbook are accredited by the Council on Higher Education's permanent sub-committee - the Higher Education Quality Committee. Where a SAQA ID has not been provided, the qualification is awaiting the SAQA ID. The higher education sector has undergone an extensive alignment to the Higher Education Qualification sub Framework and thus all institutions are awaiting the finalisation of the process and completion of the awarding of SAQA ID's. Please consult Handbook 2 or the HEQsF Programme and Qualification Mix (PQM) on the Institutional Planning Department's website, as approved by the Department of Higher Education and Training, for a list of all UCT's accredited qualifications.

Introduction

The development by human beings of the power to communicate with one another by means of language, and their subsequent and continuing co-operative use of that power in transforming the world they live in, are among the most significant determinants of the human condition. Scholars have been inquiring into the origins, history, mechanism, structure and social roles of language and languages since the very beginnings of the intellectual tradition. Courses in this section not only offer an introduction to the range of such inquiries and an opportunity to participate in them, but above all foster the idea that an attempt to grasp the nature of language is an indispensable part of any serious attempt to understand what it is to be human.

AGI is a feminist research institute located within the School of African and Gender Studies, Anthropology and Linguistics in the Faculty of Humanities at the University of Cape Town (UCT). We are responsible for delivering a full suite of undergraduate and graduate degree programmes in Gender Studies. We are also committed to connecting with African womxn who identify as feminist thinkers and activists across disciplinary, institutional and geographic borders. We have aimed to make the boundaries between research, pedagogy and activism porous, so that these arenas can become epistemologically coherent. Two core principles have informed AGI's work: first, the simple understanding of knowledge production as organic and people-centered; second, a respect for the generative and transformative power of collective processes. AGI has lead research projects on: gender justice, sexuality and human rights; peace and conflict studies; religion and sexuality; and capacity building in relation to gender and women's studies knowledges.

The Centre was constituted in 1976 and built on the work of the School of African Studies which had been in existence for over fifty years and was one of the oldest in the world. Current scholarship takes place within the context of the mission of CAS, which promote scholarship in the various fields concerned with people in Africa. The brief remains focused on providing a critical comparative perspective between Southern Africa, Africa, and the globalizing world. The mission remains urgent, given the longstanding and continuing dominance of Western models and discourses. The Centre houses research projects, organizes a range of seminars, conferences, and talks, and runs a gallery open to a wide variety of cultural performances.

RESEARCH CHAIRS

Professor C Hamilton - Archive and Public Culture:

Professor Hamilton was recruited to this position in view of the strategic significance of the country's archival estate for the national priority of developing social cohesion. The appointment was made in view of UCT's already significant investments and achievements, across a number of disciplines, in critical archival engagements, archive curation projects and collaborations with public culture institutions, including collaborations in heritage training carried out in partnership with the University of the Western Cape.

Contact details: Carolyn.Hamilton@uct.ac.za or 021 650 4506.

Professor R Mesthrie - Migration, Language and Social Change:

Professor Mesthrie was appointed to this position in view of the significance of Sociolinguistics in understanding heritage, culture and social change in a multilingual society. The chief focus of the research chair will be on migration, language and social change, examining sociolinguistic practices "from below" in relation to the fostering of multilingualism, the further intellectualisation of local languages and the continuing prestige of English. Professor Mesthrie will continue as President of the Linguistics Society of Southern Africa.

AXL4205S THE AFRICAN STUDIES ARCHIVE

(May not be offered in 2021)

24 NQF credits at NQF level 8

Convener: Dr J Bam-Hutchison

Course entry requirements: Acceptance for an honours programme.

Course outline:

In this course we take a look at some of the key collections in the Manuscripts and Archives division of the University of Cape Town Library, and at some of the bodies of scholarly work to which they have given rise. As one of the oldest university archives in Southern African the collections speak – in image and text – of the formation of a range of discipline-based knowledges dealing with Africa. On the one hand, this takes the form of the emergence, formalisation and institutionalisation of a range of collecting and recording practices, fieldwork methodologies and the like. On the other hand, it takes the form of the emergence of various disciplinary discourses and their associated “objects” and “fields”. The key source of insight in the course lies in exploring how these different objects and fields are not natural or given but have been formed and constructed in relation to specific social contexts and intellectual histories. Significant collections examined in this course include the Bleek/Lloyd collection, the Goodwin Collection and the Hahn Collection. Particular emphasis is placed on the many hundreds of photographic images that form part of these collections as a point of entry into larger disciplinary debates and concerns.

DP requirements: Attendance at seminars is compulsory, failing which students' papers may not be marked.

Assessment: Two essays (25% each) 50%; major project 50%.

AXL4206S DECOLONIAL THEORY

24 NQF credits at NQF level 8

Convener: Z Msomi

Course entry requirements: Acceptance for an honours programme.

Course outline:

This course considers the growing body of thought from Latin America under the heading ‘decolonial theory’, and exemplified in the works of Walter Dignolo, Arturo Escobar, Enrique Dussel, Santiago Castro-Gomez, Nelson Maldonado-Torres and Anibal Quijano. This work has been significant in framing an approach to questions of knowledge, coloniality and globalisation that attempts to re-write the script of modernity (as colonial modernity) and that provides rich conceptual resources through which to re-think familiar issues. The course takes a key-word approach. Each two-week block considers a distinct set of key words or concepts and texts that introduce and discuss them. They include Coloniality (of power/knowledge/being); Geopolitics of knowledge; Colonial globality and global designs; Border theory and colonial difference; Modernity (colonial modernity, peripheral modernity, transmodernity); Global designs and the local; The Indigenous

Movement and postcolonial ethnicities. Approaching decolonial theory from the perspective of the Cape, the course asks: How might a critique based on South/Latin American historical experiences translate to African contexts? How does it speak to the particularity of knowledge production and colonial engagement in the Cape? How does it connect with contemporary African Studies debates addressing questions of knowledge and epistemology?

DP requirements: Submission of all written work and attendance at all seminars.

Assessment: One major project 100%.

AXL4207F RETHINKING AFRICA'S DEVELOPMENT

24 NQF credits at NQF level 8

Course outline:

This course looks at the various development approaches and theories adopted by African states at different times. The course examines some of the most influential theories of development which emerged in the context of the post-Second World War situation focusing on how these theories have been used in Africa. In examining the different development theories, the course also investigates how Africans have responded to these theories. The course examines the question of whether African countries need to rethink these approaches and theories. Emerging views about Africa's development trajectory are also discussed. Critical questions about whether Africa can achieve sustainable economic growth and development by deploying conventional development and economic growth theory are discussed.

DP requirements: Attendance at seminars is compulsory, failing which students' papers may not be marked.

Assessment: Class participation & presentation (10%); 3000-word research paper (35%); 5000-word essay (55%).

AXL4209FS LAND & AGRARIAN QUESTION

24 NQF credits at NQF level 8

Convener: Professor H Chitonge

Course entry requirements: Acceptance for an honours programme.

Course outline:

The prevalence of large-scale land acquisition in the context of rising food prices since the 2008/09 financial and economic crisis has brought the issues of land and land use in Africa in the spotlight. As a result, land and agrarian matters in Africa are increasingly having a direct bearing on broader issues including food security, environmental sustainability, economic growth, social and political stability, social justice and rural livelihoods. By introducing the land and agrarian questions in Africa this course critically examines the different dimensions of land, including patterns of land ownership, types of land tenure, land reform types, issues of tenure security, means of accessing land, land administration structures and institutions forms of land use, and the challenges (and opportunities?) posed by the current large-scale land acquisitions in different African communities. The course will draw examples from selected countries on the African continent. This course examines these dimensions of the land and agrarian questions in Africa in both their historical and contemporary contexts.

Assessment: Participation: 15%; Short Essay: 35%; Main paper: 50%.

AXL4210FS PAN-AFRICANISM & REGIONAL INTEGRATION IN AFRICA

24 NQF credits at NQF level 8

Convener: Professor H Chitonge

Course entry requirements: Acceptance for an honours programme.

Course outline:

The course examines the political and economic theory and rationale for Pan-Africanism and regional integration, with particular focus on how this has played out on the African continent over

time. Emphasis in the course is on understanding the origins of Pan-Africanism, the current initiatives and arrangements towards regional integration, and the link between the two. The course provides an overview of past and contemporary strategies, initiatives and programmes aimed at unifying the continent. Students are introduced to the key challenges and opportunities of integration and development in Africa. While the philosophy of Pan-Africanism is still cited in some quarters as the basis for regional integration today, economic, and to a lesser extent political rationale, has dominated the motive behind regional integration. There is more emphasis now on the economic gains that can come from integrating the African continent than on any other motives. Given this context the course examines whether Pan-Africanism plays any role in the current drive towards regional integration. In the course, students are encouraged to critically reflect on whether the current motives for regional integration are strong enough to overcome the tendency toward national sovereignty and individualism in the continent.

Assessment: Participation: 15%; Short Essay: 35%; Main Essay: 50%.

AXL4211F PROBLEMATISING THE STUDY OF AFRICA

24 NQF credits at NQF level 8

Convener: Dr T Thipe

Course entry requirements: Acceptance for an honours programme.

Course outline:

The course looks at the relationship between power and knowledge, within the context of the history of Africa since colonialism and the development of the disciplines that study this continent. It is a relationship that helps to explain the links between colonialism and the formation of disciplines, between imperialism and language studies, in ways that not only cut across disciplines, but were in fact, responsible for formulating those disciplinary boundaries in the first place. The writings of intellectuals who have contributed to the formulation of our understanding of how and why knowledge of the continent has developed and whose interests this knowledge has served, will be examined. The disciplines that will be interrogated are: history, gender studies, social anthropology and literary studies.

Assessment: Two essays (25% each): 50%; research project: 50%.

(Not offered in 2021)

24 NQF credits at NQF level 8

Convener: TBA

Course entry requirements: Acceptance to an honours programme

Sociophonetics is concerned with the interface between Phonetics and Sociolinguistics in relation to empirical studies of language variation, whereas the broader field of Language Variation and Change covers the conceptual relations between social variables (e.g. class, ethnicity and gender) and linguistic variables (lexical, syntactic or phonetic). Convener: Mr S Mpendukana

Course entry requirements: Acceptance for an honours programme.

Course outline:

The course explores the relationship between language and race by introducing students to the theoretical and ideological developments of racial hierarchies and their implications for society. In multilingual and multicultural contexts, such as South Africa, Africa and the Americas, this often carries implication for speakers and their well-being. We will explore the conceptions of race and their linguistic and semiotic manifestation through using the decolonial lenses to look into the social, economic and political relevance of race and language. Broadly, the course aims to emphasize how race and language are physically experienced daily by language speakers. This brings into

discussion the ideas of race, language and affectivity as a way of reading social politics and their implications.

DP requirements: 75% attendance at seminars, and submission of all assigned work.

Assessment: A minor essay of 1500 words = 20%; major essay 4500 words = 70% ; A presentation = 10%

AXL4323FS LANGUAGE ECOLOGY - EXPLORING INTERSECTIONS

24 NQF credits at NQF level 8

Convener: Professor A Deumert

Course entry requirements: Acceptance for an honours programme.

Course outline:

Language ecology (sometimes also called eco-linguistics) is the study of how languages interact with one another and the larger environment in which they are spoken/written/signed. It is a paradigm that is especially well-suited to understanding the challenges of the contemporary world and that allows linguists to contribute to the social sciences more broadly.

AXL4406S ANTHROPOLOGY OF YOUTH IN RESEARCH AND DEVELOPMENT

24 NQF credits at NQF level 8

Convener: Dr D Fuh

Course entry requirements: Acceptance for an honours programme.

Course outline:

This course critically explores the inter-linkages between youth, agency and transitions in the global south, with a specific focus on Africa where 'youth' has resurfaced as a significant cleavage for analysing contemporary transformations. The basic question relates to how youth deal with the many challenges that the weakness of the state, the economy and the many aspects of the on-going processes of globalisation provoke. The focus is on young people's strategies to imagine possibilities, participate in transformations, fix broken trajectories and redefine both individual and collective biographies. Faced with the predicament of arrested futures, dwindling economic possibilities and the loss of old predictabilities, young people in the continent increasingly display resilience in creating new alternatives for continuity, hence repositioning themselves as 'fixers'. Yet, the tendency to conceptualise youth as stagnated, frustrated and violent is still rife amongst social scholars, where youth is still framed in terms of a 'lost generation' located in 'waithood' or 'iliminality' (that is failed transition). In this course we critically engage with competing epistemologies of youth in the global South, examining young people as 'fixers' or agentive actors both troubled and actively involved in shaping new destinies and setting new transitional pathways in contemporary Africa.

AXL4407F MEDICAL ANTHROPOLOGIES: WELL-BEING IN A PRECARIOUS WORLD

24 NQF credits at NQF level 8

Convener: Professor F Ross

Course entry requirements: Acceptance for an honours programme.

Course outline:

The course explores the subdiscipline of medical anthropology through a range of theoretical perspectives on well-being in relation to the body, medicines, and political economy. The overall theme of the course concerns the intertwining of body, sociality and illness. It seeks to demonstrate the ways in which illness and well-being are imbricated in a precarious world. Theoretical themes in medical anthropology are discussed alongside ethnographic work to inspire students in the importance of a detailed revisiting of local worlds and their global connections. Four major themes are: Phenomenological approaches to embodiment; Questions of power; Marginalisation, history and discourse; Knowledge and ethics in relation to biology, science, and biomedicine. The overall aim is to examine how well-being is constituted and to understand the ways in which contemporary arrangements of power, knowledge, resources enable or inhibit health, broadly understood. The course examines the entailments of practical medical anthropology.

AXL4416F SCIENCE, NATURE, DEMOCRACY*(Not offered in 2021)*

24 NQF credits at NQF level 8

Convener: Professor L Green**Course entry requirements:** Acceptance for an honours programme.**Course outline:**

This course focuses on the relationship between science and governance, drawing on current debates in science studies about the mediation of different versions of nature, truth and world in a democracy. Whether those concerns arise in relation to different disciplinary knowledges, the interests of capital, religious or indigenous movements, or between scientists and parliamentarians, the production of evidentiaries and procedures for verification are a central concern in decision-making in contemporary public life. The course explores the unstable knowledge terrain where state, science, publics and capital meet, with the goal of developing insight into the mistranslations and incomprehensions that occur, and to explore options that might resolve them. Building on emerging work on scholarly diplomacy in the scientific humanities, with a particular interest on science studies in the south, the course focuses on emerging strategies of mediation, equivocation, translation and contestation that are part of democratic processes and activism.

DP requirements: Submission of all prescribed assignments; satisfactory attendance and participation in coursework seminars.**Assessment:** 1 long essay (30%); 1 project (40%); two seminar presentations (15+15%)

AXL5012F RESEARCHING BEYOND BORDERS*(May not be offered in 2021)*

24 NQF credits at NQF level 9

Convener: TBA**Course entry requirements:** Acceptance for a master's programme.**Course outline:**

This course explores approaches to research which, while engaged with texts, imagine the creation of knowledge as a dynamic in which questions of space, ground, collectivities, language and the body intersect in difficult tensions of what can – and cannot – be represented within our own work as researchers. Drawing from the disciplinary and research interests of the course conveners, the course will look at contemporary theory on questions of 'ground' (actual ground sites of burial, dispossession, building, and memory, and the 'ground' of epistemological assumption), 'identities' (those created through digital communication, those created through migration, those imagined through political coercion or consensus), and the 'body' (the technological body, the sexual body, the violated body, bodies of knowledge and creativity). Through the discussions opened by what will become an interdisciplinary conversation, we will ask questions about the methodological strategies which might help us imagine 'research' beyond the boundaries of qualitative approaches with we are already familiar.

DP requirements: Attendance at seminars is compulsory, failing which students' papers may not be marked.**Assessment:** Seminars (20% & 15%); essay (15%); long paper (50%).

24 NQF credits at NQF level 9

Convener: Dr T Thipe

Course entry requirements: Acceptance for a master's programme.

Course outline:

The course looks at the relationship between power and knowledge, within the context of the history of Africa since colonialism and the development of the disciplines that study this continent. It is a relationship that helps to explain the links between colonialism and the formation of disciplines, between imperialism and language studies, in ways that not only cut across disciplines, but were in fact, responsible for formulating those disciplinary boundaries in the first place. The writings of intellectuals who have contributed to the formulation of our understanding of how and why knowledge of the continent has developed and whose interests this knowledge has served, will be

examined. The disciplines that will be interrogated are: history, gender studies, social anthropology and literary studies.

AXL5204FS LAND & AGRARIAN QUESTION

24 NQF credits at NQF level 9

Convener: Professor H Chitonge

Course entry requirements: Acceptance for a master's programme.

The prevalence of large-scale land acquisition in the context of rising food prices since the 2008/09 financial and economic crisis has brought the issues of land and land use in Africa in the spotlight. By introducing the land and agrarian questions in Africa this course critically examines the different dimensions of land, including patterns of land ownership, types of land tenure, land reform types, issues of tenure security, means of accessing land, land administration structures and institutions forms of land use, and the challenges (and opportunities?) posed by the current large-scale land acquisitions in different African communities. Assessment: Class participation & presentation (10%); 3000-word research paper (35%); 5000-word essay (55%).

AXL5206FS PAN-AFRICANISM & REGIONAL INTEGRATION IN AFRICA

24 NQF credits at NQF level 9

Convener: Professor H Chitonge

Course entry requirements: Acceptance for a master's programme.

Course outline:

The course examines the political and economic theory and rationale for Pan-Africanism and regional integration, with particular focus on how this has played out on the African continent over time. Emphasis in the course is on understanding the origins of Pan-Africanism, the current initiatives and arrangements towards regional integration, and the link between the two. The course provides an overview of past and contemporary strategies, initiatives and programmes aimed at unifying the continent. Students are introduced to the key challenges and opportunities of integration and development in Africa. While the philosophy of Pan-Africanism is still cited in some quarters as the basis for regional integration today, economic, and to a lesser extent political rationale, has dominated the motive behind regional integration. There is more emphasis now on the economic gains that can come from integrating the African continent than on any other motives. Given this context the course examines whether Pan-Africanism plays any role in the current drive towards regional integration. In the course, students are encouraged to critically reflect on whether the current motives for regional integration are strong enough to overcome the tendency toward national sovereignty and individualism in the continent.

DP requirements: Submission of all written work and attendance at all seminars.

Assessment: Seminar presentations & participation 15%, short essay 35% (3000 words), long essay (5000 words) 50%.

AXL5207FS PUBLIC CULTURE IN AFRICA

(May not be offered in 2021)

24 NQF credits at NQF level 9

Convener: Professor S Vawda

Course entry requirements: Acceptance for a master's programme.

Course outline:

This course explores issues in public culture affecting Africa in a global context. Detailed examples illustrate how public culture is shaped, and how public expressions of identity and difference manifest in spaces and buildings, heritage, music and literature. An interdisciplinary course, it introduces various theoretical perspectives on culture and uses evidence from archaeology, history, architecture, literature and cultural studies. Its empirical focus ranges from the archaeology of pre-colonial Africa to the public culture of the Internet. The course interweaves and links engagement with theory with the development of skills that are useful in the worlds of film and media practice, heritage practice, business, advertising etc. The theory component considers key texts demonstrating "tools to think with", and allowing shifts between general propositions and real-world examples, thereby probing the socio-cultural world's underlying structures. The skills development component focuses on the conceptual planning and development of projects in the phase preceding final production. In particular, the course develops historically- and theoretically-informed, reflexive understandings of culture and identity, in contexts of diverse heritage and media practices. It offers a unique convergence of theory and practice, around a number of key sites of identity and contestation: "race", "public culture", "African-ness", and the like.

Assessment: Two essays: 25% each; Project: 50%.

AXL5208FS THE AFRICAN STUDIES ARCHIVE*(May not be offered in 2021)*

24 NQF credits at NQF level 9

Convener: Dr J Bam-Hutchison**Course entry requirements:** Acceptance for a master's programme.**Course outline:**

In this course we take a look at some of the key collections in the Manuscripts and Archives division of the University of Cape Town Library, and at some of the bodies of scholarly work to which they have given rise. As one of the oldest university archives in Southern African the collections speak – in image and text – of the formation of a range of discipline-based knowledges dealing with Africa. On the one hand, this takes the form of the emergence, formalisation and institutionalisation of a range of collecting and recording practices, fieldwork methodologies and the like. On the other hand, it takes the form of the emergence of various disciplinary discourses and their associated “objects” and “fields”. The key source of insight in the course lies in exploring how these different objects and fields are not natural or given but have been formed and constructed in relation to specific social contexts and intellectual histories. Significant collections examined in this course include the Bleek/Lloyd collection, the Goodwin Collection and the Hahn Collection. Particular emphasis is placed on the many hundreds of photographic images that form part of these collections as a point of entry into larger disciplinary debates and concerns.

Assessment: Major project: 50%, Research proposal: 10%, Additional material: 40%.

AXL5311F RESEARCH METHODS IN SOCIOPHONETICS

(Not offered in 2021)

24 NQF credits at NQF level 9

Convener: TBA

Course entry requirements: Acceptance for a master's programme

Course outline:

Sociophonetics is concerned with the interface between Phonetics and Sociolinguistics in relation to empirical studies of language variation. Whereas the broader field of Language Variation and Change covers the conceptual relations between social variables (e.g. class, ethnicity and gender) and linguistic variables (lexical, syntactic or phonetic), Sociophonetics pays closer attention to the phonetic dimension. This course accordingly focuses in detail on the research methods that will prepare students for their own future work. The main emphasis will fall on (a) practical acoustics, especially the measurement of vowels and certain consonants using the computer programme PRAAT; (b) techniques of normalisation, including BARK and Watts-Fabricsius; (c) basic statistical analysis; and (d) presentation and analysis of South African data in relation to language variation and change.

Convener: Mr S Mpendukana

Course entry requirements: Acceptance for a master's programme.

Course outline:

The course explores the relationship between language and race by introducing students to the theoretical and ideological developments of racial hierarchies and their implications for society. In multilingual and multicultural contexts, such as South Africa, Africa and the Americas, this often

We will explore the conceptions of race and their linguistic and semiotic manifestation through using the decolonial lenses to look into the social, economic and political relevance of race and language. Broadly, the course aims to emphasise how race and language are physically experienced daily by language speakers. This brings into discussion the ideas of race, language and affectivity as a way of reading social politics and their implications.

DP requirements: At least 75% attendance at all lectures and seminars, and completion of all assigned work.

(Not offered in 2021)

24 NQF credits at NQF level 9

Convener: Professor F Ross

Course entry requirements: Acceptance for a master's programme.

Course outline:

The course explores the subdiscipline of medical anthropology through a range of theoretical perspectives on well-being in relation to the body, medicines, and political economy. The overall theme of the course concerns the intertwining of body, sociality and illness. It seeks to demonstrate the ways in which illness and well-being are imbricated in a precarious world. Theoretical themes in medical anthropology are discussed alongside ethnographic work to inspire students in the importance of a detailed revisiting of local worlds and their global connections. Four major themes are: Phenomenological approaches to embodiment; Questions of power; Marginalisation, history and discourse; Knowledge and ethics in relation to biology, science, and biomedicine. The overall aim is to examine how well-being is constituted and to understand the ways in which contemporary arrangements of power, knowledge, resources enable or inhibit health, broadly understood. The course examines the entailments of practical medical anthropology.

DP requirements: Submission of all prescribed assignments; satisfactory attendance and participation in coursework seminars.

Assessment: Coursework 100%

AXL5406S ANTHROPOLOGY OF YOUTH IN RESEARCH AND DEVELOPMENT

24 NQF credits at NQF level 9

Convener: Dr D Fuh

Course entry requirements: Acceptance for a master's programme.

Course outline:

This course critically explores the inter-linkages between youth, agency and transitions in the global south, with a specific focus on Africa where 'youth' has resurfaced as a significant cleavage for analysing contemporary transformations. The basic question relates to how youth deal with the many challenges that the weakness of the state, the economy and the many aspects of the on-going processes of globalisation provoke. The focus is on young people's strategies to imagine possibilities, participate in transformations, fix broken trajectories and redefine both individual and collective biographies. Faced with the predicament of arrested futures, dwindling economic possibilities and the loss of old predictabilities, young people in the continent increasingly display resilience in creating new alternatives for continuity, hence repositioning themselves as 'fixers'. Yet, the tendency to conceptualise youth as stagnated, frustrated and violent is still rife amongst social scholars, where youth is still framed in terms of a 'lost generation' located in 'waithood' or 'iliminality' (that is failed transition). In this course we critically engage with competing epistemologies of youth in the global South, examining young people as 'fixers' or agentive actors both troubled and actively involved in shaping new destinies and setting new transitional pathways in contemporary Africa.

DP requirements: Submission of all prescribed assignments; satisfactory attendance and participation in coursework seminars.

Assessment: Long essay (40%); 3 response papers (30%); project (20%); class participation (10%).

Course outline:

Beginning with the Archie Mafeje's critiques of anthropology, the course explores current theoretical interventions regarding coloniality and modernity in contemporary social sciences and humanities. With a particular emphasis on the possibilities that open when critiques of coloniality extend to the categories inhering in modernist thought, the course focuses on the possibilities for radical and innovative ethnographic accounts of the world. The course pays particular attention to modes of theorising relations and seeks to undo a Western epistemology that takes distancing, objectification and war as its primary modes of engagement.

DP requirements: Submission of all prescribed assignments; satisfactory attendance and participation in coursework seminars.

Assessment: Two 5000-word essays (40% each); presentation (20%).

AXL5414S RESEARCHING THE ANTHROPOCENE

24 NQF credits at NQF level 9

Convener: N Solomon

Course entry requirements: Acceptance into a master's programme.

Course outline:

The term "Anthropocene", taken up by geologists to describe the era in which the effects of collective human action have become "significant on the scale of Earth history", compels a rethinking of the divides between the human sciences and the natural sciences. The implication: not only are conceptual divisions between society and nature to be rethought, but that new approaches to research are needed to speak to the challenges of comprehending the interconnections of human life, earth systems, and species. This course offers an introduction to research methods that are needed in order to bring these interconnectivities and parts and wholes, into public life and decision-making. Building on current conversations across the south on the engagement of decolonial literatures and the post-humanities, this course explores the research methods proposed by leading scholars in these fields.

DP requirements: Submission of all prescribed assignments; satisfactory attendance and participation in coursework seminars.

Assessment: Two 5000-word essays (40% each); prepared seminar presentation (20%).

AXL5416F SCIENCE, NATURE, DEMOCRACY

(Not offered in 2021)

24 NQF credits at NQF level 9

Convener: Professor L Green

Course entry requirements: Acceptance into a master's programme.

Course outline:

This course focuses on the relationship between science and governance, drawing on current debates in science studies about the mediation of different versions of nature, truth and world in a democracy. Whether those concerns arise in relation to different disciplinary knowledges, the interests of capital, religious or indigenous movements, or between scientists and parliamentarians, the production of evidentiaries and procedures for verification are a central concern in decision-making in contemporary public life. The course explores the unstable knowledge terrain where state, science, publics and capital meet, with the goal of developing insight into the mistranslations and incomprehensions that occur, and to explore options that might resolve them. Building on emerging work on scholarly diplomacy in the scientific humanities, with a particular interest on science studies in the south, the course focuses on emerging strategies of mediation, equivocation, translation and contestation that are part of democratic processes and activism.

DP requirements: Submission of all prescribed assignments; satisfactory attendance and participation in coursework seminars.

Assessment: Two 5000-word essays (40% each); prepared seminar presentation (20%)

AXL5417FS WATER, SOCIETY, ECOLOGY

24 NQF credits at NQF level 9

Convener: N Solomon

Course entry requirements: Acceptance for a master's programme.

Course outline:

This cross-institutional course aims to improve student understandings of social and ecological dilemmas around water, and water-related infrastructures. The goal is to support graduates capacity to think with liquid flows around hard surfaces; urban chemistries; multiple species, and the historical-political legacies of infrastructure and design, in order to work towards “planet-compatible”, justice-based infrastructure interventions. This course also probes how we can build better collaborative practices across North-South divides – i.e. ones that are alert to histories of inequality and questions of environmental justice. It thus includes comparisons and discussions about ongoing relations at human-land-water interfaces in different hemispheres. To this end, the course is both transdisciplinary-- to prepare students to reach beyond traditional disciplines -- and hemispheric-- to facilitate, in a teaching context, a stronger understanding of north-south concerns and dialogics.

DP requirements: All coursework to be submitted. Attendance at all classes and field activities.

Assessment: 1 Essay (35%); 1 Project based on field research of a river (45%); 2 Seminar Presentations (2x10%).

PPE (and other) students who do not have to complete the core as part of their degree requirements may be granted permission to register for this elective at the discretion of the Head of Department.**Course outline:**

This course is designed to help students appreciate the relationship between the economy and its financial markets so that they may better understand how the economy works, how financial markets behave and how they work and interact with each other. The programme is aimed at developing a feel for the rationality of ‘the market’ and the often-discordant sounds and rhythms of financial markets. We hope to develop a stronger sense of how the financial market anticipate and influence economic policy. We will interact with the data on the economy and the markets using Econometric packages with which students should be familiar. We will use regression analysis and other econometric techniques to build and analyse models of the economy and the financial markets. As a result, students will be expected to become more perceptive analysts of published financial data and economic events and of the role played by financial markets in promoting economic development.

It will discuss the use of weights to correct for the survey design as well as other common weight adjustments, e.g. for nonresponse and to “calibrate” the sample to external population totals. We will also consider the importance of taking the sample design into consideration when estimating standard errors, in particular in the case of multi-stage samples. Besides learning a set of tools necessary to get reliable estimates from social surveys we will also develop an appreciation of some of the trade-offs faced by survey organisations in collecting the data.

The objective of this course is to introduce recent quantitative techniques which are used to empirically implement and test models of consumer behaviour and competition between firms. These models are commonly applied to competition policy and regulatory proceedings, for instance to assess the effects of a merger on competition or to regulate telecommunication operators. During the course students should become comfortable with the application of these techniques and understand their limitations. This course should be of interest for students who intend to work as economists at antitrust authorities, industry regulators, and economic consulting firms or pursue a career as a researcher in academia.

The course will be divided into two interchanging parts. First, we will derive theoretical models in the classroom. Next, we will estimate these models using Stata and real data from different industries in the computer lab. About 50% of the course will be devoted to lab exercises. You will also receive regular take home computer exercises to be able to practice the applications by yourself. Lectures notes and a reading list of relevant academic and policy papers will be provided for each topic. The following topics will be covered in the class: (1) Econometric methods for estimation of simultaneous equations models of demand and supply (2) Estimation of oligopolistic models of competition and tests for market conduct (3) Estimation of differentiated products demand functions (4) Merger simulation (5) Detecting collusion and estimation of damages (6) Estimation of models of market entry (8) Quantitative methods used to define markets in antitrust proceedings

EDN4502W RESEARCH & EVALUATION OF EMERGING TECHNOLOGY

30 NQF credits at NQF level 8

Convener: Professor D Ng'ambi & Dr T Mayisela

Course entry requirements: Acceptance for the Postgraduate Diploma in Educational Technology.

Course outline:

Drawing on global and African research, students will use theoretical perspectives evident in e-learning research as a lens through which to understand the implementation and evaluation of an educational technology intervention in an authentic context. This module adopts a Design Based Research (DBR) approach to explore education challenges, refine theory, define pedagogical outcomes then use emerging technologies to create a learning environment that supports the outcome. DBR acknowledges that any intervention in education embodies theoretical claims about teaching and learning. Thus, this module will prepare students to develop design principles for designing theoretically grounded eLearning interventions and be able to evaluate existing interventions to uncover underpinning design principles. Given the increase in the use of mobile devices, the module will also focus on mobile learning interventions. Among others, the following models will be used within DBR: the Conversational Framework and the Framework for the Rational Analysis of Mobile Education (FRAME).

DP requirements: 80% attendance record and submission of all assessment tasks.

Assessment: An evaluation of an online learning intervention counts 100%.

- A consideration of different styles of leadership and how these might or might not contribute towards learner performance.
- A focus on possible 'managerial' responses to improve this within the context of school culture and leadership. In particular, the course will examine learner performance in South Africa; leadership in challenging circumstances; the role that teachers as leaders can play, and the means to enact change. The emphasis here will be on examining what it is that schools and teachers can do rather than on what it is not possible to do.

(Not offered in 2021)

30 NQF credits at NQF level 9

Convener: Dr A Muthivhi

Course entry requirements: Acceptance for a master's programme.

Course outline:

Grounded in developmental psychology and education, Psychology and Pedagogy examines the changing context of schooling in South Africa and the evolving practices of classroom teaching and learning. Employing contemporary advances in research in developmental psychology and education, the course further examines the challenges and problems that continue to confront pedagogical practices in South Africa's diverse schooling context, and explores theoretically informed and yet, empirically grounded solutions to problems and challenges of classroom teaching and learning--as well as human development, in post-apartheid South Africa's schooling.

The course begins by examining educational transformation in South Africa's schooling--embodied in, and expressed through, policy development processes that, in turn, inform and shape extant pedagogical practices within diverse institutional contexts of schooling and related educational institutions. The concept and practice of pedagogy broadly, is then explored through a systematic consideration of relevant and appropriate theories in developmental psychology and education.

DP requirements: At least 80% attendance at lectures and seminars and satisfactory completion and presentations of prescribed seminar papers, as well as satisfactory participation in lectures/seminars.

Assessment: Exam Equivalent Assignment 8000 words weighted 90% of total coursework. Lecture/Seminar participation and presentation weighted at 10% of the total coursework.

30 NQF credits at NQF level 9

Convener: Associate Professor J Hardman

Course entry requirements: Acceptance for a master's programme.

Course outline:

Grounded in developmental psychology and education, Cognitive Development and Developmental Learning aims to develop an approach to theorising the process of learning and change, both in

relation to the specific educational problems/challenges generated in the South African context, and in relation to the broader questions of psychological change. The intention of the course is to generate a view of learning and learners that negates the conventional isolation of educational issues from other psychological domains, such as emotion and cognition.

DP requirements: At least 80% attendance at lectures and seminars and satisfactory completion and presentations of prescribed seminar papers, as well as satisfactory participation in lectures/seminars.

Assessment: Exam Equivalent Assignment 8000 words weighted 85% of total coursework. Lecture/Seminar participation and presentation weighted at 15% of the total coursework.

EDN5505S CHANGING FRAMEWORKS IN CURRICULUM POLICY

30 NQF credits at NQF level 9

Convener: Associate Professor U Hoadley

Course entry requirements: Acceptance for the MEd.

Course outline:

The course is concerned with change and continuity in processes of curriculum reform. Three central ideas informing it. The first is an historical analysis of curriculum identifying reform swings between two poles, 'traditional' and 'reform' or progressive curricula. The second idea is the implications of these swings the 'message systems' of education – curriculum, pedagogy and evaluation (the intended, the enacted and the assessed curriculum). The third tenet is the centrality of knowledge in the consideration of curriculum policy, change and evaluation. The course begins with a broad scan of the political sociology and historical literature on curriculum and throughout it focuses on analyses within the sociology of knowledge. Fundamentally it is the nature and status of knowledge that shifts when the curriculum changes. The course aims to expose students both to the broader political context and processes of curriculum reform, as well as conceptual approaches to the analysis of curriculum forms.

DP requirements: 80% attendance record and completion of all tasks and assignments.

Assessment: Academic essay (8000 words).

EDN5506FS CURRICULUM THEORY AND RESEARCH

30 NQF credits at NQF level 9

Convener: Associate Professor U Hoadley

Course entry requirements: Acceptance for the MEd.

Course outline:

This course focuses on curriculum and pedagogy. The course is particularly interested in how education knowledge is distributed unequally across different groups in society, including through different kinds of pedagogic practices. Being sociologically rooted, the course poses questions like 'why do we go to school?'; 'what is the purpose of education?'; 'how do we understand knowledge?'; 'what knowledge should we include in the formal curriculum?'; 'is there an optimal pedagogy for learners from low-income communities?' The course offers a broad introduction to the study of curriculum and pedagogy, and then focuses in particular on Basil Bernstein as the main theoretical resource in exploring questions around curriculum, knowledge, pedagogy and society. In each session we consider both theoretical texts and reports of empirical research that use the theory. In this way, the course is both an introduction to curriculum theory and theories of pedagogy and to their use in empirical research in education.

DP requirements: 80% attendance record and completion of all tasks and assignments.

Assessment: Academic essay (8000 words).

Course entry requirements: Acceptance for the MEd

Course outline:

The course provides an introduction to the study of language and literacy in a range of academic settings, via the emerging area of 'academic literacies' in the New Literacy Studies field. Rather than a generic academic skill, academic literacy is studied as diverse, shaped by disciplines and subject areas. The course engages with two methodologies that shed light on academic texts and practices. Critical discourse analysis (CDA) focuses on texts, while ethnographic observation (including multimodal analysis) looks more closely at practices. These methodologies are used to explore the relationship between texts and their social-political-historical contexts. The course interrogates the politics of 'academic voice' to help us think about access questions in tertiary education settings locally and globally.

EDN5532FS DIGITAL LITERACIES ACROSS THE LIFESPAN

30 NQF credits at NQF level 9

Convener: TBA

Course entry requirements: Acceptance for a master's programme.

Course outline:

This course takes a critical perspective on the relationship between digital technologies and literacy and language learning across the lifespan. It reviews theoretical paradigms in the field of literacy studies (from Socrates' questions about writing through to post-humanism), examining the ways in which literacy, language and digital technologies (and their affordances and constraints) are viewed in each paradigm, and focusing on ontological, epistemological and practice-based questions in each. The pluralisation of the concept of literacy is problematised and concepts like media literacy, multimedia, multimodality, multiple literacies are mapped. The implications for how digital technologies are taken up in literacy practices in and out of educational contexts are explored. The course examines the dynamics and consequences involved in the use of digital technologies for addressing questions of language, literacy and learning in school and out of school, for young

children, children and teenagers in schooling and younger and older adults in non-formal and formal provision and higher education. It addresses the implications of the research for questions of quality and systemic provision in schooling and in adult education. Students work in groups and are provided with reading packs related to their sites of practice in different phases across the lifespan.

DP requirements: Attendance at 80% of classes and all assessments submitted.

Assessment: 20% DP tasks and two essays each worth 40%.

It will explore what perspectives from Africa, the postcolonial world and the global south can contribute to these debates by troubling and unsettling the themes, conceptual frameworks, theories, genealogies, etc. currently dominant within the field and thus map new directions. The questions we will explore in this seminar include: what is the state of current debates in World Literature? How are these debates shaping the field at the moment? What is the place of voices from Africa, the postcolonial world and the global south in these debates? How do literatures in the 'minor' languages of the world count? Can we think World literature outside of capital and/or imperial or global languages?

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Class participation (including reading test): 10%. One researched class presentation: 10%. Accompanying essay (3,000 words): 30%. One research essay (5,000 words): 50%.

ELL4036F RACE AND RELATIONALITY IN AFRO-EUROPEAN LITERATURE

24 NQF credits at NQF level 8

Convener: Dr P Moji

Course entry requirements: Acceptance for an honours programme.

Course outline:

This elective engages with black phenomenology outside the habitual American and African contexts, through a study of Afrodiasporic narratives set in Europe. Noting the 'silent racialisations' behind the European dogma of colour-blindness, the course problematises categories such as 'migrant' vs. 'Afro-European' by the examining different constructions of race on the continent, which are often contingent on different colonial histories and waves of migration. The course is equally weighted between literary and theoretical texts, with students being exposed to narratives in or translated into English from diverse geographical locations alongside theoretical texts that explore race, relationality and black geographies. Students acquire the principles of analysing translated texts, comparative approaches to literary critique and develop conceptual ease with a phenomenological approach to narrative.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Submissions totalling 6000 words for the semester

ELL4066FS GENDER & LITERATURE

24 NQF credits at NQF level 8

Convener: Associate Professor B Boswell

Course entry requirements: Acceptance for an honours programme.

Course outline:

This seminar aims to introduce students to women's literary history in Africa and the theorisation of gender through literature. Drawing on transnational feminist literary theory, while centering feminist theory produced on the African continent, it aims to historically locate women's literary production in Africa and the diaspora. It aims to critically examine African theorisations of gender, race, and sexuality in African feminist fiction and literary criticism. The course is broadly divided into seven sections: 'Mapping our Intellectual Terrain', 'Rethinking Gender in African Contexts', 'The Long Shadow of Colonialism: Race, Gender and Sexuality', 'Representations of Racialised Sexual Violence', 'The Work of African Feminist Literary Criticism', 'Black Feminist Imagination', and 'Reimagining Ourselves'. It asks of participants to study a history of intellectual engagement around race, gender and sexuality, centered around African feminists' knowledge production, while thinking of themselves as producers of knowledge with the power to imagine a different world.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Written work of 8,000 words, at least 50% of which is devoted to a final essay and 50% devoted to shorter written assignments during the semester.

ELL4068FS HISTORY AND HISTORICITY

24 NQF credits at NQF level 8

Convener: Associate Professor P Anderson

Course entry requirements: Acceptance for an honours programme.

Course outline:

This seminar concentrates on the vexed place of history in literary (and cultural) studies. How real and how textual is history? What kind of uses may history be brought to bear upon our reading of literature and culture, and with what security? Is it possible or desirable to read history - both secondary accounts and 'primary' archives - with the kinds of caprice that some literary theory urges upon us in reading literary and cultural texts? In particular we will seek to grasp the kinds of feints, dashes and grabs that the so-called New Historicism has brought to our work since the 1980s, and to consider not only its philosophical contingencies, its debt to literary theory, Marxism and Anthropology, but also its method and style. And we'll ask: Can these signatures underwrite a reading of history itself? Students taking this elective will write one paper on the critical methodology and theory of historiography/historicism, and will write one piece of creative criticism along the lines of the authors we read, particularly after the example of 'the anecdote' in the writing of the New Historicism.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Participation 20%; presentation, 20%; final paper of 4,000 words 60%.

ELL4074FS CURRENTS OF THOUGHT IN AFRICAN LITERATURE

24 NQF credits at NQF level 8

Convener: Associate Professor C Ouma

Course entry requirements: Acceptance for an honours programme.

Course outline:

This seminar will revisit debates that dominated discussions of the category 'Modern African Literature'. The seminar will engage with how sub-categories such as 'Oral Literature' or 'Orature'

evolved into the development of the broader field of postcolonial theory and criticism, as African identities came to terms with the structural legacies of colonialism, which overdetermined the experiences of 'citizenship' in the new era of political freedom. In the background of these debates was an effort at canon-formation, which was articulated by a number of important conferences, events and publications – the Makerere Conference of 'Writers of English Expression' was one such event that fronted the question of language as central to the trends of thinking about what Modern African literature meant. In revisiting these debates the seminar seeks to ask what the category 'postcolonial' means today, in relation to categories such as 'diaspora' and in the context of South Africa the category 'post-apartheid'. Where are the lines of solidarity, and of flight amongst these categories? The seminar will therefore look at a range of 'archival' material such as documents related to the Makerere Conference, theoretical and critical material related to debates on 'Modern Africa literature' as well as the broader field of imagination that emerged to provide a critical platform of practice.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Assessments totalling 6000 words for the semester.

ELL4075S MEMORY, TRAUMA AND THE LIMITS OF LANGUAGE

24 NQF credits at NQF level 8

Convener: Professor S Young & Associate Professor H Twidle

Course entry requirements: Acceptance for an honours programme.

Course outline:

This course investigates the ways in which language comes up against limits when attempting to represent trauma or 'unspeakable' pain. The field of trauma studies has been preoccupied with a paradox: traumatic experience seems to defy representation, while intensifying the imperative to bear witness. We will consider some of the literature that wrestles with this paradox, both fiction and non-fiction, as well as performance art and various forms of public memorialisation, specifically in relation to slavery, the Holocaust, and apartheid. Recent calls for the decolonisation of trauma studies have drawn attention to the 'multiplicity' and the 'sociality of pain', and to the place of visual and literary culture in making visible historical injustice. Cognisant of these calls to de-individualise the language of trauma, we will probe the role of personal narrative in public culture and in securing the claims of 'history'. We consider the impact of what is thought of as intimate and personal (the body, grief, pain, attachment) in the public archive that underwrites post-apartheid revisionist history. The dependence of history-making on testimonies, life narratives and visual art that presents the body in pain have turned the work of mourning and survival into a matter of public import.

Assessment: Response papers: 30%; First essay: 30%; Second essay: 40%

ELL4076FS CULTURAL CRITICISM, NON-FICTION AND THE ESSAY: WRITING WORKSHOP

24 NQF credits at NQF level 8

Convener: Associate Professors N Davids & H Twidle

Course entry requirements: Acceptance for an honours programme.

Course outline:

This is a writing-intensive seminar for both 'academic' and 'creative' writers – a division that we will try to unravel in interesting ways as we explore how critical, academic and intellectual work can take shape in more creative forms and public voices. We will use contemporary essays, creative criticism and literary non-fiction to generate our own writing tasks. Students will also be required to write two stand-alone essays (on subjects of their own choice) and to keep a semester-long reading journal. Some writing exercises might include: reviewing imaginary books; using 'found' materials and tracing the lives of objects; working within artificial constraints; linking image, music and text; walking in the city and representing space; interviewing and telling the stories of others; researching biographical profiles and portraits; writing art and music journalism; exploring filmic, photo and documentary 'essays'. The primary aim of the seminar is to prepare students to write for a wider audience than that of conventional academic writing, and to allow them the space to experiment with 'voice' in this sense. It aims to foster a public kind of criticism, and to train students to become

reviewers, cultural commentators and arts journalists both within and beyond the 21st-century academy.

Assessment: Reading and writing journal: 30%; First essay: 30%; Second essay: 40%.

ELL4077FS WAYWARD EXPERIMENTS AND HYBRID GENRES

24 NQF credits at NQF level 8

Convener: S Busuku

Course entry requirements: Acceptance for an honours programme.

Course outline:

What are hybrid genres? What does it mean to write and experiment from ‘in-between’? This elective blends both ‘critical’ and ‘creative’ writing practices. This interdisciplinary elective oscillates, at all times, between theory and practice. It is writing-intensive and demands lyrical richness and theoretical depth. This elective combines research, critical theory, fictional narrative and poetic language. Students will explore and experiment with form, genre and narrative techniques in a variety of ways. The elective, through selected readings, will explore the questionable dynamics of power that create and uphold boundaries around the so-called ‘critical imagination’ and the so-called ‘creative imagination’. How might we disrupt such boundaries within the academy? How might hybridity reshape the academy? The course exists at the intersection of the lyric essay, various poetic forms and is deeply rooted in advanced scholarly work. Through a mixture of seminars and writing workshops, students will explore a range of prescribed reading as a means of developing their style and technique. Students will engage with authors such as Yvette Christiansë, Saidiya Hartman, Anne Carson, Claudia Rankine, Hélène Cixous, Theresa Hak Kyung Cha, Michael Ondaatje, Trinh T. Minh-ha, John D’Agata, Annie Dillard, Gloria Anzaldúa, and so on.

DP requirements: 75% attendance and all written work to be handed in.

Assessment: First research presentation (5%); First hybrid essay (30%); Second research presentation (5%); Second hybrid essay (60%).

South African landscapes have always been contested. In the contemporary moment of global environmental crisis and deepening social inequality, it is critical that we build an interdisciplinary understanding of the histories, legacies and transformations playing out in particular places. Geography and allied disciplines offer many different ways of studying how the ecological and the cultural intertwine in shaping our landscapes. In this course, through foundational theoretical engagements and field-based activities, we explore some of the cross-cutting social, political, economic, ecological and biophysical dynamics playing out in the context of the rapidly changing Southern African region.

It does this through novels, films and other textual and visual representations of everyday urbanism, drawing on contemporary theory from the global South to help make sense of these discourses. Situated in the rapidly evolving field of Urban Studies, the course aims to open up conversations across disciplines about the cities we are in and the cities we desire. Students will be expected to read set texts, both fictional and theoretical, and watch set films, in preparation for classes which take the form of weekly, student-led seminars.

EGS5058F/S CRITICAL PERSPECTIVES ON THE BIO-ECONOMY

23 NQF credits at NQF level 9

Convener: Professor R Wynberg

Course entry requirements: Acceptance for Honours or Master's specialising in EGS.

Course outline:

Located at the interface of fast-changing genetic and information technologies, and the juncture of a range of social, environmental and ethical concerns, the so-called bio-economy has changed

fundamentally ways in which biodiversity is used, conserved and commercialised. Although often touted as a panacea for energy crises, livelihoods, environmental remediation and food security, critical questions have been raised about who stands to benefit, the involvement of local communities, and economic and political drivers behind the bio-economy "push". Using a political ecology framing, this interdisciplinary course aims to introduce key theories that situate the bio-economy and to deepen understandings about the nature of emerging debates. These range from contestations about genetically modified crops, and 'biopiracy' charges of patenting biodiversity and traditional knowledge, through to the potential of agroecology as an alternative agricultural future. The course aims to deepen critical thinking around these questions, and to inspire a scholarship that explores possibilities for socially just and environmentally sustainable approaches, with a particular focus on the Global South. The course involves both theory and practice, drawing on research mostly from Sub-Saharan Africa. Students will be expected to read set texts, to watch set videos, and to prepare seminars. The course includes a short fieldtrip.

DP requirements: At least 80% attendance and submission of all assignments

Assessment: 1 exam - 40%, 1 essay (4000-5000 words) - 30%, 1 seminar presentation - 15%, 1 critique (response to a particular article, policy or media piece) - 15%.

24 NQF credits at NQF level 8

Convener: Dr I Rijdsdijk

Course entry requirements: Acceptance for an honours programme.

Course outline:

This course examines several debates concerning the representation of the natural environment in narrative fiction and documentary film. Taking the ecocritical debate that has grown in scope and intensity in literary criticism since the early 1980s as a departure point, the course will investigate the value of this discourse and its applicability to films that either explicitly or implicitly use the natural environment as a key component of the film narrative. Equally important is the analysis of the films in terms of film language, and the extent to which film produces original representations of environmental debates that characterise the current age. In this second aspect of the course lies the history of the natural environment in film (its place in well-established and popular genres like the Western, for example), as well as the representation of people in relation to the nonhuman environment in environmental documentary. The course includes a practical exercise in which students will produce a visual artefact that applies the idea of the course to local situations.

Authors in, mostly, European cinema will serve as case studies, taking a cue from various scholars (e.g. Cook, Maule) that the film author is not only the most important symbol of European cinema's cultural tradition and commitment, but also a crucial part of Europe's efforts to develop its cinema within domestic and international film industries.

FAM4041S MEDIA AND THE PUBLIC DOMAIN

24 NQF credits at NQF level 8

Convener: Professor A Haupt

Course entry requirements: Acceptance for an honours programme.

Course outline:

The key point of departure for Media & the Public Domain is that free speech rights in a democracy can be undermined by two nemeses. On the one hand, too much state control of the media can stifle the free circulation of information and, thereby, impoverish the public domain. On the other hand, too much corporate control of the media can impede the unfettered flow of information and, thereby, limit citizens' ability to make informed decisions about the common good. This course pays particular attention to the ways in which corporate interests influence approaches to intellectual property and key changes in technology, often at the expense of the public interest. Media & the Public Domain explores debates about copyright, cultural appropriation and access to knowledge in relation to newer technologies like p2p platforms (e.g. Napster and Kazaa), social media platforms (Facebook, Twitter and YouTube) as well as the non-commercial sharing of cracked software, games, films and music. The specific focus of the course will be on the music and film industries' responses to what it terms "piracy" of its intellectual property in the digital age.

DP requirements: Class attendance and timeous completion of all assignments. A DP warning will be issued if students miss two seminars without satisfactory explanation (e.g. medical certificates). Students will be denied a DP certificate if they then miss a third seminar.

FAM5046S FILM AND ENVIRONMENT

24 NQF credits at NQF level 9

Convener: Dr I Rijdsdijk

Course entry requirements: Acceptance for a master's programme.

Course outline:

This course examines several debates concerning the representation of the natural environment in narrative fiction and documentary film. Taking the ecocritical debate that has grown in scope and intensity in literary criticism since the early 1980s as a departure point, the course will investigate the value of this discourse and its applicability to films that either explicitly or implicitly use the natural environment as a key component of the film narrative.

Equally important is the analysis of the films in terms of film language, and the extent to which film produces original representations of environmental debates that characterise the current age. In this second aspect of the course lies the history of the natural environment in film (its place in well-established and popular genres like the Western, for example), as well as the representation of people in relation to the nonhuman environment in environmental documentary. The course includes a practical exercise in which students will produce a visual artefact that applies the idea of the course to local situations.

The Centre for Curating the Archive, which includes the Lucy Lloyd Archive and Research Centre (LLAREC) and Katrine Harries Print Cabinet, has been established as a vehicle for the conservation

and creative use, through exhibition and publication, of both object, image and paper collections. It builds on UCT's dual institutional strength in its numerous and valuable research collections on which much critical research is based, and in its established, often innovative expertise in the area of presenting those collections.

The linked research, often revealed in the public domain, uses these collections to facilitate and enrich public engagement with curatorial practice. It also aims to open up novel combinations of the historically separated domains of the creative arts, and the truth-claiming discourses of history and the social and natural sciences.

In coupling the avowedly creative activity of curation with the seemingly objective site of archive the CCA signals its intention to draw attention to past and present processes of the making of archives and collections of all kinds and the creation of meanings that flowed, and yet flow, therefrom.

The CCA is engaged in several partnerships, notably through its Honours specialisation in Curatorship with Iziko Museums of South Africa. The work of the CCA is represented on its website and at www.cca.uct.ac.za

FIN4058FS PRACTICAL COMMUNICATION

24 NQF credits at NQF level 8

Convener: H Proud

Course entry requirements: Acceptance for an honours programme.

Course outline:

Curatorship demands the skill of writing clearly in different registers for different purposes; whether for press releases, exhibition labels, text panels, internal reports or academic essays for publication in books or catalogues. This course aims at developing students' capacities and awareness of the different approaches to writing demanded by professional curatorial work. Emphases will be on accuracy and objectivity, as well as the virtues of précis and creativity in the writing of engaging

texts aimed at visitors to museums and galleries. Apart from formal lectures, students will be taken on field visits to view current exhibitions and challenged to critically evaluate their effectiveness in terms of communication and design. While the course is mainly object-centred in its approach, a study of the role of text and image in relation to ‘conceptual’ curatorial approaches will also be encouraged. Intensive study of the associated texts and display tactics in a number of key exhibitions in art history will also be undertaken.

DP requirements: Attendance at all seminars and completion of all written work.

FIN4059F WORKING WITH COLLECTIONS

24 NQF credits at NQF level 8

Convener: TBA

Course entry requirements: Acceptance for an honours programme.

Course outline:

This course explores museum collections as resources for research, interpretation and exhibition. To be an effective curator of a collection requires a broad, holistic understanding of the collection, including its historical, social, aesthetic and scientific contexts. A curator also needs to acquire specialised knowledge to unlock the research and educational potential of the collection and make it accessible to broad audiences through exhibitions and public programmes. Iziko’s art and social history collections will be used as a basis for elucidating multiple approaches to the understanding and interpretation of collections. The focus of the course is interdisciplinary and outcomes include: ability to apply research methodology in interpreting museum objects, tracing provenance and significance of collections; understanding of the relationship between the tangible and intangible aspects of collections, and hands-on experience of working with museum collections. Museum and site visits provide the basis for critical engagement with collections and curators. The course also introduces students to the ethical considerations and challenges that are presented by different objects in museum collections.

The Centre, the only one of its kind in Africa, seeks to stimulate and promote the field of Jewish studies at the University, with a special focus on research into the South African Jewish community. Multidisciplinary in scope, the Centre encourages the participation of scholars from a range of fields at UCT and beyond.

The Centre serves as a coordinating unit in the university, using its resources to invite distinguished scholars to UCT, to initiate and sponsor research that includes largescale historical and sociological studies, and to strengthen the university's library holding of books, microfilms and archival sources. The Centre awards a limited number of undergraduate and graduate scholarships, as well as research grants.

The Centre organizes and hosts a regular roster of public lectures, symposia, and conferences. The latter includes an ongoing biennial conference series in partnership with the University of Southampton, University of Sydney, and Tulane University. It also has an active publications programme which brings out monographs and occasional papers.

HST4021H ADVANCED HISTORICAL METHODS AND APPROACHES

24 NQF credits at NQF level 8

Convener: Dr B Kar

Course entry requirements: Acceptance for an honours programme.

Course outline:

This seminar course, compulsory for all honours students in the Department of Historical Studies, invites students to engage some of the key conceptual and methodological issues concerning the nature of the historical discipline and its modes of writing and enquiry. It is organised around the notion of 'archives', which we understand in its many different registers, both as an institutionalised order of evidence and as a shorthand for an entire epistemological complex. Taught by a team of historians, anthropologists, literary critics and sociologists over eight intensive weeks at the beginning of the first semester, this course aims at providing students with both a critical understanding of conceptual issues and a hands-on experience of the so-called primary sources. We engage with governmental, oral, ethnographic, mnemonic, statistical, literary, visual, digital, material, sonic and somatic archives in this course, trying to introduce students to the emergent styles of historical enquiry and reflect on the complex relationship between the academic discipline and its several popular and public variants. In the second semester students build upon these discussions to write customised course essays.

DP requirements: Attendance at all seminars and completion of all written work.

Assessment: Five response papers (50%); class participation (15%); course essay (35%).

HST4034F ORAL HISTORY: METHOD, PRACTICE AND THEORY*(Not offered in 2021)*

24 NQF credits at NQF level 8

Convener: Associate Professor S Field**Course entry requirements:** Acceptance for an honours programme.**Course outline:**

This option offers hands-on training in oral history research and interviewing skills and is suitable for students from a wide range of disciplines. The central focus is on the relationship between a person telling oral stories and another eliciting and listening to those stories. There is no simple road map on how to do oral history interviewing. Rather, training in oral history methodology is a learning process of how to make a series of research decisions appropriate to specific social, cultural and historical contexts. Students will learn how to do interviews on audio and video, and will explore applied theoretical approaches to oral narratives and memories. We will also explore questions of copyright, ownership, audio-visual archiving and the ways in which oral history can contribute to development practice. All students will have to complete an oral history project which could become a pilot study for an honours, master's or doctoral dissertation.

DP requirements: Attendance at all seminars and completion of all written work.**Assessment:** Coursework (50%); research project (50%).

HST4040F A HISTORY OF VIOLENCE: PERSPECTIVES FROM THE GLOBAL SOUTH

24 NQF credits at NQF level 8

Convener: Dr A Sen**Course entry requirements:** Acceptance for an honours programme**Course outline:**

Can there be a history of violence if one takes structural violence as seriously as spectacular episodes? What does one do when one writes a history of violence? How can one begin to think of writing a history that can simultaneously approximate the experiential and the structural, the excess and the everydayness of violence? In critically reinterrogating the conventional distance between war and peace, this course will study different forms of violence that has produced the Global South in the form that we inhabit it. For us, the Global South is both a concrete political, geographical location as well as a conceptual analytic through which histories of violence shall be approached. In

HST4041F HISTORIES OF LAND AND LABOUR STRUGGLES IN SOUTH AFRICA

(Not offered in 2021)

24 NQF credits at NQF level 8

Convener: C Naicker

Course entry requirements: Acceptance for an honours programme

Course outline:

This course is designed to equip students to think beyond the narrow confines of South African nationalist historiographies of liberation. It focuses on the experiences and narratives of the working people who resisted, negotiated and, in some cases, successfully changed the oppressive system of racial capitalism in its different avatars of colonialism and apartheid. It offers a map of the history of labour struggles in the country in both unionised and extra-union forms. Critically reflecting on several key processes, structures and moments over the long twentieth century - from the creation of a racialized system of labour in the late nineteenth century to the present-day state of disarray in the labour movement and the new struggles for urban land and access to the city - this course introduces students to the many connections between the past and the present, the rural and the urban, and the formal and the informal sectors of economy. Students are encouraged to understand how this history offers an opportunity to think different trajectories of resistance and struggle, solidarity, negotiation and nationhood.

Convener: Dr M Mbali

Course entry requirements: Acceptance for an honours programme

Co-requisites: None

Course outline:

This course aims to deepen students' understanding of the changing social and cultural forms related to biomedicine, health and healing both in Africa and globally. The socially constructed nature of biomedicine and healing will be explored with reference to institutions, practices, policies, diverse ways of knowing and subjectivities around the body and health. The course will also analyze the intersections between the social and material aspects of health (such as political economies and bodily systems and processes). Epistemologies of biomedicine and health will be explored with reference to: diverse views of disease ontology; biomedical professionalisation and therapeutic diversity; and, histories of mental health. The politics of health will be examined in relation to epidemics, public health and health policy and activism. Patient-focused histories of medicine and healing will also be central to the course, particularly those of: women; gender non-conforming and same-sex practicing individuals and groups; and disabled and racially marginalized people. Finally, students will be asked to engage with ethical issues in writing histories of medicine such as ensuring patient confidentiality and obtaining informed consent, addressing stigma and discrimination in relation to certain diseases and understanding healing traditions as described by historical figures on their own terms.

HST4043S WRITING AND HISTORY

24 NQF credits at NQF level 8

Convener: Associate Professor S Jeppie**Course entry requirements:** Acceptance for an honours programme**Course outline:**

Historians take for granted that we have to use sources, most often traces from the past in the form of written texts. But what is the history of writing itself? What are the histories of writing in various parts of the world? What are the connections between the articulation of language/s and the surfaces upon which they were inscribed and then moved and mobilized for a multitude of purposes? And beyond this what kinds of readings and traditions of slow and close reader philology, interpretation emerged to make sense of these written texts? What kinds of writing supports have developed and how has the codex become the norm (or not)? Until recently the dominant way of telling this story has been to focus on the origins of writing in Mesopotamia and then to move on to the growth of writing systems, some attention to book before printing (but mainly after the print revolution), and ultimately the emergence of philology as a largely western enterprise. In this course we explore this tradition itself. However, this course is not concerned with origins as much with multiple centres and multiple traditions of inscription on a variety of supports (stone, bamboo, wood, paper). We look at numerous scripts and the styles of philological engagement with written works which have their own presuppositions. This interdisciplinary course will appeal to students who are interested in history in the longer-term, material histories, book history, and world history through objects and intellectual history. This course is formulated in the knowledge that in recent years there has been a rise of interest in manuscript studies and philology.

HST4044S MIGRANTS, DIASPORAS AND MINORITIES IN THE MODERN WORLD*(Not offered in 2021)*

24 NQF credits at NQF level 8

Convener: Associate Professor A Mendelsohn**Course entry requirements:** Acceptance for an honours programme**Course outline:**

This course explores the impact of modernity on the modern world through close examination of the experience of minority groups. This approach allows both for a clearer understanding of some of the key features of modernity, and for investigation of how minorities have formed and fared in different state formations at different moments in time. The course introduces students to the theoretical approaches and nomenclature developed in different disciplines to describe and categorize minorities, and interrogates the language and typologies used within academia and public discourse. Given the centrality of contingent and contextual factors in understanding the position of minorities in different societies, much of the course will explore case studies chosen to highlight the impact of place, politics, and change over time on the experience of minority groups. Seminar themes will include Minorities within Pre-Modernity; the nation and nationalism and the place of outsiders; Migration, Migrants and Race; Migrant minorities and the importance of historical context; Globalization, Transnationalism, Diaspora; Multiculturalism, Cosmopolitanism and Citizenship; Historicizing Pluralism, Multiculturalism, and Human Rights; and Challenges to Multiculturalism and Pluralism.

HST4056S THEMES IN EVERYDAY HISTORY

24 NQF credits at NQF level 8

Convener: Dr B Kar

Course entry requirements: Acceptance for an honours programme.

Course outline:

This course is aimed at both acquainting students with the growing historical literature across the world on daily experiences and unspectacular practices, and teaching them the skills of formulating original research questions. Each year this course focuses on an object or a practice or a sentiment usually considered too ordinary, too universal and too familiar to be adequately or excitingly historical, and gradually unpacks the various histories unevenly woven into it. Through a systematic investigation of the experiential contexts and daily praxis, the students are encouraged to think imaginatively and across the boundaries of disciplines. In pointing the students towards the emergent approaches and sites of new research, the course also attempts to train them in moving responsibly and creatively between big theoretical questions and specific, concrete histories. It is comprised of weekly two-hour seminars. In 2017 the course will be discussing the histories of sleep.

DP requirements: Attendance at all seminars and completion of all written work.

HST5014S TRAUMATIC TRACES: HISTORY, MEMORY AND BEYOND

24 NQF credits at NQF level 9

Convener: Associate Professor S Field

Course entry requirements: Acceptance for a master's programme.

Course outline:

This course traces the genealogy of the concept and theories of "trauma". It will critique the clinical, popular, intellectual and political uses of the term from the late 19th century to the present. The course challenges students to be self-reflexive, critical thinkers, with the capacity to debate the "Trauma Question" and its implications for the emergence of memory studies, especially in post-conflict societies. We will also discuss the use of "trauma theories" in relation to debates around reconciliation, healing and reparations; and post-colonial critiques of trauma theories as Eurocentric and lacking in their account of race and cultural differences. Moreover, the "transmission of trauma" in family histories and the notion post-memory will be discussed. Finally, we discuss the "affect turn" and the historicising of emotions and subjectivities as a move to resolve the conceptual problems posed by trauma theories. The course is open to MA and PhD students from across the Faculty, especially those who have a dedicated interest in the histories, memories and theories of violence and its legacies.

DP requirements: Attend all seminars and complete all forms of course evaluation.

HST5056S THEMES IN EVERYDAY HISTORY

24 NQF credits at NQF level 9

Convener: Dr B Kar

Course entry requirements: Acceptance for a master's programme.

Course outline:

This course is aimed at both making the students acquainted with the growing historical literature across the world on the daily experiences and unspectacular practices, and teaching them the skills of formulating original research questions. Each year this course focuses on an object or a practice or a sentiment usually considered too ordinary, too universal and too familiar to be adequately or excitingly historical, and gradually unpacks the various histories unevenly woven into it. Through a systematic investigation of the experiential contexts and daily praxis, the students are encouraged to think imaginatively and across the boundaries of disciplines. In pointing the students towards the emergent approaches and sites of new research, the course also attempts to train them in moving responsibly and creatively between big theoretical questions and specific, concrete histories.

302 HISTORICAL STUDIES

DP requirements: Attendance at all seminars and completion of all written work

(Not offered in 2021)

24 NQF credits at NQF level 9

Convener: Dr M Mulaudzi

Course entry requirements: Acceptance for a master's programme.

Course outline:

This course explores the history and legacies of ideas and practices central to indirect rule and ongoing attempts to reform them in contemporary South Africa. Focused on South Africa, but also drawing from broader and comparative literature, the course examines how chieftainship, tribe and the customary emerged as defining features of natives and how they were experienced and shaped by the action of men, women, young and old over time. How have these ideas continued to shape identities and discourses in the present?

DP requirements: Attendance at all seminars and completion of all written work

Assessment: Coursework (15%), minor essay (25%), and research project (60%).

HST5060FS HISTORY IN PUBLIC LIFE

24 NQF credits at NQF level 9

Convener: Associate Professor A Mendelsohn

Course entry requirements: Acceptance for a master's programme.

Course outline:

History is thickly imbricated in our everyday lives. This course examines the multiple ways in which history is produced and circulates in public life. It does so by exploring how history manifests in different media, how histories of various kinds cross between distinct fields of public practice, and how they gain and lose appeal as their form and potency changes. The course will involve critical engagement with the idea of the production of history, as well as with theories of memory, publics, publicness, publicity, counter publics, the social imaginary of the public sphere and the role it is understood to play in a democracy, and the historicization of these concept qua concepts. Students will develop a theoretical understanding of how historical materials are made, assimilate into and mutate within the public imagination, and circulate in public life.

DP requirements: Attendance at all seminars and completion of all written work.

Assessment: Coursework (15%), Minor Essay (25%), and Research Project (60%).

HST5061H ADVANCED HISTORICAL METHODS AND APPROACHES

24 NQF credits at NQF level 9

Convener: Dr B Kar

Course entry requirements: Acceptance for a master's programme.

Course outline:

This course invites students to engage some of the key conceptual and methodological issues concerning the nature of the historical discipline and its modes of writing and enquiry. The course is organised around the notion of 'archives', which we understand in its many different registers, both as an institutionalised order of evidence and as a shorthand for an entire epistemological complex. Taught by a team of historians, anthropologists, literary critics and sociologists, this course aims at providing the students with both a critical understanding of conceptual issues and a hands-on experience of the so-called primary sources. We engage with governmental, oral, ethnographic, mnemonic, statistical, literary, visual, digital, material, sonic and somatic archives in this course, trying to introduce students to the emergent styles of historical enquiry and reflect on the complex relationship between the academic discipline and its several popular and public variants.

DP requirements: Attendance at all seminars and completion of all written work.

Assessment: Coursework (15%), Minor Essay (25%), and Research Project (60%).

SLL4060F CONTEMPORARY FRENCH & FRANCOPHONE LITERATURES I

24 NQF credits at NQF level 8

Convener: Associate Professor M Arnold**Course entry requirements:** Acceptance for an honours programme.**Course outline:**

The course focuses on processes of intertextuality and intermediality by looking at forms of narrative, stylistic, aesthetic & generic cross-pollination in selected works of contemporary French and Francophone authors, including prose fiction and visual narratives (bande-dessinée). Indeed, in the vibrant and expanding field of graphic literatures since the 1990s, the relationship with 'traditional' literature is increasingly diversifying, evolving from conventional modes of illustration and adaptation to more complex processes of inspiration and transposition. Based on theories of literary and visual representation, as well as concepts of cultural and adaptation studies, this course

320 LANGUAGES AND LITERATURES, SCHOOL OF

will discuss the modalities and significations at work in the creative relation - and/or 'transfer' - between literature and graphic literature. What happens when a canonical short story is 'updated' into a modern graphic novel? When an author 'translates' his graphic narrative into a novel? How are regimes of representation and "language" affected in these processes? Does the discursive "between the lines" correspond to the visual "off-panel"? Or what potentials/limits can be observed in graphic figuration of a literary metaphor? The critical in-depth study of several primary works (e.g. Flaubert, Claudel, Alagbé, Larcenet, Deprez, Sfar) will not only reveal the various discursive and representational processes at stake in these inter-textual/medial relations between word and image. It will also interrogate the political and ethical implications emerging in the space of transition between readability and visibility. Eventually, it will discuss to what extent these 'adaptations', 'transfers' or 'translations' contribute to a productive reassessment of traditional hierarchies between artistic forms of expression.

DP requirements: At least 80% attendance required. Submission of all written work.

Assessment: Two essays (50% each).

SLL4061S CONTEMPORARY FRENCH & FRANCOPHONE LITERATURES II

24 NQF credits at NQF level 8

Convener: Associate Professor M Arnold

Course entry requirements: Acceptance for an honours programme.

Course outline:

The course resonates with - and extends - the critical discussion initiated in the first semester by furthering the analysis of processes of intertextuality and intermediality in contemporary French and Francophone (graphic) literatures. Informed by additional theoretical and conceptual framework and focused on other authors/works than those previously analysed (e.g. Le Clézio, Saint-Exupéry, Baudoin, Sfar, Pratt), the discussion will deepen the understanding of the material and symbolic processes, the creative tensions and the interpretational scope that can be observed in the complex intersectionality between textual and visual narratives. The in-depth analysis of various representational modes and regimes (narrativity, figuration, discursivity, iconicity) at work in these intersectional/translational processes will also integrate the notion of hybridity and address the intertextual use of other modes of visual representation (e.g. photography, painting, and moving images). Contemporary French and Francophones literatures will eventually appear as part of a multifaceted "continuum" of creative expression.

DP requirements: At least 80% attendance required. Submission of all written work.

Assessment: Two essays (50% each).

Course entry requirements: Students must be registered for BUS4006W (i.e. students must have been accepted into the 4th year of Organisational Psychology.)

Course outline:

The aim of this component is to introduce students to the full cycle of a research project, from formulating research questions to producing a research paper publishable in a journal in the field of Organisational Psychology. Students who complete this component also will have a fundamental understanding of the ethics involved in the research process. Staff members conceptualise substantial research projects and act as supervisors who guide students through the research cycle. Students form small research teams and are assigned to a supervisor. Regular meetings take place between supervisors and research teams. Deadlines for completion are set and have to be met at the different stages of the research process. At the end of the process, research teams present their projects as a poster or at a colloquium.

DP requirements: Students must complete all assessments.

Assessment: Each chapter of the research project has an assessment weighting (literature review, method, results and discussion). Together with the final research report submission these draft submissions make up the mark for BUS4030H. Students are required to obtain at least 50% for the research report. Students are required to pass both the coursework (BUS4006W) and the research (BUS4030H) components in order to be awarded the degree.

MUZ4054FS SELECTED MUSICOLOGICAL TOPICS IN MUSIC TECHNOLOGY

24 NQF credits at NQF level 8

Convener: T Herbst

Course entry requirements: Acceptance for BMus honours or equivalent.

Course outline:

Building on the pivotal role of over a century's dialogue between music and technology in the creation, dissemination and appreciation of sound and music, the course considers components of what has come to be called Music Technology and the reasons no single, homogenous definition of Music Technology has emerged. In considering how distinctive but vibrant industries and research fields, ranging from audio engineering to film-sound practices, have come to be seen as distinct fields or specialisations, and are served by their own distinctive programmes, the course mimics that trend whilst building on practical skills and theoretical knowledge introduced in undergraduate and honours level Music Technology courses. In order to be able proficiently to merge research and vocational skills in sound-related occupations that demand critical thinking along with practical abilities, the course guides and encourages learners to:

- (i) define and critically investigate key concepts and their definitions;
- (ii) study the impact of technology-driven aesthetics on diverse musical composition styles;
- (iii) contribute to the scholarly debates linking musicology and technology, and
- (iv) become proficient at using soft- and hardware tools.

DP requirements: 100% attendance and submission of all assignments.

Assessment: Four written assignments 25% each = 100%.

Convener: Associate Professor S Bruinders**Course entry requirements:** A 70% Pass in MUZ4371H Music Technology IV or an equivalent course from another institution. Acceptance into a MMus Programme.**Course outline:**

Building on the pivotal role of over a century's dialogue between music and technology in the creation, dissemination and appreciation of sound and music, the course considers components of what has come to be called Music Technology and the reasons no single, homogenous definition of Music Technology has emerged. In considering how distinctive but vibrant industries and research fields, ranging from audio engineering to film-sound practices, have come to be seen as distinct fields or specialisations, and are served by their own distinctive programmes, the course mimics that trend whilst building on practical skills and theoretical knowledge introduced in undergraduate and honours level Music Technology courses. In order to be able proficiently to merge research and vocational skills in sound-related occupations that demand critical thinking along with practical abilities, the course guides and encourages learners to:

- i. define and critically investigate key concepts and their definitions;
- ii. study the impact of technology-driven aesthetics on diverse musical composition styles;
- iii. contribute to the scholarly debates linking musicology and technology, and
- iv. become proficient at using soft- and hardware tools.

Second, it will look at alternative presentations of familiar systems of logic. And third, it will look at proofs of consistency and completeness for propositional and predicate logic. That is, the course presents the meta-theory for these logics. Finally the course sketches Godel's limitative results for logical systems rich enough to express arithmetic. Throughout it keeps an eye on relevant issues in the philosophy of logic.

DP requirements: Satisfactory attendance at seminars and submission of written work on time.

Assessment: Two tests (20% each) and one final examination (60%).

PHI4016FS TRUTH AND MEANING

24 NQF credits at NQF level 8

Convener: Professor B Weiss**Course entry requirements:** Acceptance for an honours programme and requisite philosophical background relevant to this course. Admission is at the discretion of the course convener.**Course outline:**

The course is an investigation of the concepts of truth and linguistic meaning through recent work in the philosophy of language. A central question is whether truth can be recruited in an account of linguistic meaning, that is, whether we can, in general, think of the meaning of a declarative sentence as consisting in the condition that must obtain for it to be true. Merits of the proposal are canvassed but so too are reasons for abandoning such accounts in favour of those which take conditions of use as determinants of meaning. Various use-conditional accounts are examined. The implications of such discussions for issues to do with semantic realism is a persistent theme.

DP requirements: Satisfactory attendance at seminars and submission of written work on time.**Assessment:** Oral presentations and participation in weekly seminars (10%) three essays of approximately 3,000 words each (30% each).

Convener: Dr G Fried

Course entry requirements: Acceptance for an honours programme and requisite philosophical background relevant to this course. Admission is at the discretion of the course convener.

Course outline:

How should we make decisions? This problem confronts groups of people who must find a procedure that allows for dissent while still reaching some fair and definite choice. We will consider and evaluate some of these theories, and apply them to cases of social, political, and individual decision-making.

Course outline:

This course critically examines a cluster of topics from the history of philosophy. Topics will vary from year to year. If the course focuses on the work of one philosopher (e.g. Plato, St. Augustine, Descartes, Spinoza, Kant, Kierkegaard, Heidegger, Sartre), competing interpretations of several key writings by this figure will be studied as well as those writings themselves. The course might alternatively focus on a particular school of thought or tradition rather than just one past philosopher: e.g. Ancient Greek approaches to Teleology; Scholastic Metaphysics; Early Modern theories of Legitimacy and the State; the Idealism of Kant, Fichte, Schelling and Hegel; French Existentialist theories of Freedom; Critical Theory and the development of Western Marxism. In this case, as well as assessing the different arguments and views studied, the course will examine how

philosophers from different times and places have (mis)interpreted and reacted to one another's work.

DP requirements: Satisfactory attendance at seminars and submission of written work on time.

Assessment: Oral presentations and participation in weekly seminars (10%) three essays of approximately 3,000 words each (30% each).

POL5037S POST-CONFLICT JUSTICE IN AFRICA

24 NQF credits at NQF level 9

Convener: Dr H Scanlon

Course entry requirements: Admission to master's in Justice & Transformation or International Relations.

Course outline:

This course explores the field of post conflict justice in Africa with emphasis on attempts to address the legacies of past injustices. This course will examine international, national and local approaches to post-conflict justice in African contexts and interrogate some of the normative and political debates raised by transitional justice processes. More than any other continent, Africa has been the site of transitional justice experimentation and thus it is important to analyse cases in which processes have been initiated in an effort to grapple with atrocities. In particular the course will attempt to assess the strengths and weaknesses of recent transitional justice processes in advancing post-conflict justice on the continent. The first part of the course examines the notion of post-conflict justice in relation to various concerns on the continent including socio-economic justice, land restitution, displacement, gender-justice and natural resource exploitation. It will also survey various models of post-conflict justice including truth seeking, criminal justice and reparations in contexts as diverse as Liberia, Kenya and Tunisia. Part Three will examine some of the questions that have emerged over the efficacy of transitional justice interventions and mechanisms on the continent.

DP requirements: Submission of all written coursework and satisfactory attendance of seminars.

Assessment: Two response papers (30%) Two essays (50%), Presentations (20%)

POL5040F COMPARATIVE TRANSITIONAL JUSTICE

24 NQF credits at NQF level 9

Convener: Dr H Scanlon

Course entry requirements: Admission to a master's programme. Relevant background studies in the areas of human rights, conflict and conflict-resolution, social and political theory.

Course outline:

This course will explore the field of transitional justice in a comparative and critical perspective. In recent decades the development of peace-building initiatives to resolve conflict and address human rights violations have been mirrored by the expansion of various models of transitional justice. These encompass a range of judicial and non-judicial approaches adopted by post-conflict and post-authoritarian societies to address human rights abuses of the past. The course is intended to confront some of the central moral and political debates around transitional justice such as the relationships between peace and justice, accountability and reconciliation. The first part of the course examines the notion of 'transitional justice' in relation to various theories of justice including restorative, retributive, reparative and social justice. Part Two will examine the "pillars" of transitional justice: truth seeking, criminal justice, reparations and institutional reform and will consider the relevance of these processes in post-conflict transformation. Part Three will examine some of the cross-cutting concerns of transitional justice, including the role of children and gender issues.

DP requirements: Submission of all written coursework and satisfactory attendance of seminars.

Assessment: Each student will be required to complete three response papers (30%), one seminar presentation (20%) and a research essay of approx. 6000 words (50%).

Convener: Associate Professor Z Jolobe

Course entry requirements: Admission to a master's programme, and by permission of the course convener.

Mediation is one of the most common methods of dealing with and resolving social and political conflict. Irrespective of the society, conflict, or type of organisation, and location in time, mediation has always been a method of managing conflict and practice of settling disputes through third parties. Since the field of mediation is so extensive, this graduate course is limited to the concept of international mediation (i.e. mediation by international actors) in the context of armed conflict, between representatives of the main conflicting actors, and dealing with conflicting issues or incompatibilities. It examines the theory about, research on, and practice of international mediation, and its efficacy and consequences for the peace-making process. It will deal with questions of strategy in mediation, and how to conceptualise success.

DP requirements: Submission of all written coursework and satisfactory attendance of seminars.

Assessment: A minimum of five assignments of 2,500 words each (50%); one course paper of 6,000-8,000 words (50%).

PBL5623F GOVERNING UNDER THE CONSTITUTION: LAW AND PRACTICE

Higher postgraduate course, first semester, one seminar per week.

30 NQF credits at NQF level 9

Convener: Professor P de Vos

Course entry requirements: See Rules for LLM and MPhil Degrees.

Course outline:

South Africa's new Constitution sets out the rights of citizens and establishes a framework for democratic governance and local government. In developing these institutions, along with a multi-level system comprising national, provincial and local government, South Africa's constitutional designers were responding to the needs and aspirations of contemporary South Africa. But they, in light of this comparative experience, also had before them a rich array of alternatives from other countries. The central purpose of this course is to seek to understand the new framework for governance in South Africa.

Constitutions are complex mixtures of broad principles, and specific rules and institutions. Accordingly, we will be interested in two levels of analysis: first, what broad principles and values underpin the institutional framework, and how are these expressed in the institutions themselves? And, second, more practically, how do these institutions, and the interactions among them, actually work in shaping the process of policy-making and implementation? Thus, we are interested in the values associated with democracy – participation, accountability, consensus, etc; and in those

associated with what might be called ‘effective governance’, in light of the policy challenges which face the country.

The course will thus also provide you with an understanding of how government works with a focus on (i) the relationship between the executive and the legislature and what that means for lawyers and (ii) the relationship between national, provincial and local government. Our study of multi-level government and the powers of each sphere of framework necessary for policy making and litigation in this area.

DP requirements: Satisfactory attendance at and participation in seminars and completion of written assignments.

PBL5815S PUNISHMENT AND HUMAN RIGHTS

Higher postgraduate course, second semester.

30 NQF credits at NQF level 9

Convener: K Phelps

Course entry requirements: See Rules for LLM and MPhil Degrees.

Course outline:

This course aims to provide students with a sound theoretical understanding both of the justifications of punishment and human rights constraints in the context of sentencing. Students then apply this understanding to practical examples in order to assess how/ if the theory translates into practice. In so doing it is hoped to transcend a common-sense approach to sentencing and punishment and to build firm opinions/ approaches based on acquired knowledge.

The course is divided into four broad sections. The first section introduces the class to the various philosophical justifications that have historically been provided for sentencing. A brief introduction is also provided to the relationship between human rights law and penal sanctions. The second

section explores in detail the current justifications for punishment/ purposes of the correctional system. In so doing, issues such as deterrence, incapacitation, rehabilitation, restoration, retribution and just deserts will be explored. Section three deals with constraints placed on sentencing in South Africa by human rights norms contained in the Bill of Rights and international law. The final section of the course places the preceding theoretical/philosophical discussions into a practical context by dealing with current and future sentencing practice in South Africa, modes of implementing punishment (e.g. prison) and special stakeholders in punishment.

DP requirements: 80% attendance at, and satisfactory participation in, seminars and the completion of the research papers and oral presentation.

Assessment: The presentation of at least one seminar and one research paper. Marks given for the seminars and research paper comprise the entire mark for the course.

Through its projects, the CCI provides a place for researchers to share ideas and develop insights on Islam and Muslim societies. It creates a space where students are inspired and supported to embark upon a systematic study and reflection on issues of great interest to scholars and the general public. Scholarships at graduate level are available on a regular basis.

The CCI has both regular and occasional publications. *The Journal for Islamic Studies* is an annual peer-reviewed publication accredited by the Department of Education (South Africa), and ARIA - *Annual Review of Islam in Africa* provides a forum for young and established researchers to publish their findings in an accessible format.

Professional registration and conduct

Practice in the field of Social Work is regulated by the South African Council for Social Service Professions, with which all Social Workers must register. The Council lays down the minimum standards of both academic and practical training requisite for professional registration, and the Department of Social Development provides training according to these standards. The University offered a 3-year BSocSc degree in Social Work for students who first registered before 2007. These students were required to complete an appropriate Honours degree offered by the Department of Social Development in order to obtain professional registration with the South African Council for Social Service Professions. From 2007, students registered for a 4-year Bachelor of Social Work (BSW) degree in order to obtain professional registration with the South African Council for Social Service Professions.

Students registered for the professional degrees in social work are required by statute to register from their second year of study with the South African Council for Social Service Professions as a student social worker. As such they are bound by the Council's professional code of conduct. Students who do not adhere to this code of conduct may be required to terminate their registration in the Faculty. Should a student in the course of his/her studies or who qualifies for the award of the degree that allows for professional registration with the said Council be deemed unfit to practise as a social worker following a professional assessment, the Dean will report the outcome of such professional assessment to the Council and inform the student accordingly.

Course Outlines:

Please note that where the same course is offered for both the honours (HEQSF level 8, 4000 level) and masters (HEQSF level 9, 5000 level) degrees, students must register for the course appropriate to their current qualification level. Students who have completed the 4000-level version of a course are excluded from enrolling on the 5000-level version of the same course and vice versa.

The Faculty reserves the right to cancel course/s if there is insufficient student interest. Confirmation of whether the course/s will be offered will be published on Vula, Departmental and Postgraduate Faculty Notice-boards by the first Friday of the semester in which the course begins.

SWK5052FS INTERSECTIONS OF VULNERABILITIES OVER THE LIFE

COURSE

24 NQF credits at NQF level 9

Convener: Professor L Artz

Course entry requirements: Acceptance to a master's degree in a relevant field.

Course outline:

There is a clear shift in the international literature with regards to the drivers, antecedents and enabling contexts in which violence occurs. Researchers, social work practitioners, and to some extent, policymakers, are abandoning one-dimensional cause-and-effect theories and approaches and are increasingly adopting more multidimensional methods towards violence 'prevention' and violence 'intervention' programmes. The thrust of this progressive work is the development of theories and approaches that capture a more holistic, life cycle experience that considers the intersection of historical, social, economic and cultural factors which influence violence, victimisation, and vulnerabilities to both, over the lifetime. This course will explore these intersecting vulnerabilities over the life course, delineating the life course into particular age cohorts: children aged 0–12, adolescents aged 13–18, adults aged 19–59 and older adults aged 60+. The course advances a social development framework that views the intersections and co-occurrences of violence across the lifetime as the centrepiece of analysis.

DP requirements: Attend all lectures, hand in all assignments and participate in group discussions.

Assessment: Two assignments weighted at 25 grade points each and one exam weighted at 50 grade points totalling 100.

SOC4004S POLITICAL SOCIOLOGY

12 NQF credits at NQF level 8

Convener: Dr R Chaturvedi**Course entry requirements:** Acceptance for an honours programme.**Course outline:**

This course revolves around the relationship between state and society. It proceeds from the understanding that state and society are not two radically separate realms but fields of action and meaning that continually make and unmake one another. Thus on the one hand this course will examine the nature of ideas, and the network of institutions and practices that make up the modern nation state especially in postcolonial Africa; on the other hand it will study the formation of socially embedded agents of power who have not only lived out their own aspirations of self-determination, democracy and justice but also revolted against nationalist and neo-liberal concordances. Popular protests in Africa and other parts in the global south will be our special focus of attention here. The ways in which state and society have mutually constituted one another will be a key concern. In order to understand that, the course will draw on classical and contemporary theories as well as sociologically grounded ethnographies of political life particularly in the global south.

DP requirements: Attendance of all seminars and submission of all written assignments.**Assessment:** Class participation, presentation and short report (35%); long essay of up to 7,000 words (65%).

Particular attention will therefore be on the role of local government in development. A comparative perspective will be adopted with examples from other countries in both the South (e.g. India) and the North (U.S.A).

DP requirements: Attendance of all seminars and submission of all written assignments.**Assessment:** Paper presentations (30%); long essay (70%).

SOC5056S POLITICAL SOCIOLOGY

12 NQF credits at NQF level 9

Convener: Dr R Chaturvedi

Course entry requirements: Acceptance for a master's programme

Course outline:

This course revolves around the relationship between state and society. It proceeds from the understanding that state and society are not two radically separate realms but fields of action and meaning that continually make and unmake one another. Thus on the one hand this course will examine the nature of ideas, and the network of institutions and practices that make up the modern nation state especially in postcolonial Africa; on the other hand it will study the formation of socially embedded agents of power who have not only lived out their own aspirations of self-determination, democracy and justice but also revolted against nationalist and neo-liberal concordances. Popular protests in Africa and other parts in the global south will be our special focus of attention here. The ways in which state and society have mutually constituted one another will be a key concern. In order to understand that, the course will draw on classical and contemporary theories as well as sociologically grounded ethnographies of political life particularly in the global south.

DP requirements: Attendance of all seminars and submission of all written assignments.

Assessment: Class attendance and participation (10%); presentation (25%); 6000-words final essay (65%). Masters students should draw on at least 2 whole books and 4 articles for their final paper.

The Institute for Creative Arts (ICA) is an interdisciplinary institute in the University of Cape Town's Humanities Faculty – formerly the Gordon Institute for Performing and Creative Arts (GIPCA). The ICA facilitates research projects in the creative and performing arts that disrupt boundaries, while underscoring creative education and practice across discipline and faculty. Interdisciplinarity, Live Art and Public Spheres are key themes of the Institute, and projects are imbued with innovation, collaboration and a dialogue with urbanism and community.

Institute for the Humanities in Africa (HUMA)

Located in the Faculties of Humanities and Law, HUMA takes a broad view of the humanities, encompassing the social sciences and law.

Director:

TBA

Staff:

TBA

The humanities have long been vital to the creative and critical energies of societies in the throes of profound change. HUMA – the Institute for the Humanities in Africa – is a new initiative at UCT, intended to create a space of dynamic interdisciplinary community for scholars and students in the humanities at large. Fostering top-end academic research, HUMA seeks also to draw on that work to nurture critical public debate, promoting UCT’s vision of itself as a civic university contributing to the making of democratic citizenship. HUMA’s intellectual agenda is driven by two inclusive research themes ‘on being human’, and ‘circuits of consumption’, which inform and structure three primary objectives:

- to conduct and promote research that is historically grounded and theoretically engaged, with an eye to the ‘big’ theoretical and ethical questions that anchor South African issues in wider fields of experience and analysis. The combination of intellectual focus and breadth provided by HUMA’s research themes is intended to open up spaces for dialogue, collaboration and argument across disparate theoretical, epistemological and methodological traditions, and in ways that help examine the project of interdisciplinary work.
- to nurture the expertise and enthusiasm of graduate students interested in an academic career, through a combination of intensive and supportive doctoral supervision, and a broader programme of seminars, symposia and workshops that help develop the intellectual versatility and confidence which an academic career requires. A doctoral fellowship programme is central to the pursuit of this objective.
- to bring scholars and graduate students into conversation with interested publics, around issues of shared and topical concern. HUMA hopes to promote what public intellectuals in the humanities do best, which is to de-familiarise and unsettle established ways of seeing, think creatively about pressing social and political questions, and keep the imagination of alternative futures alive.

This mission is embedded in a particular understanding of our location in Africa. Africa is a landmass with a deep and complex history of connection and disconnection amongst its many inhabitants; being African means being party to formative relationships of connection and disconnection that shape the ways we think and act. Our scholarship and debate, then, will be positioned in Africa, even if the focus of our deliberations is not limited to the continent.
