Guide to the usage of this Handbook

The following is a general overview of the structure of this Handbook for the guidance of users. The contents are organised in a number of different sections (see below) each of which has a particular focus. The sections are interlinked by cross-references where relevant.

- (a) *General Information*: This section lists the faculty staff, terms for the current year, lecture periods, a key (guide) to the course code system and definitions of terminology used. It includes information on the professional status and recognition of the Faculty's degrees, its links with professional bodies and the list of qualifications offered.
- (b) *Faculty Rules for Postgraduate Qualifications*: This section covers the Faculty rules for each of the various programmes. These rules should be read in conjunction with the general University rules in the General Rules and Policies Handbook (Handbook 3). Students are expected to acquaint themselves with the rules in both Handbooks, to check annually whether the rules or curriculum requirements have changed since the last edition and to take particular note of the following:
 - rules relating to registration and examinations;
 - rules relating to changes of curriculum;
 - rules relating to leave of absence;
 - rules on Academic Conduct;
 - rules concerning dishonest conduct and plagiarism.

Detailed information on the undergraduate entrance requirements can be found in the University Prospectus.

The PhD Degree rules are published in Handbook 3, General Rules and Policies.

This section includes a full list of postgraduate qualifications and specialisations offered by the Faculty and the curriculum for each programme (list of required courses) is set out in detail.

- (c) *Departments and Centres in the Faculty of Humanities and in other Faculties offering Postgraduate Degree and Diploma Courses*: This section contains entries for each department in the Faculty listing members of staff and the research entities, if any.. The full list and descriptions of courses offered are laid out in alpha-numeric order (i.e. based on the course code prefix). The courses offered by other faculties which are more commonly taken by students in the Faculty of Commerce and Law are also listed and described.
- (d) *Centres/Institutes in the Faculty*: These are entries for the principal Faculty entities/units which do not fall directly under academic departments e.g. the Institute for Humanities in Africa.
- (e) *Additional information*: This section lists the fellows, distinguished professors and teachers in the faculty. It also includes lists of the various prizes and scholarships awarded on academic merit awarded by departments.

This is not a comprehensive list, but includes those teaching courses most frequently taken by students in this Faculty. In cases where a code is not understood, the department should be identified from the list, and then the departmental entry in this Handbook, or the Department itself, should be consulted.

Structure of Course Codes

Every course in this Handbook has a course name and a course code (or catalogue number). The code structure is uniform and it gives important information about the course. Each code has eight characters, as follows: **AAA1nnnS**, where

- AAA** is a 3 alpha-character group identifying the department
- 1** is a number representing the year of study in which the course is usually taken
- Nnn** is a 3 character number that identifies the course uniquely
- S** is a single alpha-character suffix, giving information about the course

Suffixes which are most frequently used in the Faculty are:

- F** First semester course
- S** Second semester course
- W** Whole-year course
- H** Half-course taught throughout the year
- Z** Non-standard period

The following examples show how the codes work:

ELL4061F Literature and Language Studies

- ELL designates a course offered by the Department of English Language & Literature
- 4 designates an NQF level 8 course
- 013 an assigned number that serves to distinguish this course from other English courses
- F designates a first semester course

POL5002S Conflict in World Politics

- POL designates a course offered by the Department of Political Studies
- 5 designates an NQF level 9 course
- 035 an assigned number that serves to distinguish this course from other Political Studies courses
- S designates a second semester course

EDN6015F/S Advanced Educational Research Design

This designates that the course is offered in the first semester and again in the second semester.

Definitions of terms used in this handbook

Concession: Formal Senate approval exempting a student from complying with a required rule.

Co-requisite: A subject or course for which a student must be registered concurrently with (at the same time as) another course.

Pre-requisite: A subject or course that a student must have completed in order to gain admission to another (usually a more senior) course.

Curriculum: Prescribed course of study for a degree or diploma.

DP (Due Performance) requirement: Required minimum level of performance during the semester or year to qualify a student to do an examination in a particular course or module.

Exemption: Exemption from a course means that the student need not register for this course since he/she has studied a sufficiently similar course before. He/she is granted credit for the course studied before.

Continuous assessment: Evaluation of a student's performance (by means of written, oral or practical work) during the year, before the final examination in a particular course.

NQF credits, HEQSF qualification levels and HEQSF course levels:

All South African tertiary institutions are required to align their qualifications with the prescriptions of the national Higher Education Qualifications Sub-Framework. Each qualification has an exit level and is required to have a minimum number of HEQSF credits at that level. One credit equals 10 notional hours of learning.

The HEQSF requires the following credits per qualification:

- Bachelor's degree of four years (exit level 8): Minimum of 480 credits. Minimum credits at level 7 (i.e. third year level): 120; minimum credits at level 8 (fourth year level and above): 96.
- Bachelor Honours degree (exit level 8): Minimum total credits: 120, all at level 8 or above.
- Postgraduate Diploma (exit level 8): Minimum total credits: 120, minimum credits at level 8: 120.
- Master's degree (exit level 9): Minimum total credits: 180. Minimum credits at level 9: 120; maximum credits at level 8: 60. (A full dissertation master's will be 180 credits at level 9).
- Doctoral degree (exit level 10): Minimum total credits: 360 at level 10.

Programme, qualification and specialisation: A programme is a purposeful and structured set of learning experiences that leads to a qualification. Within a qualification (e.g. Master of Social Science) there may be various streams (for example a Sociology or Justice and Transformation specialisation in the MSocSc). In some cases there is a single programme within a qualification.

Specialisations: Within a postgraduate programme there may be several "specialisations," each of which has its own plan code.

Named qualification vs. specialisations in a "generic" qualification: Special application must be made to the Higher Education Qualifications Council to use the full name of a programme, e.g. Master of Arts in Clinical Psychology as opposed to Master of Arts with a specialisation in Creative Writing.

Programme/course convener: Academic staff member in charge of offering the degree or diploma programme or a course within the degree or diploma programme.

Professional registration

Psychology

To become a Psychologist in one of the recognised areas of Psychology, namely Clinical, Counselling, Educational, Organisational and Research Psychology, a student must complete a recognised Master's degree in Psychology and an appropriate practicum at a recognised training institution. The duration of a practicum is 12 months. Persons registered from 1 January 2005 in addition will have to write an examination set by the Professional Board for Psychology.

The Department of Psychology at the University of Cape Town provides training leading towards registration in Clinical Psychology. The School of Management Studies in the Faculty of Commerce provides training leading towards registration in the fields of Organisational Psychology.

The MA in Neuropsychology is considered a qualification for those interested in this particular field of psychology. The qualification does not lead to professional registration in this category of psychology and graduates are currently not eligible for such registration with the Health Professions Council of South Africa (HPCSA).

Social Work

Practice in the field of Social Work is regulated by the Council for Social Service Professions, with which all Social Workers must register. The Council lays down the minimum standards of both academic and practical training requisite for professional registration, and the Department of Social Development provides training in terms of these standards.

Under current legislation, the minimum requirement for professional registration with the Council is a 4-year BSW degree. Students registered for the BSW degree are required to register as student social workers from the second year of study.

The South African Council for Social Service Professions will accept the UCT 3-year BSocSc(SW) degree plus an Honours degree offered by the Department of Social Development as equivalent to the BSocSc(SW) 4-year degree for registration as a Social Worker.

NOTE: Those students who registered prior to 1988 and completed the BSocSc (B curriculum) degree must be in possession of the BSocSc(SW) Honours degree or the Advanced Diploma in Social Work to qualify for professional registration with the Council for Social Service Professions.

Curricula leading to Advanced Certificates

Advanced Certificate in Education (ACE) (120-130 NQF credits)

Programme Leader: Dr K Angier

The Advanced Certificate in Education is a one-year qualification usually offered part-time over a two-year period. ACEs are offered in either Adult Education or Continuing Professional Teacher Development.

Advanced Certificate in Education in Adult Education (120 NQF credits)

Convener: Associate Professor S Ismail

The range of work done by educators of adults is very wide. It includes development projects, workplace training, teaching in tertiary institutions, adult basic education and training (including literacy), teaching at adult education centres, art colleges, human resource development, health education, religious education, further education and training colleges, and educational programmes based in libraries and museums. An adult educator is any person with a responsibility for helping adults to learn, whether in formal or non-formal situations.

General aims of the course:

- (1) to develop a theoretical grasp of educational practice. This includes the purposes and contexts of adult education, particularly in a South African setting;
- (2) to develop knowledge and skills that will enable students to enhance their own learning and their practice in adult education;
- (3) to provide the opportunity for students to build a curriculum most suited to their needs and interests.

Times of classes:

Classes will be held on Wednesdays during University terms from 15h00-18h00, or at any other time determined by the Department. Additional Saturday workshops may be required, but no more than 3 per year.

The two-year programme:

Year 1 aims to enable students to grasp the discourses and practices that have shaped processes of adult learning, which in turn have structured the broad field of adult education. It will provide

FACULTY RULES AND CURRICULA FOR QUALIFICATIONS AND 23 PROGRAMMES OF STUDY

students with theoretical frameworks with which to view adult education practices to enable them to describe, analyse, assess and redesign these practices (where appropriate). A further aim is to enable students to increase their specialised roles in education, training and development, through building a broader repertoire of professional skills for work in the changing context provided by new policy frameworks.

Year 2 starts with a focus on theories which attempt to explain shifts in the organisation of learning and society, followed by contextual study in a site of practice with some degree of specialisation according to choice. The second semester provides a focus on research, with an introduction to evaluative research, followed by project-based research work which returns to aspects of professional practice.

Distinction

FG7 7.1

Unless otherwise specified, the diploma may be awarded with distinction where an overall average of 75% or more is achieved and not less than 70% in any one component of the programme.

7.2

A candidate for the programme specialisations listed below will be considered for distinction where he/she has met the following requirements.

7.2.1 Postgraduate Certificate in Education

The certificate may be awarded with distinction to a candidate who obtains at least 70% each for the School Experience course and Education course and an average of 75%.

NOTE: The School Experience courses and Education courses for the Postgraduate Certificate in Education specialisations are:

Foundation Phase: EDN3221W School Experience, EDN3200W Education

Intermediate Phase: EDN3249W School Experience, EDN3200W Education

Senior Phase & Further Education Training: EDN3206W School Experience, EDN3200W Education

7.2.2 Postgraduate Diploma in Music Performance

A distinction is calculated as follows: Interim Major Recital 30%, two Minor recitals 15% each and the Final Major Recital 40%. A sub-minimum of 70% is required in each recital to qualify for a distinction. An average of 75% must be obtained for a distinction.

The programme for all performances must be submitted to Senate for approval two months prior to the recital. If the programme includes any obscure or otherwise unfamiliar material, the candidate must submit information regarding this material, including appropriate scores, and/or transcriptions, sound and/or audio-visual recordings, and any other relevant information when submitting the programme for approval. No work played in its entirety in an earlier examination at this or any other institution may be repeated in any other examination without permission from the SACM Higher Degrees Committee. The duration indicated should be accurate for the candidate's own performance.

Senate may, on the recommendation of the examiners, require a candidate to repeat once, any or all of the performing requirements. Each of the four recitals must be passed. The recitals are to be performed in the order listed for the curriculum. The student may register for both minor recitals in the same year, if he/she wishes to present them in a single session with a five minute break.

The Postgraduate Diploma in Fine Art offers a coherent, graduate study path for artists and teachers who have Fine Art degrees and wish to upgrade their academic status, or those who have not yet acquired degree status, but who hold recognised diplomas in aspects of the visual arts (refer to admission rule FG3). This programme develops practical skills and conceptual thinking in fine art practice. Students work within a studio of senior students and develop a practical proposal of choice. This culminates in a professional exhibition at the end of the year of study that demonstrates a sound understanding of contemporary practice. The submission is accompanied by a visual catalogue with an introductory essay. A weekly reading group introduces core readings and critical issues.

Prescribed curriculum:

The diploma programme provides a framework for a one-year course of practical creative study, technical study or materials research in a chosen discipline, process or medium. The Michaelis School of Fine Art will appoint a supervisor for each candidate enrolled in the programme.

Admission requirements:

- (a) Faculty requirements are set out under Rules FH3 and FM3.
- (b) Specialisation requirements:
The following students will be considered for admission:
Graduates with any majors or of specialisations within the social sciences. Besides Sociology, Industrial Sociology, Political Studies, Anthropology and Environmental and Geographical Science, these would include Economics, History and Religious Studies.
- (c) Students from other specialisations and degrees may be admitted at the discretion of the Convener and the Postgraduate Committee of Sociology. Any student may be required to take appropriate supplementary access courses. Selection into this specialisation is not automatic and is dependent on good second-class passes (i.e. at least 68%).

Acceptance is not automatic and is at the recommendation of the Convener and the Postgraduate Committee.

Objectives:

This specialisation prepares students for entry primarily into the professional development community. This community straddles many spheres including community and non-governmental organisations, research organisations, agencies at various levels of government, media organisations and possibly corporate social responsibility offices. It is envisaged that MPhil (Development Studies) graduates will eventually take leading positions in this community; developing and disseminating knowledge about those sectors of society worst affected by socio-economic inequity, and devising strategies for them to gain access to resources and grow their capacity to optimise these resources.

FACULTY RULES AND CURRICULA FOR QUALIFICATIONS AND 101 PROGRAMMES OF STUDY

Department admission criteria – Honours and Coursework Master’s:

Refer to faculty rules FH3 and FM3 for minimum admission criteria.

Admission to the Department’s specialisations is selective and highly competitive. The Department admits only those candidates that it judges are likely to complete the degree programme successfully.

Criteria taken into consideration for admission include:

- academic excellence, indicated by good performance in previous studies;
- academic potential, indicated by improving performance into and across the final year of previous study; and
- political, policy or work experience where it is relevant to the specialisation for which a candidate seeks admission.

Additional admission criteria for applicants from UCT:

- Honours applicants who do not achieve a minimum of a 65% average in the third year of undergraduate studies at UCT are unlikely to be considered for admission. Conditional offers may be made subject to achieving satisfactory results in the final semester.
- Master’s applicants must obtain both a strong average for their honours coursework as well as a strong mark for the honours independent research project.
- Subject pre-requisites are listed separately under each specialisation description.

Additional admission criteria for non-UCT applicants:

The same criteria generally apply as for UCT applicants above. The requested supporting documentation (questionnaire, writing samples) must be supplied and is a determining factor in the assessment.

Specialisation objectives:

International Relations at the University of Cape Town tries to strike a balance between International Relations as a field of study that evolved over centuries and International Relations as it is currently studied. International Relations as traditionally studied usually meant a focus on three concerns: war, diplomacy and trade. Now described respectively as conflict or security, diplomacy and negotiation and the international political economy, these remain the central subjects we want to study. Our approach also values, however, the contributions of other sub-fields of Political Studies, especially Comparative Politics, and contributions from other disciplines. In International Relations scholarly debates, African cases and issues are crucial and, for this reason, graduates of our specialisation are often called upon to show their expertise in African and/or Southern African material.

Additional admission requirements:

Specific additional entry requirements for this specialisation are a past academic history in International Relations, Political Studies/Science or a strong academic background in a related discipline.

The honours/master’s specialisation has been designed to locate current concerns and topical interests in justice and transformation in the more general perspectives of normative theory and

comparative studies. It is inspired by the new directions in writing, research and teaching generated by the South African TRC-process but not confined to these. Instead, it links these new research interests and current debates in the area of transitional justice (including human rights law, conflict-resolution and peace-building, and social justice in transformation) with the more lasting intellectual perspectives provided by a thorough grounding in relevant academic disciplines.

Additional admission requirements:

Applicants should ideally have a major in, or some exposure to, Politics as an undergraduate subject. However, depending on which area of concentration the applicant is interested in, the following additional study backgrounds may be taken into account when assessing applications:

- **Transitional Justice** Majors in Politics, History, Law, Philosophy, Sociology, Literature
- **Human Rights** Senior courses in Law, LLB
- **Conflict Resolution** Majors in Politics, Psychology, Law, Social Anthropology, Sociology
- **Social Justice in Transformation** Majors in Politics, History, Law, Sociology, Social Anthropology, Psychology, Development Studies

The full specialisation comprises a minimum of 4 semester courses in each of the honours and master's years plus an independent research project at honours level and a master's minor dissertation component. The specialisation offers a choice between two core courses and a selection of electives in the areas of Transitional Justice, Human Rights, Conflict Resolution, and Social Justice in Transformation. Course selections are made with the following aims in mind:

1. Transitional Justice

Courses in the area of Transitional Justice aim to provide a theoretical grounding and comparative understanding of the interdisciplinary field of Transitional Justice at the intersection of human rights discourses, democratic transitions and post-conflict reconciliation.

2. Human Rights Law

Courses in the area of Human Rights Law aims to ground the professional and specialist studies in law in a broader theoretical and comparative understanding of the historical and political contexts in which Human Rights Law functions.

3. Conflict Resolution

Courses in Conflict Resolution aim to provide a comparative understanding and practice-orientated introduction to current approaches to peace operations and post-conflict reconciliation in the African context.

4. Social Justice in Transformation

Courses in Social Justice in Transformation are designed to combine a focus on issues of social justice related to poverty and development with the combating of legacies of racism and redressing racial, gender and social inequalities within more general normative and theoretical perspectives.

Some of the areas of concentration provide for *Internships*, which may be substituted for one of the elective options (but not for the core courses).

Honours and Master's Programmes in Linguistics

The development by human beings of the power to communicate with one another by means of language, and their subsequent and continuing co-operative use of that power in transforming the world they live in, are among the most significant determinants of the human condition. Scholars have been inquiring into the origins, history, mechanism, structure and social roles of language and languages since the very beginnings of the intellectual tradition. Politics

Programme Convener: Dr T Reddy

Application and Admission requirements:

General application information - External candidates and UCT students must apply formally via the Admissions Office. Candidates for the coursework degrees are required to submit a letter of motivation and sample of academic writing as part of their formal application. Candidates for the research degrees (by dissertation only) are encouraged to request a preliminary assessment with the department before submitting a formal application. The questionnaire is available on the Political Studies website.

Department admission criteria – Honours and Coursework Master’s:

Refer to faculty rules FH3 and FM3 for minimum admission criteria.

Admission to the Department's specialisations is selective and highly competitive. The Department admits only those candidates that it judges are likely to complete the degree programme successfully.

Criteria taken into consideration for admission include:

- academic excellence, indicated by good performance in previous studies;
- academic potential, indicated by improving performance into and across the final year of previous study; and
- political, policy or work experience where it is relevant to the specialisation for which a candidate seeks admission.

Additional admission criteria for applicants from UCT:

- Honours applicants who do not achieve a minimum of a 65% average in the third year of undergraduate studies at UCT are unlikely to be considered for admission. Conditional offers may be made subject to achieving satisfactory results in the final semester.
- Master’s applicants must obtain both a strong average for their honours coursework as well as a strong mark for the honours independent research project.
- Subject pre-requisites are listed separately under each specialisation description.

Additional admission criteria for non-UCT applicants:

The same criteria generally apply as for UCT applicants above. The requested supporting documentation (questionnaire, writing samples) must be supplied and is a determining factor in the assessment.

Objectives:

The honours and master’s specialisations in Politics are intended, broadly, to develop skills in political research, primarily in the study of national political processes. Students will learn how to use existing literature and theory to ask important research questions, identify appropriate evidence, and to apply relevant methods of analysis. The core courses focus on issues such as comparative politics, political institutions, political behaviour, public policy, democratisation, African and South African politics, and political theory. The degree comprises coursework and a research project or minor dissertation.

Additional admission requirements:

Specific additional entry requirements are a major in Political Studies or a strong academic background in a related discipline (e.g. Public Administration, Sociology, Psychology, Economics, Criminology, Law, History or Philosophy).

Religious Studies

Mission Statement

The Department of Religious Studies is committed to the study of religions which will contribute to public life in our local, regional, national and continental contexts. It is dedicated to:

- an open, plural, intercultural, and interdisciplinary study of religion in all its forms;
- the in-depth study of African religious traditions;
- the creative and critical analysis of religion as a force in personal, social, economic and political life;
- the promotion of quality education and research in the study of religion as a vital contribution to the transformation and development of South Africa.

The mission statement is implemented through degree specialisations that focus on the broad theme of religion, culture and identity. The Department offers a systematic study of religion in public life, its meaning and significance in South Africa in particular and Africa in general. This broad theme is explored in core courses team-taught by faculty members and also reflected in various research projects and institutes presently housed in the Department.

Core courses provide the thematic, methodological and theoretical foundations for all students who choose to pursue degrees in this department. Additional courses continue this focus within the established areas of specialisation: African Studies, Christian Studies, Islamic Studies, Jewish Studies, Buddhism and Critical Theory.

Courses in areas of specialisation

Hereunder follows a broad map of the courses offered in the areas of specialisation. Not all courses indicated below will be offered in any given year. However, they will follow the pattern outlined here.

African Studies

The courses in African studies explore the varieties of indigenous religious belief systems as well as the impact of global religions like Christianity (especially Pentecostalism) and Islam on the continent. Students will be prepared to do research on religion in Africa through different methodological and theoretical paradigms. A specialisation in African studies can be pursued in combination with a focus on Christian and/or Islamic studies.

Buddhism

The department offers postgraduate study and supervision in Asian religious traditions with a special emphasis on Buddhism. Currently an honours level course on Buddhism and Modernity and guided reading projects through Reading Religious Texts are offered. Research interests include the contemporary spread and transformations of Buddhism, Buddhism and Globalisation, conversion and socially and environmentally engaged Asian spiritualities, with a particular focus on Japan.

Christian Studies

The courses in Christian Studies focus mainly on the Sociology of Christianity and on the study of African Pentecostalism. The latter section debates the social impact and trajectories of Christian new religious movements and new forms of believing and being Christian as espoused by the Pentecostal-charismatic churches and ministries, their engagement with media (Internet use, religious broadcasting, production and reproduction of books, DVDs & podcasts, Pentecostal advertising: posters, billboards, handbills), fiscal and political practices.

Comparative Studies

The courses in Comparative Studies are divided into two categories: Issues in the Study of Religion and Religion in Contemporary Society. The first area includes courses in the Problem of Religion, Religion and Ritual, Sacred Space, Religion, Gender and Embodiment, and the History of Religions

140 FACULTY RULES AND CURRICULA FOR QUALIFICATIONS AND PROGRAMMES OF STUDY

in Southern Africa. The second area includes courses in Religion and Popular Culture, Religion and Urban Culture and Religion, Education and Society in South Africa.

Islamic Studies

The courses in Islamic Studies explore Islam as religion, culture and civilisation in particular contexts and themes. An honours level course covers fundamental concepts within Islam from phenomenological and socio-historical perspectives. This course is indispensable for any student embarking on research relating to Islam at a post-graduate level. At the Master's level, we offer specialized courses on Sufism, Islam in Africa, Gender, Islam and Feminism.

Philosophy of Religion/Critical Theory

The courses in Philosophy of Religion, Critical Theory and Post-Structuralist Thought address contemporary issues in European philosophy, philosophy of religion, modern Jewish thought and post-colonial theory. Introduction to linguistics courses:

The development by human beings of the power to communicate with one another by means of language, and their subsequent and continuing co-operative use of that power in transforming the world they live in, are among the most significant determinants of the human condition. Scholars have been inquiring into the origins, history, mechanism, structure and social roles of language and languages since the very beginnings of the intellectual tradition. Courses in this section not only offer an introduction to the range of such inquiries and an opportunity to participate in them, but above all foster the idea that an attempt to grasp the nature of language is an indispensable part of any serious attempt to understand what it is to be human.

Course Outlines:

The Faculty reserves the right to cancel the following course/s if there is insufficient student interest. Confirmation of whether the course/s will be offered will be published on Vula, Departmental and Postgraduate Faculty Notice-boards by the first Friday of the semester in which the course begins [17 March 2017 for first semester and whole year courses, and 18 August 2017 for second semester courses].

AXL4101F GENDER AND VIOLENCE

24 NQF credits at HEQSF level 8

Convener: Associate Professor J Bennett

Course entry requirements: Acceptance for an honours programme.

Course outline:

This course provides a range of feminist analyses of the connections between gender, culture, sexuality and violence in African contexts and more broadly. It examines the development of theories and the history of organisational and State-based efforts to combat particular forms of violence, especially those commonly identified as 'gender-based violences'. It also explores current dilemmas - theoretical, strategic and political - facing feminist activists and researchers with a commitment to challenging 'gender-based' violence in the SADC context.

DP requirements: None

Assessment: Two short essays (15% each); long essay of 4,500-5,000 words (40%) in course writing and participation (30%).

AXL4102W GENDER ANALYSIS & RESEARCH DESIGN

24 NQF credits at HEQSF level 8

Convener: Dr A Africa

Course entry requirements: Acceptance for an honours programme.

Course outline:

This course will introduce key principles of gender analysis, as theorised by Western and by African-based feminist researchers. Participants will explore the value of gender analysis in the

design of both quantitative and qualitative methods of research, paying particular attention to issues of research design. The course will also draw on case studies of research located in the disciplines of political science, cultural studies, criminology and history in order to explore the implications of drawing on gender as a tool of social analysis within research projects grounded within disciplinary frameworks.

DP requirements: At least 50% pass for all assignments.

Assessment: Literary review 15%; first draft proposal 15%; final proposal 30%; Proposal presentation 20%; final presentation 20%.

AXL4103S DEVELOPMENT, CONFLICT AND POLITICAL CHANGE

24 NQF credits at HEQSF level 8

Convener: Y Clarke

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

This course explores the politics of development from a gender perspective through a focus on the links between politics, conflict and peace-building in African contexts. The course will address issues such as peacebuilding, human rights, violence, and security in order to provide a critical reading of the ways in which development is gendered in selected African contexts. A key objective is to explore how development trajectories, gender equality, and peace are inextricably connected. The course will particularly focus on the links between conflict, peace-building, and political initiatives in order to offer new approaches to the theories on gender and development in African contexts.

DP requirements: None.

Assessment: Two response papers 20%; group presentations 20%; two essays 50%; course participation 10%.

AXL4104F GENDER PEACE & JUSTICE

(Not offered in 2017)

24 NQF credits at HEQSF level 8

Convener: TBA

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

The development of peace-building initiatives in Africa has been mirrored by the expansion of various models of transitional justice. These encompass a range of judicial and non-judicial approaches adopted by post-conflict societies to address human rights abuses of the past such as war crimes tribunals and truth and reconciliation commissions. Despite increased attention by the international human rights community to the gender dimension of violations perpetrated during conflict, gendered experiences of conflict have generally received inadequate attention in transitional justice processes. Neglecting gendered patterns of abuse ultimately affects both women and men in their access to justice. This course will explore the evolution of transitional justice mechanisms in Africa and will analyse their successes and failure in addressing gender-based human rights violations.

DP requirements: None

Assessment: Two essays 60%; two response papers 20%; course participation 10%; group presentation 10%.

AXL4105F GENDER AND PSYCHOLOGY

24 NQF credits at HEQSF level 8

Convener: Dr A Africa

Course entry requirements: Acceptance for an honours or master's programme

Course outline:

This course explores feminist deconstructions of applied psychological knowledge about gender. It places particular emphasis on Southern and Northern feminist analyses of mainstream psychological

theory. It will explore psychology's complicity in perpetuating various forms of oppression and will discuss feminist endeavours focused on reconstructing the discipline. Particular emphasis will be placed on: psychological constructions of gender, race and sexualities; colonial/post-colonial constructions of mental illness in South Africa; gendered/racialised constructions of mental illness.

DP requirements: None.

Assessment: Two essays 60%; two response papers 20%; course participation 10%; group presentation 10%.

AXL4106F INTRODUCTION TO GENDER/TRANSFORMATION

24 NQF credits at HEQSF level 8

Convener: Associate Professor J Bennett

AXL4203F PUBLIC CULTURE IN AFRICA

24 NQF credits at HEQSF level 8

Convener: Associate Professor N Shepherd

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

This course explores issues in public culture affecting Africa in a global context. Detailed examples illustrate how public culture is shaped, and how public expressions of identity and difference manifest in spaces and buildings, heritage, music and literature. An interdisciplinary course, it introduces various theoretical perspectives on culture and uses evidence from archaeology, history, architecture, literature and cultural studies. Its empirical focus ranges from the archaeology of pre-colonial Africa to the public culture of the Internet.

The course interweaves and links engagement with theory with the development of skills that are useful in the worlds of film and media practice, heritage practice, business, advertising etc. The theory component considers key texts demonstrating "tools to think with", and allowing shifts between general propositions and real-world examples, thereby probing the socio-cultural world's underlying structures. The skills development component focuses on the conceptual planning and development of projects in the phase preceding final production. In particular, the course develops historically- and theoretically-informed, reflexive understandings of culture and identity, in contexts of diverse heritage and media practices. It offers a unique convergence of theory and practice, around a number of key sites of identity and contestation: "race", "public culture", "African-ness", and the like.

DP requirements: Attendance at seminars is compulsory, failing which students' papers may not be marked.

Assessment: Two essays (25% each) 50%; major project 50%.

AXL4205S THE AFRICAN STUDIES ARCHIVE

24 NQF credits at HEQSF level 8

Convener: Associate Professor N Shepherd

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

In this course we take a look at some of the key collections in the Manuscripts and Archives division of the University of Cape Town Library, and at some of the bodies of scholarly work to which they have given rise. As one of the oldest university archives in Southern African the collections speak – in image and text – of the formation of a range of discipline-based knowledges dealing with Africa. On the one hand, this takes the form of the emergence, formatilisation and institutionalisation of a range of collecting and recording practices, fieldwork methodologies and the like. On the other hand, it takes the form of the emergence of various disciplinary discourses and their associated "objects" and "fields". The key source of insight in the course lies in exploring how these different objects and fields are not natural or given, but have been formed and constructed in relation to specific social contexts and intellectual histories. Significant collections examined in this course include the Bleek/Lloyd collection, the Goodwin Collection and the Hahn Collection. Particular emphasis is placed on the many hundreds of photographic images that form part of these collections as a point of entry into larger disciplinary debates and concerns.

DP requirements: Attendance at seminars is compulsory, failing which students' papers may not be marked.

Assessment: Two essays (25% each) 50%; major project 50%.

AXL4206S DECOLONIAL THEORY

24 NQF credits at HEQSF level 8

Convener: Associate Professor N Shepherd

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

This course considers the growing body of thought from Latin America under the heading 'decolonial theory', and exemplified in the works of Walter Mignolo, Arturo Escobar, Enrique Dussel, Santiago Castro-Gomez, Nelson Maldonado-Torres and Anibal Quijano. This work has been significant in framing an approach to questions of knowledge, coloniality and globalisation that attempts to re-write the script of modernity (as colonial modernity) and that provides rich conceptual resources through which to re-think familiar issues.

The course takes a key-word approach. Each two-week block considers a distinct set of key words or concepts and texts that introduce and discuss them. They include Coloniality (of power/knowledge/being); Geopolitics of knowledge; Colonial globality and global designs; Border theory and colonial difference; Modernity (colonial modernity, peripheral modernity, transmodernity); Global designs and the local; The Indigenous Movement and postcolonial ethnicities.

Approaching decolonial theory from the perspective of the Cape, the course asks: How might a critique based on South / Latin American historical experiences translate to African contexts? How does it speak to the particularity of knowledge production and colonial engagement in the Cape? How does it connect with contemporary African Studies debates addressing questions of knowledge and epistemology?

24 NQF credits at HEQSF level 9

Convener: Associate Professor J Bennett

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

This course explores approaches to research which, while engaged with texts, imagine the creation of knowledge as a dynamic in which questions of space, ground, collectivities, language and the body intersect in difficult tensions of what can – and cannot – be represented within our own work as researchers. Drawing from the disciplinary and research interests of the course conveners, the course will look at contemporary theory on questions of 'ground' (actual ground sites of burial, dispossession, building, and memory, and the 'ground' of epistemological assumption), 'identities' (those created through digital communication, those created through migration, those imagined through political coercion or consensus), and the 'body' (the technological body, the sexual body, the violated body, bodies of knowledge and creativity). Through the discussions opened by what will become an interdisciplinary conversation, we will ask questions about the methodological strategies which might help us imagine 'research' beyond the boundaries of qualitative approaches with we are already familiar.

DP requirements: Attendance at seminars is compulsory, failing which students' papers may not be marked.

Course outline:

The prevalence of large-scale land acquisition in the context of rising food prices since the 2008/09 financial and economic crisis has brought the issues of land and land use in Africa in the spotlight. AXL5206F PAN-AFRICANISM & REGIONAL INTEGRATION IN AFRICA

24 NQF credits at HEQSF level 9

Convener: Associate Professor H Chitonge

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

The course examines the political and economic theory and rationale for Pan-Africanism and regional integration, with particular focus on how this has played out on the African continent over time. Emphasis in the course is on understanding the origins of Pan-Africanism, the current initiatives and arrangements towards regional integration, and the link between the two. The course provides an overview of past and contemporary strategies, initiatives and programmes aimed at

unifying the continent. Students are introduced to the key challenges and opportunities of integration and development in Africa. While the philosophy of Pan-Africanism is still cited in some quarters as the basis for regional integration today, economic, and to a lesser extent political rationale, has dominated the motive behind regional integration. There is more emphasis now on the economic gains that can come from integrating the African continent than on any other motives. Given this context the course examines whether Pan-Africanism plays any role in the current drive towards regional integration. In the course, students are encouraged to critically reflect on whether the current motives for regional integration are strong enough to overcome the tendency toward national sovereignty and individualism in the continent.

DP requirements: Submission of all written work and attendance at all seminars.

Assessment: Seminar presentations & participation 15%, short essay 35% (3000 words), long essay (5000 words) 50%.

AXL5414S RESEARCHING THE ANTHROPOCENE

24 NQF credits at HEQSF level 9

Convener: Associate Professor L Green**Course entry requirements:** Acceptance into an honours or master's programme.**Course outline:**

The term "anthropocene", taken up by geologists to describe the era in which the effects of collective human action have become "significant on the scale of Earth history", compels a rethinking of the divides between the human sciences and the natural sciences. The implication: not only are conceptual divisions between society and nature to be rethought, but that new approaches to research are needed to speak to the challenges of comprehending the interconnections of human life, earth systems, and species. This course offers an introduction to research methods that are needed in order to bring these interconnectivities and parts and wholes, into public life and decision-making. Building on current conversations across the south on the engagement of decolonial literatures and

the post-humanities, this course explores the research methods proposed by leading scholars in these fields.

DP requirements: Submission of all prescribed assignments; satisfactory attendance and participation in coursework seminars.

Assessment: Two 5000 word essays (40% each); prepared seminar presentation (20%).

AXL5415F EARTH, ECOLOGY, HUMANITIES A

2 NQF credits at HEQSF level 9

Course entry requirements: Acceptance for the MPhil in Environmental Humanities.

Co-requisites: ELL5029F Earth, Ecology Humanities B; FAM5044F/S Earth, Ecology, Humanities E; FIN5013F Earth, Ecology, Humanities D; SOC5018F Earth, Ecology, Humanities C

Course outline:

This course represents the bookends of the larger suite of courses titled Earth, Ecology, Humanities, co-taught by colleagues across several departments in the Humanities Faculty. The opening session introduces the idea of nature as a political problem in Parliamentary democracy, since the truth of nature is subject to scientific assessment, while matters cultural and social are accountable to Parliament. What might it mean to rethink the social contract as a natural-social contract? If we were to do that, what different approaches to nature might we take? The introduction opens space for different approaches to the idea of nature, ecology, earth and humanities taught in in this course and other courses in the MPhil in Environmental Humanities. The core reading here is Michel Serres' *Natural Contract*.

DP requirements: Submission of all prescribed assignments; satisfactory attendance and participation in coursework seminars.

Assessment: Attendance for DP purposes.

AXL5416F SCIENCE, NATURE, DEMOCRACY

24 NQF credits at HEQSF level 9

Convener: Associate Professor L Green

Course entry requirements: Acceptance into an honours or master's programme.

Course outline:

This course focuses on the relationship between science and governance, drawing on current debates in science studies about the mediation of different versions of nature, truth and world in a democracy. Whether those concerns arise in relation to different disciplinary knowledges, the interests of capital, religious or indigenous movements, or between scientists and parliamentarians, the production of evidentiaries and procedures for verification are a central concern in decision-making in contemporary public life. The course explores the unstable knowledge terrain where state, science, publics and capital meet, with the goal of developing insight into the mistranslations and incomprehensions that occur, and to explore options that might resolve them. Building on emerging work on scholarly diplomacy in the scientific humanities, with a particular interest on science studies in the south, the course focuses on emerging strategies of mediation, equivocation, translation and contestation that are part of democratic processes and activism.

DP requirements: Submission of all prescribed assignments; satisfactory attendance and participation in coursework seminars.

Assessment: Two 5000 word essays (40% each); prepared seminar presentation (20%).

ECO5077S INDUSTRIAL ORGANIZATION

30 NQF credits at HEQSF level 9

Convener: Professor J Burns**Course entry requirements:** Honours in Economics or equivalent or at the discretion of the Head of Department**Course outline:**

The objective of this course is to introduce recent quantitative techniques which are used to empirically implement and test models of consumer behaviour and competition between firms. These models are commonly applied to competition policy and regulatory proceedings, for instance to assess the effects of a merger on competition or to regulate telecommunication operators. During the course students should become comfortable with the application of these techniques and understand their limitations. This course should be of interest for students who intend to work as economists at antitrust authorities, industry regulators, and economic consulting firms or pursue a career as a researcher in academia.

The course will be divided into two interchanging parts. First, we will derive theoretical models in the classroom. Next, we will estimate these models using Stata and real data from different industries in the computer lab. About 50% of the course will be devoted to lab exercises. You will also receive regular take home computer exercises to be able to practice the applications by yourself.

Lectures notes and a reading list of relevant academic and policy papers will be provided for each topic. The following topics will be covered in the class:

- 1) Econometric methods for estimation of simultaneous equations models of demand and supply
- 2) Estimation of oligopolistic models of competition and tests for market conduct
- 3) Estimation of differentiated products demand functions
- 4) Merger simulation
- 5) Detecting collusion and estimation of damages
- 6) Estimation of models of market entry

It reviews current debates around new forms of learning and knowledge; the shifting relationship between formal education and the workplace; education for the informal economy; and social inequalities in work and learning. Students will reflect critically on their own experiences, and design new possibilities for learning at work.

30 NQF credits at HEQSF level 8

Convener: Associate Professor U Hoadley

Course entry requirements: Admission to PGDip (Education) or BEDHons

Co-requisites: None

Course outline:

The study of curriculum is the study of how dominant groups in society select and codify the knowledge they consider to be important for children to learn, the decisions that are made about how this knowledge is taught, and how it is assessed. The course focuses on issues of curriculum, pedagogy and assessment directly, as well as more broadly on the issue of social inequality and how this is reproduced or challenged through education. The course engages with a range of texts from sociological and educational literature, introducing students to major debates in curriculum studies. It moves from a macro focus on education and society to micro studies of curriculum, classroom pedagogy and assessment. The course also addresses the relationship between theory and practice, assisting students in moving between academic study and a consideration of professional practice. The intention of the course is to enable students to engage critically with curriculum reform in South Africa.

30 NQF credits at HEQSF level 8

Convener: Associate Professor C McKinney

Course entry requirements: Admission to PGDip (Education) or BEdHons

Co-requisites: None

Course outline:

The course aims to develop students' understanding of the language and literacy challenges in South African schooling; to develop students' knowledge of conceptual resources for analysing and intervening in these challenges.

This course explores key challenges in the field of language and literacy in schooling in South Africa. We focus on the complex possible relationships between language and failure in South African schooling from socio-political, socio-cultural and sociolinguistic perspectives. We examine the language of learning and teaching debate and the theoretical and empirical work underpinning this as well as the language policy and sociolinguistic context in South African education. In a second focus on literacy, we study writing and reading in education, developing the resources for understanding and intervening in key challenges around literacy in educational settings. We study literacy as sets of socially organised practices and skills and examine how aspects of social and linguistic diversity impact on the learning, teaching and assessing of the skills and practices associated with language, reading, writing and learning in education. We further explore dominant

approaches to the teaching of literacy, analysing how reading and writing are conceptualised in these approaches.

First, we will review studies of the practices of reading and writing across diverse social settings, as well as in teaching settings. Then we will aim to develop and revise approaches to literacy and literacy teaching, with possible focuses for the course being:

- how adults without schooling engage with and interpret literacy in diverse ways. We will think about this in relation to forms of provision of literacy training for adults, including the emergence of a national Adult Basic Education and Training system in South Africa;
- the beginnings of literacy learning and development in young children: the concepts of 'situated literacies' and 'situated learning' will be developed to understand the ways that young children from a range of language and home backgrounds become (different kinds of) readers and writers;
- literacy and teacher strategies in schools. There will be a special focus on the processes of inclusion and exclusion and on the role that language (both spoken and written) plays in these processes in multilingual environments.

Course outline:

The course sets up a series of conceptual lenses through which to interrogate policy developments in adult education, higher education and vocational education and training. The first is the division of mental and manual labour in society which leads to institutional, programme and knowledge differentiation and differing prospects of social inclusion or exclusion. EDN5505S CHANGING FRAMEWORKS IN CURRICULUM POLICY

30 NQF credits at HEQSF level 9

Convener: Associate Professor U Hoadley

Course entry requirements: Acceptance for the MED.

Course outline:

The course is concerned change and continuity in processes of curriculum reform. Three central ideas informing it. The first is an historical analysis of curriculum identifying reform swings between two poles, 'traditional' and 'reform' or progressive curricula. The second idea is the implications of these swings the 'message systems' of education – curriculum, pedagogy and evaluation (the intended, the enacted and the assessed curriculum). The third tenet is the centrality of knowledge in the consideration of curriculum policy, change and evaluation. The course begins with a broad scan of the political sociology and historical literature on curriculum and throughout it focuses on analyses within the sociology of knowledge. Fundamentally it is the nature and status of knowledge that shifts when the curriculum changes. The course aims to expose students both to the broader political context and processes of curriculum reform, as well as conceptual approaches to the analysis of curriculum forms.

DP requirements: 80% attendance record and completion of all tasks and assignments.

Assessment: Academic essay (8000 words).

EDN5506F PEDAGOGY, KNOWLEDGE & SOCIETY

30 NQF credits at HEQSF level 9

Convener: Associate Professor U Hoadley

Course entry requirements: Acceptance for the MED.

Course outline:

The course privileges the notion of curriculum as a selection and organisation of knowledge for transmission. Being sociologically rooted, it also concerns the differential distribution of knowledge and its transmission across groups in society. Central to the course are questions of what knowledge is included in the formal curriculum, how it is organised and what the implications of this are for groups of learners. Basil Bernstein provides the main theoretical resource for these issues, from an investigation of curriculum forms and pedagogic modalities to an analysis of how knowledge is transformed for pedagogic communication, through to his theorisation of different knowledge structures. Exemplars of empirical work that address the questions of the course are considered throughout. Attention will be drawn the development of languages of description. In short, the course focuses on the relationship between schooling and society and research that has pursued questions around it within a particular theoretical tradition.

DP requirements: 80% attendance record and completion of all tasks and assignments.

Assessment: Academic essay (8000 words).

EDN5520S ACADEMIC LITERACIES

30 NQF credits at HEQSF level 9

Convener: Dr A Bangeni

Course entry requirements: Acceptance for the MED

Course outline:

The course provides an introduction to the study of language and literacy in a range of academic settings, via the emerging area of 'academic literacies' in the New Literacy Studies field. Rather than a generic academic skill, academic literacy is studied as diverse, shaped by disciplines and subject areas. The course engages with two methodologies that shed light on academic texts and practices. Critical discourse analysis (CDA) focuses on texts, while ethnographic observation (including multimodal analysis) looks more closely at practices. These methodologies are used to explore the relationship between texts and their social-political-historical contexts. The course interrogates the politics of 'academic voice' to help us think about access questions in tertiary education settings locally and globally.

World-wide, education systems are characterised by varying types of inequality, ranging from physical access through to disparate outcomes. The reasons for this are complex and the consequences for individuals and societies of inequality enormous. This course will examine these phenomena at macro, national and international levels through reviewing international policy interventions at achieving systemic change; through reviewing how allocatory decisions can be/are made at these levels and through narrowing the lens to more local micro levels to develop frames for school change. EDN5531F THEORIES OF CHILD & CHILDHOOD

30 NQF credits at HEQSF level 9

Convener: Associate Professor K Murriss**Course entry requirements:** Acceptance for an MED programme**Co-requisites:** None**Course outline:**

This course will draw on psychology, sociology and mainly philosophy of childhood to explore key issues in early childhood and primary education. Our main focus will be on tracing how various theories influence and justify certain educational practices, also in the global south. Shifting conceptions of child and childhood influence relationships between adult and child and through the use of various media (including picturebooks, film and documentaries) we will be exploring how child is positioned (and marginalised) in various approaches to teaching and learning. Our journey will meander from religious thinkers and philosophers on views of child to philosophers such as Plato, Aristotle, Locke and Rousseau. They in turn, heavily influenced Darwin, Piaget, Vygotsky, Malaguzzi, Barad, Deleuze and Guattari. Our mapping will focus on the decolonisation of childhood discourses through a disruption of the following seven material-discursive constructions: child as 'innocent', 'evil', 'ignorant', 'developing', 'fragile', 'communal' and 'competent'. The course includes investigating the implications of the posthuman orientation for teaching and learning, as well as research design, methodology and research ethics.

EDN6001F PEDAGOGY, KNOWLEDGE & SOCIETY

36 NQF credits at HEQSF level 9

Convener: Associate Professor U K Hoadley**Course entry requirements:** Acceptance for the PGDip (Education)**Course outline:**

The course privileges the notion of curriculum as a selection and organisation of knowledge for transmission. Being sociologically rooted, it also concerns the differential distribution of knowledge and its transmission across groups in society. Central to the course are questions of what knowledge is included in the formal curriculum, how it is organised and what the implications of this are for groups of learners. Basil Bernstein provides the main theoretical resource in addressing these issues, from an investigation of curriculum forms and pedagogic modalities to an analysis of how knowledge is transformed for pedagogic communication, through to his theorisation of different knowledge structures. Exemplars of empirical work that address the questions of the course are considered throughout. In short, the course focuses on the relationship between schooling and

280 EDUCATION

society and research that has pursued questions around the relation within a particular theoretical tradition.

(Not offered in 2017)

24 NQF credits at HEQSF level 8

Convener: Professor K Sole

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

Through the study and discussion of novels, poetry, critical debates, and the socio-political and cultural context, this seminar will highlight and attempt to understand some of the principal issues and disagreements pertaining to the expression and reception of black South African literature over the last half century.

Critical debates: Key issues and texts will be focused on, including work by Nkosi, Sachs, Ndebele, the Marxist 'revisionist' school and the post-structuralists. A number of key issues and terms will be debated. The purview will touch on metropolitan critics who have had especial influence on SA literary critics.

ELL4035S STUDIES IN THE MODERN NOVEL

(Not offered in 2017)

24 NQF credits at HEQSF level 8

Convener: TBA

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

This course will give students an overview of the twentieth-century novel by pursuing the theme of travel. The study of travel narratives has become a central field of literary criticism over the past three decades, closely paralleling the rise of critical theory and postcolonial criticism, since travel involves intercultural encounters and the exploration of alternative models of selfhood. The focus will be in particular upon American novels, asking whether American travel narratives differ significantly from European ones. American writers often have a dual consciousness, since they are both imperialistic, and members of a postcolonial nation.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Class participation (including reading test): 10%. One researched class presentation: 10%. Accompanying essay (3,000 words): 30%. One research essay (5,000 words): 50%.

ELL4036F SPACE, PLACE & LIT NON-FICTION IN AFRICA

24 NQF credits at HEQSF level 8

Convener: Dr H Twidle

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

In this course we will read an array of acclaimed texts from contemporary South Africa which can be loosely grouped under the label 'literary non-fiction.' From 2015 the special topic of the course will be Land, Space and Place, as we investigate how such concepts have been constructed and questioned in a variety of non-fictional genres: investigative journalism, the diary, life-writing, oral history, public science writing, archival reconstruction and urban studies. Reading works by writers like Sol Plaatje, Jacob Dlamini, Noni Jabavu, Antjie Krog, Njabulo Ndebele, Jonny Steinberg, Charles van Onselen and Ivan Vladislavic, we will address questions of landscape; the farm novel; oral history as it intersects with environmental history; discourses of scientific enquiry at the Cape of Good Hope; 'wild' cities; 'native nostalgia' and the spaces of childhood in the South African memoir; the post-apartheid urban imaginary; the urban edge and the littoral zone as these play out in compelling non-fiction narratives which seek to understand what a sense of place might mean in such a spatially distorted society. At the same time, we will place these local texts in dialogue with similar, environmentally inflected works from the rest of the world.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Attendance, participation and one class presentation (20%). Research exercises (10%). One research essay – 3000-4000 words (40%). One review essay – 2000-2500 words (30%).

24 NQF credits at HEQSF level 8

Convener: Dr D Higginbotham and Associate Professor S Young**Course entry requirements:** Acceptance for an honours or master's programme.**Course outline:**

This seminar seeks to shift the lines of inquiry into Shakespeare's on-going cultural life across the global South by examining histories, scholarship, performance and adaptations of Shakespeare and his contemporaries within Africa, the Caribbean, the Indian Ocean, Latin America and North America. We will consider what happens when early modern drama travels to locations beyond England and how these works are transformed by these encounters. We will examine how Shakespeare and his contemporaries represent southern locations, specifically Africa, India, and Indonesia, just as England becomes engaged with the complex network of overseas trade spanning the globe. We will remain attuned to our own location and that of our material, in the hope of

generating new perspectives on Shakespeare's cultural life across the global South and extending the familiar paradigms of postcolonial studies.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Assessment is based on three kinds of assignments: (1) Two written reflections in response to question sheets, each 1,000 words (total 25%) (2) Two written analyses of historical documents pertinent to the study of overseas trade in the early modern period (total 25%) (3) An independently researched final essay of 4,000 words (50%).

Other pairings will include: John Locke and William Wordsworth on the association of ideas; Kant and Lyotard on the sublime; Zola, Breton and Lukács on realism and surrealism; Freud and Wittgenstein on dream interpretation; and Godard and Adorno on montage.

ELL4074S CURRENTS OF THOUGHT IN AFRICAN LITERATURE

24 NQF credits at HEQSF level 8

Convener: Dr V Collis-Buthelezi

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

The term 'diaspora' emerged as the term of reference for those peoples of African descent resident outside of Africa in the 1950s as most of Europe's colonies hurtled toward nation formation. Widely used to identify the survivors of the transatlantic slave trade and their descendants, diaspora, in the case of Africa, came to signal both the connection to Africa and the impermeable difference between those remade by slavery in the 'New World' and those who endured colonialism on the continent. This course grapples with the term as one in crisis and instability, constituted and reconstituted not only in relation to yearnings for home(land) but also empire. We will trouble some of the narratives we tell about African and African diasporic literary traditions in relation to empire and nation. Some of these traditions will include, but are not limited to: Ethiopianism, the Harlem Renaissance, Negritude, and Pan-Africanism. We will read slave narratives, novels, poetry, short stories, as well as polemical and theoretical texts.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Two class essays, counting 50% of the final grade. Each essay about 4,000 words.

At stake in an analysis of all these texts: how to imagine a new social order.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Three question sheets (50%); one essay of 3000 to 4000 words (50%). A draft of the essay will need to be presented at an in-class seminar workshop.

ELL5024S CREATIVE WRITING POETRY

24 NQF credits at HEQSF level 9

Convener: Professor J Hambidge

Course entry requirements: Acceptance into the MA programme with a specialisation in Creative Writing; a first degree, submission of a portfolio of Afrikaans or English poetry and after an interview with the Convener.

Course outline:

Students are required to attend two-hour long workshops weekly. Working around their own draft poetry, the classes require students to engage with a range of poetry that exemplifies diverse forms and shows the diversity of ways that a poetic mode can be used; and texts that explain how to write and re-draft poetry; critical works that analyse poetry and that demonstrate what constitutes publishable poetry and why. The course requires students to begin drafting poetry of their own and both auto-critiquing what they write and working with their peers and the lecturer in a process of mutual critique. The course requires a range of assignments that include commentaries sent to the lecturer about poetic works that have been sent to them in the periods between workshops.

DP requirements: Attendance at all workshops.

Assessment: 50% coursework assignments; 50% examination.

ELL5025W CREATIVE WRITING PART B

96 NQF credits at HEQSF level 9

Convener: Professor I Coovadia

Course entry requirements: Acceptance for the MA specialising in Creative Writing.

Course outline:

A novel, a collection of stories, a piece of creative non-fiction (preferably 60,000 to 80,000 words); or a collection of preferably forty poems accompanied by a 20,000 to 25,000 word expository essay. The creative work may also take the form of a text for delivery on an electronic platform (e.g. mobification). The size of the work will be decided in discussion with the specialisation Convener and supervisor. While an expository essay relating to the creative work and its contextual and theoretical underpinnings is required to accompany a collection of poetry, it may, at the discretion of the supervisor and specialisation Convener, be permitted or required where the creative work is a novel, a piece of creative non-fiction or a text for delivery on an electronic platform. In cases where an expository work is part of the dissertation, the two combined will be graded as a single whole although examiners will be guided as to the relative value of each. Although it is at times inevitable that the dissertation contains seeds of work produced in ELL5027F, ELL5024S and/or SLL5002S, the dissertation has to be, in essence, original and new work.

DP requirements: Regular consultation with supervisor as per a Memorandum of Understanding agreed and signed at time of first and each subsequent registration for the course.

Assessment: Dissertation 100%.

ELL5027F CREATIVE WRITING WORKSHOP

24 NQF credits at HEQSF level 9

Convener: Professor I Coovadia

Course entry requirements: Acceptance for the MA specialising in Creative Writing.

Course outline:

The workshop is a core to the creative writing programme. Its intention is to introduce students to writing as a self-conscious art, learned by doing, and to prepare them to begin their creative dissertation. It is organised around discussion and improvement of student creative work rather than the transmission of knowledge, although creative writers who are invited to lead a seminar/workshop will direct discussion around particular themes – like narrative point of view, the construction of scenes and dialogue, poetic metre, and authorial voice – as they are raised in the practice of members of the class. At each workshop the submissions of up to four class participants will be discussed. Each student is expected to submit a minimum of 40 pages of writing during the course of the semester. Students perform as readers of each other’s work, to write new material of their own, and to revise their writing.

DP requirements: Submission of all written work.

Assessment: Assessment: 25% based on participation; 75% based on writing submitted during the course.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: One essay of 2500 words.

ELL5030F LANGUAGE, LITERATURE & MODERNITY I

24 NQF credits at HEQSF level 9

Conveners: Associate Professors H Garuba and S Young

Course entry requirements: Acceptance for an honours or master’s programme.

Course outline:

The course is divided in two parts.

- 1) Issues of modernity and postcoloniality. This section focuses on the self-constitution of Modernity and its Other, constructed in binary relations, such as the pre-modern, the traditional, the primitive and so on. The course explores this through the categories of Reason and Subjectivity, Time and Space, and the Normative Body and then examines the relationship between modernity, colonialism and post colonialism. This section covers the first phase of post-independence.
- 2) Migration, gender and globalisation. We reflect on what diaspora offers to a conceptualisation of Africa and consider how it complicates the dichotomy of ‘home’ versus ‘elsewhere’. How does an Africa that is ‘everywhere’ help us to rethink the familiar categories of cultural studies and how might this ‘Africa’ extend the framework of postcolonialism? We begin by examining

some key theoretical texts on race, migration and gendered relations of power. In turning to the novels, we consider how diasporic writing both invokes and complicates familiar categories of identification and the systems of thought associated with 'modernity'.

In both sections of the course we will examine critical readings in order to develop conceptual tools for reading primary texts by African writers.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Two shorter methodological essays of 3,000 words each and one final research essay of 4,000 words.

ELL5031S LANGUAGE, LITERATURE & MODERNITY II

24 NQF credits at HEQSF level 9

Conveners: Dr V Collis-Buthelezi and Dr C Ouma

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

This course contemplates 'Revolutionary Modernities' by examining the points of intersection and divergence, between continental and diasporic African intellectuals. In his seminal 1938 text, *The Black Jacobins*, C. L. R. James argued that the plantation is the first instantiation of modernity and the Haitian Revolution the fullest realisation of democracy. It is often forgotten that *The Black Jacobins* was written as one possible vision of anti-colonial resistance in Africa. James was one of several black writers, thinkers and intellectuals whose work engaged with the economic, political and cultural circuits of western modernity and its operations in the African continent and its diasporas.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Two essays of between 4,000 and 5,000 words each, each worth 50% of the final mark. Attendance at seminars is compulsory, failing which students' papers may not be marked.

24 NQF credits at HEQSF level 9

Convener: Associate Professor S Young

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

This course investigates the concept of Modernity from the Renaissance, through the Enlightenment to the Romantic period. The object of the course is to develop a sense of the historical development and discursive elaboration of the concept of Modernity and to consider its impact on knowledge, subjectivity, literature and politics.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: Two essays of between 4,000 and 5,000 words each, each worth 50% of the final mark. One essay should cover the first six seminars and the other the second six.

DP requirements: Submission of all written work and attendance at agreed upon meetings.

Assessment: Written work of 8,000 words, at least 50% of which is devoted to a final essay and 50% devoted to shorter written assignments during the semester

(Not offered in 2017)

24 NQF credits at HEQSF level 9

Convener: Associate Professor S Young

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

This course investigates the ways in which language comes up against limits when attempting to represent trauma or 'unspeakable' pain. Trauma theorists are occupied with the paradoxical ways in which traumatic experiences seem to defy representation, while simultaneously calling for testimony, telling and story. We will read some of the literature that wrestles with this paradox, both fiction and non-fiction, and will reflect critically on the idea that testimonial literature – literature that bears witness to trauma – facilitates 'healing', specifically in relation to Holocaust, Apartheid and slave narratives.

DP requirements: Submission of all written work and at least 75% of seminar attendance.

Assessment: 4 written reflections in response to question sheets, each 1,000 words, total 50%; Final essay (3,000-4,000 words) 50%.

This course will introduce graduate-level students to the texts and debates of contemporary prose and short fiction, putting together the perspectives of writers as well as critics to understand the styles, ambitions, and contexts of recent literary work. While the focus of the reading will be on recent American work (Carver, Ben Lerner, Harold Brodkey, Updike, Denis Johnson, and Wells Tower), the reading will also draw extensively on hyphenated-American writers (Lahiri, Diaz), and on the international work that informs it or is informed by it (Babel, Calvino, Munro, Daniyaal Mueennudin). Students will be expected to reflect on their own writing practices and will be asked to produce creative as well as critical work in the course of the semester.

DP requirements: None.

Assessment: One short paper (10 pages) at mid-semester followed by a longer research paper (20 pages) at the end of term, or one longer paper (30 pages) developed through the course of the semester.

EGS4016F CAPITAL, POLITICS AND NATURE

30 NQF credits at HEQSF level 8

Convener: Associate Professor M Ramutsindela

Course entry requirements: Acceptance for an honours or master's programme.

Course outline: In this course we analyse how nature has been used as a source of informal and formal power (politics). Profound changes in such power structures led to the quest for property regimes and institutions that are more appropriate for the defence of nature. Against this background, we discuss how capitalist interests, as encoded in private property regimes and attendant ecotourism ventures, have gained an upper hand in nature conservation. Furthermore, those interests have expanded beyond narrow property regimes to embrace bioregionalism, hence the revival of transfrontier conservation areas (TFCAs) as a model for conservation in the twenty-first century. All these are captured in the various topics covered in this course.

DP requirements: At least 80% attendance record and submission of all assignments.

Assessment: Assignments 60%; examination 40%.

EGS4034F GLOBALISATION AND THE ENVIRONMENT

30 NQF credits at HEQSF level 8

Convener: Professor M Meadows

Course entry requirements: Acceptance for honours or master's specialising in EGS.

Course outline: Globalisation is a complex of processes influencing the interplay between environment and development. These processes manifest themselves in diverse ways, but southern Africa, with its diversity of natural environment settings and range of human development characteristics, represents an ideal laboratory in which to study this interplay. The course is founded on an understanding of relevant theory and its application to a number of case studies including, inter alia, the political, economic, social, cultural and biophysical background to globalisation in the region, conservation and its impacts on local communities; environmental degradation; agriculture and globalisation; urban development and nature conservation. These case studies are illustrated in relation to both the relevant literature and to direct experience through fieldwork.

DP requirements: At least 80% attendance record and submission of all assignments.

Assessment: Assignments 65%; examination 35%.

30 NQF credits at HEQSF level 8

Convener: Professor S Parnell

Course entry requirements: Acceptance for honours or master's specialising in EGS.

Course outline: The aim of the course is to understand the structural basis of the contemporary South African city through an understanding of the urban past. EGS4038F CLIMATE CHANGE AND PREDICTABILITY

32 NQF credits at HEQSF level 8

Convener: Professor B Hewitson

Course entry requirements: Acceptance for honours or master's specialising in EGS.

Course outline: Climate change complexities are often masked by the simple global scale of response to anthropogenic forcing. The coupled nature of the physical-social systems, combined with the inherent chaotic nature of the climate and necessity of probabilistic predictive techniques, require new methods and conceptual framework in order to bring pragmatic relevance in the predictive mode. This course explores the theory related to the question of predictability, cross-scale relationships and feedbacks in the climate system, the tools and techniques of prediction, and the translation of predictions into the user community. There are three sections: climate change theory and projections; seasonal forecasting and predictions; vulnerability and impacts. Course participants

will engage with operational seasonal forecasting undertaken by CSAG members.

DP requirements: At least 80% attendance record and submission of all assignments.

Assessment: Assignments 100%.

EGS4039F URBAN FOOD SECURITY

32 NQF credits at HEQSF level 8

Convener: TBA

Course entry requirements: Acceptance for honours or master's specialising in EGS.

(Not offered in 2017)

30 NQF credits at HEQSF level 8

Convener: Dr G Ziervogel

Course entry requirements: Acceptance for honours or master's specialising in EGS.

Course outline: This course aims to ground students in the core theoretical, policy and practice debates on global environmental change. Climate change adaptation will be explored as a means for responding to environmental change, at the local, national and international scale and from the perspective of individuals, organisations and government. Adaptation will be contextualised within the international climate policy arena and greenhouse gas mitigation responses. The communication of climate science and the frameworks for integrating this information into risk management will be another central theme.

300 ENVIRONMENTAL AND GEOGRAPHICAL SCIENCE

Throughout the course there will be a focus on how science links to development and policy, demonstrated through case study examples, at the same time as placing global environmental change in its wider current, social/political/economic context. Students will gain experience in difference methods for assessing vulnerability and social impacts and developing risk communication and adaptation strategies.

DP requirements: At least 80% attendance record and submission of all assignments.

Assessment: Assignments 60%; examination 40%.

EGS4047S ENVIRONMENTAL POLICY AND PRACTICE

30 NQF credits at HEQSF level 8

Convener: Dr Z Patel

Course entry requirements: Acceptance for honours or master's specialising in EGS.

Course outline: This course examines the underlying dynamics involved in the negotiation of environmental policy and its implementation. It is concerned with the apparent gap between environmental policy and practice. By drawing on theories and practice of sustainable development, the course offers explanations and analytical tools for understanding this gap, by focussing on the framing of environmental problems, the politics of the policy process, tools used in decision making, stakeholder engagement, and the implementation environment. The approach is to challenge the cultural processes underlying environmental policy by engaging with: the processes through which institutions define and mediate policy outcomes; governance arrangements for sustainable development; the role of power, rationality, knowledge and values in achieving environmental and social justice.

FAM4036S FILM AND ENVIRONMENT

24 NQF credits at HEQSF level 8

Convener: Dr I-M Rijdsdijk

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

This course examines several debates concerning the representation of the natural environment in narrative fiction and documentary film. Taking the ecocritical debate that has grown in scope and intensity in literary criticism since the early 1980s as a departure point, the course will investigate the value of this discourse and its applicability to films that either explicitly or implicitly use the natural environment as a key component of the film narrative.

Equally important is the analysis of the films in terms of film language, and the extent to which film produces original representations of environmental debates that characterise the current age. In this second aspect of the course lies the history of the natural environment in film (its place in well-established and popular genres like the Western, for example), as well as the representation of people in relation to the nonhuman environment in environmental documentary.

The course includes a practical exercise in which students will produce a visual artefact that applies the idea of the course to local situations.

DP requirements: Attendance at all classes; punctual submission of written work.

Assessment: Seminar presentation 20%; short paper (2,500 words) 30%; long paper (4,000 words) 50%.

Authors in, mostly, European cinema will serve as case studies, taking a cue from various scholars (e.g. Cook, Maule) that the film author is not only the most important symbol of European cinema's cultural tradition and commitment, but also a crucial part of Europe's efforts to develop its cinema within domestic and international film industries.

FAM5011S MEDIA AND THE PUBLIC DOMAIN

24 NQF credits at HEQSF level 9

Convener: Associate Professor A Haupt

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

The key point of departure for Media & the Public Domain is that free speech rights in a democracy can be undermined by two nemeses. On the one hand, too much state control of the media can stifle the free circulation of information and, thereby, impoverish the public domain. On the other hand, too much corporate control of the media can impede the unfettered flow of information and, thereby, limit citizens' ability to make informed decisions about the common good. This course pays

particular attention to the ways in which corporate interests influence approaches to intellectual property and key changes in technology, often at the expense of the public interest. Media & the Public Domain explores debates about copyright, cultural appropriation and access to knowledge in relation to newer technologies like p2p platforms (e.g. Napster and Kazaa), social media platforms (Facebook, Twitter and YouTube) as well as the non-commercial sharing of cracked software, games, films and music. The specific focus of the course will be on the music and film industries' responses to what it terms "piracy" of its intellectual property in the digital age.

DP requirements: Class attendance and timeous completion of all assignments. A DP warning will be issued if students miss two seminars without satisfactory explanation (e.g. medical certificates). Students will be denied a DP certificate if they then miss a third seminar.

Assessment: Major assignment 40%, minor assignment 30%, seminar presentations 30%.

FAM5040S CONCEPTUALISING SA CINEMA

24 NQF credits at HEQSF level 9

Convener: Associate Professor M P Botha

Course entry requirements: Acceptance for a master's programme

Although filmmaking in South Africa has a history dating back more than a century and although the issues it raises are formidably complex, the field is still wide open for scholars. In this course, we aim to explore ways of examining fiction and documentary filmmaking in South Africa through the lens offered by a range of leading theorists of the last fifty years. While we shall give attention to the scholarly work that has gone before—the pioneering work of, notably, Thelma Gutsche, Keyan Tomaselli, Martin Botha and, more recently, Jacqueline Maingard and Lucia Saks— students will be challenged to find new ways of reading South African film, both past and contemporary. Students

will also be strongly encouraged to make use of the outstanding archival resources in UCT's library to generate new research subjects, new ways of focusing interpretive approaches to them and new ways of constructing the canon of South African film.

DP requirements: Attendance at all classes; punctual submission of written work.

Assessment: One seminar presentation of 2,000 words 10%; two 6000-word essays 45% each.

FIN4058F PRACTICAL COMMUNICATION

24 NQF credits at HEQSF level 8

Conveners: Professor P Skotnes and H Proud

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

Curatorship demands the skill of writing clearly in different registers for different purposes; whether for press releases, exhibition labels, text panels, internal reports or academic essays for publication in books or catalogues. This course aims at developing students' capacities and awareness of the different approaches to writing demanded by professional curatorial work. Emphases will be on accuracy and objectivity, as well as the virtues of précis and creativity in the writing of engaging texts aimed at visitors to museums and galleries. Apart from formal lectures, students will be taken on field visits to view current exhibitions and challenged to critically evaluate their effectiveness in terms of communication and design. While the course is mainly object-centred in its approach, a study of the role of text and image in relation to 'conceptual' curatorial approaches will also be encouraged. Intensive study of the associated texts and display tactics in a number of key exhibitions in art history will also be undertaken.

DP requirements: Attendance at all seminars and completion of all written work.

Assessment: A number of short projects will be set, subject to continuous feedback, discussion and revision. These will constitute a final portfolio to be submitted for examination at the end of the course (50%). Two long essays will count for 25% each.

FIN4059F WORKING WITH COLLECTIONS

24 NQF credits at HEQSF level 8

Conveners: Professor P Skotnes and Dr H Robertson

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

This course explores museum collections as resources for research, interpretation and exhibition. To be an effective curator of a collection requires a broad, holistic understanding of the collection, including its historical, social, aesthetic and scientific contexts. A curator also needs to acquire specialised knowledge to unlock the research and educational potential of the collection and make it accessible to broad audiences through exhibitions and public programmes. Iziko's art and social history collections will be used as a basis for elucidating multiple approaches to the understanding and interpretation of collections. The focus of the course is interdisciplinary and outcomes include: ability to apply research methodology in interpreting museum objects, tracing provenance and significance of collections; understanding of the relationship between the tangible and intangible aspects of collections, and hands-on experience of working with museum collections. Museum and site visits provide the basis for critical engagement with collections and curators. The course also introduces students to the ethical considerations and challenges that are presented by different objects in museum collections.

DP requirements: Attendance at all seminars and workshops and completion of all written work.

Assessment: Presentation of a seminar/discussion on a selected topic and relevant readings with submission of a written summary of main issues (20%); Object studies – each student, or a group of students, will research and document an object or collection of objects and participate in a group project of annotated objects (30%); Research essay of up to 3,000 words (50%)

Practical training in web-based curation and technical support will be provided by a developer, in aid of the research component where students will conceive and produce an online exhibition.

DP requirements: Attendance at all seminars and completion of all written work.

The Centre for Curating the Archive, which includes the Lucy Lloyd Archive and Research Centre (LLAREC) and Katrine Harries Print Cabinet, has been established as a vehicle for the conservation and creative use, through exhibition and publication, of both object, image and paper collections. It builds on UCT's dual institutional strength in its numerous and valuable research collections on which much critical research is based, and in its established, often innovative expertise in the area of presenting those collections. The linked research, often revealed in the public domain, uses these collections to facilitate and enrich public engagement with curatorial practice. It also aims to open up novel combinations of the historically separated domains of the creative arts, and the truth-claiming discourses of history and the social and natural sciences. In coupling the avowedly creative activity of curation with the seemingly objective site of archive the CCA signals its intention to draw attention to past and present processes of the making of archives and collections of all kinds and the creation of meanings that flowed, and yet flow, therefrom. The CCA is engaged in several partnerships, notably through its new Honours specialisation in Curatorship with Iziko Museums of South Africa, and with Professor Carolyn Hamilton's Archive and Public Culture Initiative in developing ARC: the Visual University and its Columbarium (www.arc.uct.ac.za). The work of the CCA is represented on both its own website and at www.arc.uct.ac.za.

HST4021H ADVANCED HISTORICAL METHODS AND APPROACHES

24 NQF credits at HEQSF level 8

Convener: Associate Professor S Field

Course entry requirements: Acceptance for an honours programme.

Course outline:

This seminar course, compulsory for all honours students in the Department of Historical Studies, invites the students to engage some of the key conceptual and methodological issues concerning the nature of the historical discipline and its modes of writing and enquiry. It is organised around the notion of 'archives', which we understand in its many different registers, both as an institutionalised order of evidence and as a shorthand for an entire epistemological complex. Taught by a team of historians, anthropologists, literary critics and sociologists over eight intensive weeks at the beginning of the first semester, this course aims at providing the students with both a critical understanding of conceptual issues and a hands-on experience of the so-called primary sources. We engage with governmental, oral, ethnographic, mnemonic, statistical, literary, visual, digital, material, sonic and somatic archives in this course, trying to introduce students to the emergent styles of historical enquiry and reflect on the complex relationship between the academic discipline and its several popular and public variants. In the second semester students build upon these discussions to write customised course essays.

DP requirements: Attendance at all seminars and completion of all written work.

Assessment: Five response papers (50%); research proposal (15%); course essay (35%).

HST4034F ORAL HISTORY: METHOD, PRACTICE AND THEORY

24 NQF credits at HEQSF level 8

Convener: Associate Professor S Field

Course entry requirements: Acceptance for an honours programme.

Course outline:

This option offers hands-on training in oral history research and interviewing skills and is suitable for students from a wide range of disciplines. The central focus is on the relationship between a person telling oral stories and another eliciting and listening to those stories. There is no simple road map on how to do oral history interviewing. Rather, training in oral history methodology is a learning process of how to make a series of research decisions appropriate to specific social, cultural

and historical contexts. Students will learn how to do interviews on audio and video, and will explore applied theoretical approaches to oral narratives and memories. We will also explore questions of copyright, ownership, audio-visual archiving and the ways in which oral history can contribute to development practice. All students will have to complete an oral history project which could become a pilot study for an honours, master's or doctoral dissertation.

DP requirements: Attendance at all seminars and completion of all written work.

Assessment: Coursework (50%); research project (50%).

HST4053F DEBATES IN ECONOMIC HISTORY

24 NQF credits at HEQSF level 8

Convener: Dr J Cilliers

Course entry requirements: Acceptance for an honours programme.

Course outline:

One of the biggest puzzles of human history is why some countries became rich while others have remained poor. More specifically, the question of why early modern Western European countries advanced ahead of their non-Western counterparts has been the point of departure for many debates in economic history. Economic development can be understood in broad terms and comprises several aspects. Important are institutional changes, factor endowments, demographic transitions, the economic role of the scientific revolution and innovation, and the early growth of financial systems. Naturally, among these aspects are also patterns of international trade and globalisation. This course studies historical processes of economic growth, convergence and divergence in the global economy over the past four centuries and introduces students to both new and old perspectives on the determinants of economic prosperity.

DP requirements: Attendance at all seminars and completion of all written work.

Assessment: Coursework (100%).

24 NQF credits at HEQSF level 8

Convener: Professor A Mager

Course entry requirements: Acceptance for an honours programme.

Course outline:

Economic development and change in the post-apartheid period has generated a host of new questions for South African Economic History. What role did imported technology, technological innovation and economic sanctions play in South Africa's industrialisation? What was the significance of sharecropping for the development of South African agriculture? What were the economic consequences of the collapse of reserve agriculture and environmental degradation in the reserves? What was the economic rationale for welfare under apartheid and beyond? How did South Africa re-join the global economy after 1994? These issues have generated rich debate and exciting new studies.

This course will take up these questions and explore the approaches adopted by economic historians.

DP requirements: Attendance at all seminars and completion of all written work.

HST4056S THEMES IN EVERYDAY HISTORY

24 NQF credits at HEQSF level 8

Convener: Dr B Kar

Course entry requirements: Acceptance for an honours programme.

Course outline:

This course is aimed at both acquainting students with the growing historical literature across the world on daily experiences and unspectacular practices, and teaching them the skills of formulating original research questions. Each year this course focuses on an object or a practice or a sentiment usually considered too ordinary, too universal and too familiar to be adequately or excitingly historical, and gradually unpacks the various histories unevenly woven into it. Through a systematic investigation of the experiential contexts and daily praxis, the students are encouraged to think imaginatively and across the boundaries of disciplines. In pointing the students towards the emergent approaches and sites of new research, the course also attempts to train them in moving responsibly and creatively between big theoretical questions and specific, concrete histories. It is comprised of weekly two-hour seminars. In 2017 the course will be discussing the histories of sleep.

DP requirements: Attendance at all seminars and completion of all written work.

Assessment: Three Response papers (30%); 5,000-word essay (70%).

Convener: Associate Professor S Field

Course entry requirements: Acceptance for a master's programme

Co-requisites: None

Course outline:

This course traces the genealogy of the concept and theories of "trauma". It will critique the clinical, popular, intellectual and political uses of the term from the late 19th century to the present. The course challenges students to be self-reflexive, critical thinkers, with the capacity to debate the "Trauma Question" and its implications for the emergence of memory studies, especially in post-conflict societies. We will also discuss the use of "trauma theories" in relation to debates around reconciliation, healing and reparations; and post-colonial critiques of trauma theories as Eurocentric and lacking in their account of race and cultural differences. Moreover, the "transmission of trauma" in family histories and the notion post-memory will be discussed. Finally, we discuss the "affect turn" and the historicising of emotions and subjectivities as a move to resolve the conceptual problems posed by trauma theories. The course is open to MA and PhD students from across the Faculty, especially those who have a dedicated interest in the histories, memories and theories of violence and its legacies.

The Centre, the only one of its kind in South Africa, stimulates and promotes the field of Jewish studies at the University and beyond, with a special focus on Jews in South Africa and Africa more

broadly. The Centre is multidisciplinary in scope and encourages scholarship in a range of fields including history, political science, education, sociology, comparative literature and the broad spectrum of Hebrew and Judaic studies.

The Centre is engaged in both research and teaching and functions as a coordinating unit in the university. Its resources are used to invite distinguished scholars to campus, to initiate and sponsor research projects, to organize lectures, symposia and conferences, and to strengthen the university's library holding of books, microfilms and archival sources. These research materials are made available to members of the University and to accredited visitors from the wider academic community.

The Centre awards a limited number of undergraduate and graduate scholarships as well as supports the publication of monographs and other publications.

The Centre has a publications programme which brings out monographs and occasional papers. Lectures, symposia and conferences are arranged under the auspices of the Centre. In some cases these are organised with the University's Centre for Extra-Mural Studies, thereby serving the wider community.

SLL4060F CONTEMPORARY FRENCH LITERATURE I

24 NQF credits at HEQSF level 8

Convener: Professor JL Cornille**Course entry requirements:** Acceptance for an honours or master's programme.**Course outline:**

If Louis-Ferdinand Céline's influence on 20th century French literature is widely acknowledged, one is less aware of the influence left by his *Journey to the end of the night* on contemporary postcolonial Francophone Literature. In spite of the racist nature of his ideology, Céline's profoundly "oralised" body of works showed later generations how to combine the written and the spoken word – a question which is at the core of contemporary francophone literature, as produced in Africa and in the Caribbean Islands. This is why a Congolese writer such as Alain Mabanckou secretly refers to Céline; but we would argue that his interest for Céline has been sparked by readings of his compatriot and fellow writer, Daniel Biyaoula who openly made use of *Journey to the end of the night* to structure his novels.

DP requirements: Submission of all written work.**Assessment:** Two essays (50% each).

In cases where an expository work is part of the dissertation, the two combined will be graded as a single whole although examiners will be guided as to the relative value of each. 24 NQF credits at HEQSF level 9

Convener: T Herbst**Course entry requirements:** A 70% pass in MUZ4371H Music Technology IV, or an equivalent course from another institution. Acceptance for a BMus honours or master's programme.**Course outline:**

Building on the pivotal role of over a century's dialogue between music and technology in the creation, dissemination and appreciation of sound and music, the course considers components of what has come to be called Music Technology and the reasons no single, homogenous definition of Music Technology has emerged. In considering how distinctive but vibrant industries and research fields, ranging from audio engineering to film-sound practices, have come to be seen as distinct fields or specialisations, and are served by their own distinctive programmes, the course mimics that trend whilst building on practical skills and theoretical knowledge introduced in under-graduate and Honours level Music Technology courses. In order to be able proficiently to merge research and vocational skills in sound-related occupations that demand critical thinking along with practical abilities, the course guides and encourages learners to:

- define and critically investigate key concepts and their definitions;
- study the impact of technology-driven aesthetics on diverse musical composition styles;
- contribute to the scholarly debates linking musicology and technology, and
- become proficient at using soft- and hardware tools.

DP requirements: 100% attendance and submission of all assignments.**Assessment:** Four written assignments 25% each = 100%.

24 NQF credits at HEQSF level 9

Convener: Professor R Cameron

Course entry requirements: Admission to an honours or master's programme, and by permission of the course convener.

Course outline:

In South Africa, Public Administration is largely taught as a craft. This course on Public Administrative Thought attempts to move beyond this practical application and traces the intellectual evolution of the field as an academic discipline. The course aims to lay the foundation for Public Administration scholarship.

It examines the major theories and concepts that underpin the field and also looks at the major thinkers in the discipline such as Wilson, Weber, Simon and Waldo. It exposes students to the contending approaches in the study of public administration and looks at the relationship between theory and practice. There is also a discussion of the notion of African Public Administration.

The second part of the course argues that the 'nuts and bolts' approach to the subject has led to the intellectual crisis of Public Administration in South Africa. This has led not only to a paucity of knowledge-based research in the field but has also contributed to narrowly trained public servants with limited understanding of crucial Public Administration debates which inform practice.

Conveners: Associate Professor R Calland and Prof C Shearing

Course entry requirements: Acceptance for an honours or master's programme.

Course outline: Humanity faces a challenge of unprecedented scale, urgency and interconnectedness. It has been argued that the solutions are to be found as much in governance reform – changes to the 'rules of the game' – as in science, technology and economics. This part of the course will enable the students to explore and better understand the institutional, legal and political dimensions to the global governance regime, its likely trajectory and the options for renovation. Thus, it will comprise three components: institutional (the UNFCCC and other relevant processes, private and public sector); legal (the legal instruments and other regulatory elements at various scales); and, geo-politics (such as the role of China, IBSA/BASIC and other salient aspects of international relations).

Assessment: Written assignments count 50%, written examination counts 50% of the final grade.

PBL5623F GOVERNING UNDER THE CONSTITUTION: LAW AND PRACTICE

30 NQF credits at HEQSF level 9

Convener: Professor P de Vos

Course entry requirements: See Rules for LLM and MPhil Degrees and Postgraduate Diplomas.

Course outline:

South Africa's new Constitution sets out the rights of citizens and establishes a framework for democratic governance and local government. In developing these institutions, along with a multi-level system comprising national, provincial and local government, South Africa's constitutional designers were responding to the needs and aspirations of contemporary South Africa. But they, in light of this comparative experience, also had before them a rich array of alternatives from other countries. The central purpose of this course is to seek to understand the new framework for governance in South Africa.

Constitutions are complex mixtures of broad principles, and specific rules and institutions. Accordingly, we will be interested in two levels of analysis: first, what broad principles and values underpin the institutional framework, and how are these expressed in the institutions themselves? And, second, more practically, how do these institutions, and the interactions among them, actually work in shaping the process of policy-making and implementation? Thus we are interested in the values associated with democracy – participation, accountability, consensus, etc.; and in those associated with what might be called 'effective governance', in light of the policy challenges which face the country. The course will thus also provide you with an understanding of how government works with a focus on

- (i) the relationship between the executive and the legislature and what that means for lawyers and
- (ii) the relationship between national, provincial and local government.

Our study of multi-level government and the powers of each sphere of framework necessary for policy making and litigation in this area.

DP requirements: Satisfactory attendance at and participation in seminars and completion of written assignments.

Assessment: Written assignments count 30%; written examination counts 70% of the final grade.

PBL5634F HUMAN RIGHTS LAW*(Not offered in 2017)*

30 NQF credits at HEQSF level 9

Convener: Associate Professor R Calland**Course entry requirements:** See Rules for LLM and MPhil Degrees and Postgraduate Diplomas.

Course outline: The South African Bill of Rights expressly declares itself to be the 'cornerstone of democracy' and affirms the democratic ideals to which the post-apartheid society is committed. It represents a decisive break with the past and is a manifestly transformative document. The listed rights range from property rights to justifiable socio-economic rights; there are affirmative state duties to promote and protect rights; class actions and public interest litigation are permitted; and there is provision for 'horizontal' application of some of the rights. The courts have developed a significant body of case-law. The Constitutional Court has, for example, pronounced on issues as varied as the death penalty, housing and the provision of anti-retroviral drugs to HIV-positive pregnant women. This course will provide students with an understanding of the South African Bill of Rights. It will consider in detail the jurisprudence of the Constitutional Court, and where appropriate, the Supreme Court of Appeal and international and comparative human rights law.

The course will begin with a discussion of judicial review and the success of human rights litigation.

A general overview of the operational provisions of the Bill of Rights, including the provisions dealing with application, interpretation and limitation of rights, will follow. The focus here will be the extent to which the courts are developing a theory of deference which balances protection of rights with the principle of separation of powers. This part of the course will also consider the record of the courts in developing the common law in the light of the Bill of Rights.

A critical analysis of the jurisprudence of the courts on selected rights will follow. The focus will depend on the interests of the class, but core rights such as equality, dignity, freedom of expression and religion will be generally be considered. There will also be a discussion of the jurisprudence of the courts on socio-economic rights and the extent to which the inclusion of socio-economic rights in a Bill of Rights has influenced judicial rights discourse.

DP requirements: Satisfactory attendance at all lectures and participation in class seminars.

Assessment: Participation in seminars and written assignments count for 50% and the final examination counts for 50% of the final grade.

PBL5647S SOCIAL JUSTICE, LAW AND DEVELOPMENT

30 NQF credits at HEQSF level 9

Convener: Ms M von Broembsen

Course entry requirements: An LLB or honours degree in selected Social Science disciplines. The Faculty reserves the right to limit classes to 15 students.

Course outline:

This interdisciplinary course explores the different theoretical approaches to social justice and how these are embodied in policy. The course compares the imperatives of social justice with competing conceptualisations of development and pays particular attention to how different conceptualisations of development, social justice and poverty lead to an emphasis on different institutional structures, policies and distributive outcomes. Throughout the course we critically consider the role that law plays in realising different development paradigms. Increasingly, the dominant development paradigm asserts that 'development happens through jobs'. In other words, implicit in the orthodox view of development is a reliance on the market to realise social outcomes. Not only is participation in the economy the primary strategy to alleviate poverty, but simultaneously it is viewed as the primary means of realising a range of social and economic objectives, including rural development, social inclusion and gender equality. The second part of the course therefore focuses on work. We explore the implications of 'globalisation' for work relations, the informal economy and multinational corporations' power in the context of value chains and consider the implications and challenges from a social justice perspective. While globalisation has resulted in a crisis for labour law, at the same time, it will be argued, it produces opportunities for law to challenge the primacy of economics as the discipline that frames our understanding of development.

Lecture times: Three hours per week.

DP requirements: Must have 50% for first essay. Failure to have 50% means candidate will have to write a test on the first half of the course.

Assessment: Essay 1: 20%; Class presentations (2) 20%; Reflection on prescribed book 10%; Essay 2: 40%; Class participation 10%

PBL5648S SOCIAL JUSTICE IN PRACTICE

30 NQF credits at HEQSF level 9

Convener: Ms M von Broembsen

Course entry requirements: An LLB or honours degree in selected Social Science disciplines. The Faculty reserves the right to limit classes to 15 students.

Course outline:

This course is concerned with social justice in practice. Our touchstone is the transformative vision embodied in the Constitution of South Africa, as we reflect on the interplay between rights, social mobilisation, advocacy and developmental strategies within a participatory democracy.

Using ‘Legal Empowerment of the Poor’ as a lens, the course reflects on notions of empowerment; how power (including our own) impacts on and shapes the practical outworking of social justice and at times results in unintended consequences.

The main focus of the seminars is on practical strategies intended to facilitate social justice. Students will study the theory in each area and undertake selected site visits to projects that reflect best practice. Students are assigned to work with a civil society organization for the duration of the course. Each student will be required to spend 32 hours with the organisation, spread over the period of the course. The course concludes with the design and implementation of a small-scale development intervention by the student, in conjunction with the civil society partner.

DP requirements: None

Assessment: Students are required to pass the practical project in order to pass the course.

PBL5815S PUNISHMENT AND HUMAN RIGHTS

30 NQF credits at HEQSF level 9

Convener: K Phelps

Course entry requirements: See Rules for LLM and MPhil Degrees and Postgraduate Diplomas.

Course outline:

This course aims to provide students with a sound theoretical understanding both of the justifications of punishment and human rights constraints in the context of sentencing. Students then apply this understanding to practical examples in order to assess how/ if the theory translates into practice. In so doing it is hoped to transcend a common-sense approach to sentencing and punishment and to build firm opinions/ approaches based on acquired knowledge.

The course is divided into four broad sections. The first section introduces the class to the various philosophical justifications that have historically been provided for sentencing. A brief introduction is also provided to the relationship between human rights law and penal sanctions. The second section explores in detail the current justifications for punishment/ purposes of the correctional system. In so doing, issues such as deterrence, incapacitation, rehabilitation, restoration, retribution and just deserts will be explored. Section three deals with constraints placed on sentencing in South Africa by human rights norms contained in the Bill of Rights and international law. The final section of the course places the preceding theoretical/philosophical discussions into a practical context by dealing with current and future sentencing practice in South Africa, modes of implementing punishment (e.g. prison) and special stakeholders in punishment.

DP requirements: 80% attendance at, and satisfactory participation in, seminars and the completion of the research papers and oral presentation.

Assessment: The presentation of at least one seminar and one research paper. Marks given for the seminars and research paper comprise the entire mark for the course.

The course will be presented through a series of seminars/lectures.

PBL5822S VICTIMS AND VICTIMOLOGY

30 NQF credits at HEQSF level 9

Convener: Professor E van der Spuy

Course entry requirements: See Rules for LLM and MPhil Degrees and Postgraduate Diplomas.

Honours degree in Humanities or LLB.

Course outline:

This course is designed to provide us with an overview of the evolving interest in victims of crime and other forms of social harm. Here we take stock of concepts, theories, social constructions, policies and criminal justice practices which allow us to engage more thoughtfully with victims of crime and social harm. We are interested in the contestations and controversies relating to the social construction of victimhood, how claims to victimhood are staked; the forms of social mobilisation exhibited by groups of victims; the types of contestation to which this may give rise. We consider the interaction and/or fusion of identities between victims and offenders. Lastly, we move beyond the conventional remit of crime victims to take account of victims in the context of mass victimisation and in the context of organised forms of violence.

DP requirements: Satisfactory attendance and participation at seminars and completion of written assignments.

Mission Statement

The Department of Religious Studies is committed to the study of religions which will contribute to public life in our local, regional, national and continental contexts. It is dedicated to:

- an open, plural, intercultural, and interdisciplinary study of religion in all its forms;
- the in-depth study of African religious traditions;

422 RELIGIOUS STUDIES

- the creative and critical analysis of religion as a force in personal, social, economic and political life;
- the promotion of quality education and research in the study of religion as a vital contribution to the transformation and development of South Africa.

The mission statement is implemented through degree specialisations that focus on the broad theme of religion, culture and identity. The Department offers a systematic study of religion in public life, its meaning and significance in South Africa in particular and Africa in general. This broad theme is explored in core courses team-taught by faculty members and also reflected in various research projects and institutes presently housed in the Department.

Core courses provide the thematic, methodological and theoretical foundations for all students who choose to pursue degrees in this department. Additional courses continue this focus within the established areas of specialisation: African Studies, Christian Studies, Comparative Studies, Islamic Studies, Jewish Studies, Buddhism and Critical Theory.

Courses in areas of specialisation

Hereunder follows a broad map of the courses offered in the areas of specialisation. Not all courses indicated below will be offered in any given year. However, they will follow the pattern outlined here.

African Studies

The courses in African studies explore the varieties of indigenous religious belief systems as well as the impact of global religions like Christianity (especially Pentecostalism) and Islam on the continent. Students will be prepared to do research on religion in Africa through different methodological and theoretical paradigms. A specialization in African studies can be pursued in combination with a focus on Christian and/or Islamic studies.

Buddhism

The department offers postgraduate study and supervision in Asian religious traditions with a special emphasis on Buddhism. Currently an Honours level course on Buddhism and Modernity and guided reading projects through Reading Religious Texts are offered. Research interests include the contemporary spread and transformations of Buddhism, Buddhism and Globalisation, conversion and socially and environmentally engaged Asian spiritualities, with a particular focus on Japan.

Christian Studies

The courses in Christian Studies focus mainly on the Sociology of Christianity and on the study of African Pentecostalism. The latter section debates the social impact and trajectories of Christian new religious movements and new forms of believing and being Christian as espoused by the Pentecostal-charismatic churches and ministries, their engagement with media (Internet use, religious broadcasting, production and reproduction of books, DVDs & podcasts, Pentecostal advertising: posters, billboards, handbills), fiscal and political practices.

Comparative Studies

The courses in Comparative Studies are divided into two categories: Issues in the Study of Religion and Religion in Contemporary Society. The first area includes courses in the Problem of Religion, Religion and Ritual, Sacred Space, Religion, Gender and Embodiment, and the History of Religions in Southern Africa. The second area includes courses in Religion and Popular Culture, Religion and Urban Culture and Religion, Education and Society in South Africa.

Islamic Studies

The courses in Islamic Studies explore Islam as religion, culture and civilization in particular contexts and themes. An Honours level course covers fundamental concepts within Islam from phenomenological and socio-historical perspectives. This course is indispensable for any student

embarking on research relating to Islam at a post-graduate level. At the Master's level, we offer specialized courses on Sufism, Islam in Africa, Gender, Islam and Feminism.

Philosophy of Religion/Critical Theory

The courses in Philosophy of Religion, Critical Theory and Post-Structuralist Thought address contemporary issues in European philosophy, philosophy of religion, modern Jewish thought and post-colonial theory. Courses such as Philosophers on Religion, Critical Theory, and Levinas, Derrida and the "Other" explore how reason, religion, ethics and subjectivity constitute meaning and value and how our social and historical conditions also contributes to life and meaning formation.

Weekly seminars

In addition to the normal course requirements, students are required to attend the seminars hosted during the course of the year. The intention of the seminars is to expose all postgraduates to seminars delivered by staff members and visitors to the Department. Attendance at all colloquia is compulsory and students will be required to reflect knowledge of their content in examinations. Details of these events will be advertised during the course of the year.

24 NQF credits at HEQSF level 8

Convener: Dr L Blond

Course entry requirements: Acceptance into an honours programme.

Course outline:

All religious traditions have been fundamentally altered by their encounters with modernity. Enlightenment reason and the growth of secularism have continually challenged and eroded not only religious traditions but also the foundations of Western political culture in general. In order to understand this process, a new mode of theoretical investigation arose in the early 20th century which became known as Critical Theory and has now expanded to wider fields of critique and theory. Critical Theory allows an exploration of not only the social processes but also the modes of investigation, including the dominant forms of Western reasoning that requires analysis and critical engagement.

This course will introduce students to a variety of thinkers and concepts enabling them to engage with a range of phenomena and social processes. Thinkers such as G.W.F. Hegel, Karl Marx, Max Horkheimer, Theodor Adorno, Walter Benjamin, Michel Foucault, and Franz Fanon will be studied in order to gain critical insight into contemporary problems. The concepts and methodology of critical theorists will be examined thereby giving students the tools to enter crucial debates surrounding alienation, subjectivation, power, gender, race and post-colonial theory.

12 NQF credits at HEQSF level 8

Convener: Dr R Chaturvedi

Course entry requirements: Acceptance for an honours or master's programme.

Course outline:

This course revolves around the relationship between state and society. It proceeds from the understanding that state and society are not two radically separate realms but fields of action and meaning that continually make and unmake one another. Thus on the one hand this course will examine the nature of ideas, and the network of institutions and practices that make up the modern nation state especially in postcolonial Africa; on the other hand it will study the formation of socially embedded agents of power who have not only lived out their own aspirations of self-determination, democracy and justice but also revolted against nationalist and neo-liberal concordances. Popular protests in Africa and other parts in the global south will be our special focus of attention here. The ways in which state and society have mutually constituted one another will be a key concern. In order to understand that, the course will draw on classical and contemporary theories as well as sociologically grounded ethnographies of political life particularly in the global south.

DP requirements: Attendance of all seminars and submission of all written assignments.

The World Social Forum and many social movements and other organisations organise and mobilise around the slogan: "Another world is possible". This course examines key features of working class

experience in the context of globalisation. It examines the development of unions, social movements and protest action, focusing on the collective responses of the ‘discontents’ of globalisation. The central concern is acts and processes of resistance in the context of recurring capitalist crisis, and visions of alternative central to that resistance. Though a focus on selected organisations, events and issues, the course aims to contextualise and historicise working class resistance in the lived experience of globalisation and examine major debates within and about such resistance. Particular attention will be paid to issues of alienation and commodification in the struggle for alternatives in everyday life. SOC5014S SOCIOLOGY OF GENDER & GLOBALISATION

12 NQF credits at HEQSF level 8

Convener: Dr A Pande

Course entry requirements: Acceptance for an honours or master’s programme.

Course outline:

This course will examine how definitions of gender and sexuality are reproduced, negotiated and deployed in the context of globalisation. Through a reading of theoretical texts about globalization and ethnographic case studies of real people experience these processes, we will ask: What can we learn about gender, nation states, labour markets and globalisation from studying the encounter between them? The course is loosely divided into three sections. After an introduction to the theoretic debates around engendering globalisation, we will critically analyse the centrality of gender in national security, sovereignty of nation states and in policing national borders. In the next section we will discuss one of the most striking features of the contemporary global order: the feminization of the global labour force and the concomitant commodification of intimacy. The class will end with some hopeful visions: alternative discourses and transnational alliances possible in the context of this globalised and gendered world.

DP requirements: Attendance of all seminars and submission of all assignments.

Assessment: Seminar presentation (20%); short papers (20%); long paper (60%).

The humanities have long been vital to the creative and critical energies of societies in the throes of profound change. HUMA – the Institute for the Humanities in Africa – is a new initiative at UCT, intended to create a space of dynamic interdisciplinary community for scholars and students in the humanities at large. Fostering top-end academic research, HUMA seeks also to draw on that work to nurture critical public debate, promoting UCT’s vision of itself as a civic university contributing to the making of democratic citizenship. HUMA’s intellectual agenda is driven by two inclusive research themes ‘on being human’, and ‘circuits of consumption’, which inform and structure three primary objectives:

- to conduct and promote research that is historically grounded and theoretically engaged, with an eye to the ‘big’ theoretical and ethical questions that anchor South African issues in wider fields of experience and analysis. The combination of intellectual focus and breadth provided by HUMA’s research themes is intended to open up spaces for dialogue, collaboration and argument across disparate theoretical, epistemological and methodological traditions, and in ways that help examine the project of interdisciplinary work.
- to nurture the expertise and enthusiasm of graduate students interested in an academic career, through a combination of intensive and supportive doctoral supervision, and a broader programme of seminars, symposia and workshops that help develop the intellectual versatility and confidence which an academic career requires. A doctoral fellowship programme is central to the pursuit of this objective.
- to bring scholars and graduate students into conversation with interested publics, around issues of shared and topical concern. HUMA hopes to promote what public intellectuals in the humanities do best, which is to de-familiarise and unsettle established ways of seeing, think creatively about pressing social and political questions, and keep the imagination of alternative futures alive.

This mission is embedded in a particular understanding of our location in Africa. Africa is a landmass with a deep and complex history of connection and disconnection amongst its many inhabitants; being African means being party to formative relationships of connection and disconnection that shape the ways we think and act. Our scholarship and debate, then, will be positioned in Africa, even if the focus of our deliberations is not limited to the continent.
