SECTION 1: CONTEXT

1.1 INTRODUCTION

At each June and December Graduation, the Institutional Planning Department conducts the graduate Exit Survey that forms part of the First Destinations Project. This First Destinations Project was conceived in support of the Academic Planning Framework (APF) which defines “strong programmes” as those that:

- “offer coherent teaching and learning, with well-structured, core-course requirements in terms both of service components and the major(s)”
- “have a well-established reputation amongst potential recruits and subsequent employers”
- “produce graduates who are flexible in being able to adapt to new needs and opportunities and who are eligible for postgraduate study anywhere in the world”

The First Destinations Project examines the post-graduation activities and intentions of each group of graduates in order to assess recent graduates’ impressions of the usefulness and applicability of their studies in the workplace, coupled with information on how and where recent graduates either found employment or chose to continue their studies.

The first Graduate Exit Surveys were carried out amongst the June 1997 group of graduates, and these surveys now form a routine part of the graduation proceedings. In this report, the findings of the Exit Survey for December 2007 graduates are discussed.

1.2 SURVEY INSTRUMENT

In order to compare the results of this survey with the results from previous exit surveys, the structure has remained relatively constant since the pilot study was conducted in June 1997. The survey instrument consists largely of “closed” type questions and was designed to comply with the following criteria:

- short completion time (about 5 minutes) so as to prevent “bottleneck” formation in the ticket and gowns distributions process;
- the return of a permanent postal address for each graduate to be used in the follow-up surveys, and the return of a student number for each graduate/ diplomat which enables the retrieval of additional information (e.g. biographic data and academic performance information) from an MS SQL Server 2005 database (which derives from PeopleSoft and formerly Heritage);
- the establishment of the main activity of each graduate after graduation (i.e. employment, further study, etc) and obtaining details on the employers of the graduates and the nature of further studies that they had embarked upon;
- gaining insight with regard to graduates’ impressions of their learning experience at UCT and their participation in the career development activities offered by the Careers Service whilst at UCT.

The questionnaire is printed on A3 paper, folded to form an A4 size leaflet. On the front page of this leaflet, a brief congratulatory letter and explanation of the Graduate Recruitment Portal is printed. A “Thank-you” note to the respondent follows the last item on the questionnaire.

1.3 SURVEY METHOD

The survey questionnaire was administered to graduates at the point of ticket/gown collection prior to each graduation ceremony. This is now the usual procedure that the Institutional Planning Department uses for the Graduate Exit surveys. Each graduate (up to and including the Doctorate level) was asked to complete a questionnaire (at one of a series of tables provided for this purpose) and to hand this in at the graduation ticket tables, prior to receiving his/her tickets. Where graduates did not personally collect their tickets and gowns, the person collecting tickets on their behalf was given a blank questionnaire and a postage paid envelope with instructions for the actual graduate to complete and return the questionnaire.

A total of 4361 UCT students completed their studies and graduated in December 2007. Of these, (67%) completed the Exit Questionnaire in December. The response rates varied considerably from faculty to faculty, and in relation to the different qualifications within each faculty¹. As can be seen in Table 1c in Section 2 on Findings, the highest response rates were recorded amongst Three Year Bachelor graduates (76%) and Professional First Bachelor graduates (76%) and the lowest response rates were recorded amongst UG Diplomas (45%), Masters (47%) and PG Diploma graduates (49%).

The survey responses were coded and captured into an MS Excel spreadsheet, which was imported into the Student Performance Database. Using the student numbers which had been entered on the completed questionnaires, the following additional information was extracted from the database for each respondent:

- biographic data (population group, gender and date of birth);
- matric information (school code, matric authority, matric points and faculty points);
- a synopsis of each respondent’s UCT academic record from which the date on which they commenced their degree/diploma, their final year majors (where applicable), their final year course results and information on prior qualifications completed at UCT.

This additional data was used in the computation of data in the following field: “average % in final year”. In the analysis below, information captured in the survey responses is discussed and correlated (where applicable) with this additional information.

¹ The survey response rates within each formal qualification, within each faculty, are presented in the individual faculty summaries that are published as separate reports.

SECTION 2: 2007 FINDINGS

A summary of the survey findings in relation to the formal qualification type and graduation faculty is presented at the end of this report. The findings reflect the combined results of the surveys for the December 2007 Graduations.

Please note that in this report the faculties referred to are in the abbreviated form: “COM” for the Faculty of Commerce, “EBE” for the Faculty of Engineering and the Built Environment, “HEA” for the Faculty of Health Sciences, “HUM” for the Faculty of Humanities, “LAW” for the Faculty of Law and “SCI” for the Faculty of Science.

Please note that under the Masters section of the tables the GSB MBA graduates are separated from other Commerce Faculty Masters graduates.

SECTION 3: ANALYSIS

The analysis covers major differences, more than 5%, between findings for the 2004-2006 trend report and the 2007 survey for tables 3, 10 (i), 10 (ii) and 10 (iii). Because of the danger of small numbers the report will focus only on differences in the following sub-categories:

- Three Year Bachelors in Commerce, EBE, Humanities and Science
- Professional First Bachelor in Commerce, EBE and Health Sciences
- Post Graduate Diploma in Commerce
- Honours in Commerce, Humanities and Science

TABLE 3: FIRST DESTINATION

The analysis shows the proportion of Commerce Three Year Bachelor respondents indicating *Studying* (studying further) increased by 9% when comparing 2007 respondents (47%) with the 2004-2006 Trend (38%). The proportion of EBE Three Year Bachelor respondents indicating *Seeking Study* further increased by 12%. This increase was met to a large extent as a result of the proportion of the EBE Three Year Bachelor respondents opting to *Seek Employ* dropping by 6% over the period of comparison. With the Humanities respondents, there was a decrease of 6% for those choosing to *Seek Employ*. This is mainly due to an increase of Humanities respondents choosing to study (*Study* increasing by 5%) and a slight increase of those who are *Employed* (2%).

There was an increase of 13% from Post Graduate Diploma Commerce respondents indicating *Employed*, mainly from a decrease of 6% for those choosing *Seeking Employ* and a slight decrease in the other areas. This related to an 11% overall increase of Post Graduate Diploma respondents across all faculties who indicated *Employed*.

For the Honours degree, Commerce increased by 10% for the respondents indicating *Employed* and 8% for *Studying*. This was corresponding to a 16% decrease of the respondents choosing *Seeking Employ*. In Humanities there is a decrease of 8% in *Employed* and an increase of *Seeking Study* and *Seeking Employ* by 5% each. For Science there is an increase of employed of 9% owing to a 5% decrease in *Seeking Study* with a large number of respondents (6%) who did not fill in this question.

Although only 45 Doctoral students were surveyed in the 2007 study, there was an increase of 17% *Employed* and a decrease of 10% *Seeking Employ* and 6% *Studying*.

TABLE 10: SATISFACTION WITH EXPERIENCE OF STUDYING AT UCT BY DEGREE/DIPLOMA AND FACULTY

(i) SATISFACTION WITH OVERALL LEARNING EXPERIENCE

Although the trend across all qualification types showed very minor shifts, the satisfaction with overall learning experience of especially Commerce respondents increased in a number of qualification types. A proportional increase in Commerce Three Year Bachelor, Post Graduate Diploma and Honours respondents, by 12%, 7% and 8% in the *Very Satisfied* category was achieved. This represented a shift mostly from *Satisfied* to *Very Satisfied* for these respondents. The proportion of Humanities respondents with an increased level of satisfaction was also noted with a 9% increase in the proportion of these students choosing *Very Satisfied* and smaller decreases in the proportion in the other items on the scale.

On the whole, Masters respondents experienced lower levels of satisfaction when comparing the 2007 survey findings with the 2004-2006 trend findings. The proportion of Masters respondents that indicated very satisfied dropped by 10% (with the proportion indicating satisfied increasing by 12%) over this period.

Although only 45 Doctoral students were surveyed in the 2007 study, the proportion indicating *Somewhat Satisfied* with their overall learning experience increased by 7%. This increase was met mainly as a result of the decrease in the *Unknown* (3% decrease), *Dissatisfied* (2% decrease) and *Very Dissatisfied* (1% decrease) categories.

(ii) SATISFACTION WITH PREPARATION FOR EMPLOYMENT

For Commerce Professional First Bachelor degree, there is a 6% increase in *Excellent Preparation* which seems to have been an increase throughout all categories. In Health Science, there is increase of 10% in *Good Preparation* which comes from a decrease in *Excellent Preparation* of 4% and a decrease of *Adequate Preparation* of 3%

In the Honours degree category, there was a 10% increase in *Excellent Preparation* for Commerce respondents that seems to indicate a shift from *Good Preparation* respondents that decreased by 9%. In Humanities, there was an increase in *Good Preparation* by 14%. This seems to be a combination of the decrease of *Excellent Preparation* by 5% and *Inadequate Preparation* by 5%. In the Science faculty, *Excellent Preparation* increased by 15%. This is largely due to a decrease by 17% of *Adequate Preparation*.

Of the 45 Doctoral students were surveyed in the 2007 study, there was a decrease of 6% in *Good Preparation*, owing mainly to an increase of 4% for *Excellent Preparation* and slightly to an increase of 3% for *Adequate Preparation*.

(iii) SATISFACTION WITH PREPARATION FOR FURTHER STUDY

In the Three Year Bachelor degree, the Commerce faculty respondents noted an increase of 12% for *Excellent Preparation* due mainly to a 9% decrease in *Good Preparation*. In EBE there is a shift from 9% *Good Preparation* from a decrease of 6% for *Adequate Preparation*.

The Profession First Bachelor respondents in the faculty of EBE noted a decrease of 6% from *Good Preparation* owing somewhat to an increase in *Excellent Preparation* of 4% and an increase of 3% for *Adequate Preparation*.

The Post Graduate Diploma respondents in the Commerce faculty noted an increase of 8% for *Excellent Preparation* shifting from a 9% decrease in *Good Preparation*.

For the Honours degree, Commerce respondents showed an increase in *Excellent Preparation* of 19%, due largely to a decrease of 18% of *Good Preparation*. Humanities showed an increase in *Good Preparation* of 6% from a combination of *Adequate Preparation* (2%) and *Inadequate Preparation* (1%). This added to an overall increase of *Excellent Preparation* of 8% across all faculties from a decrease of *Good Preparation* (5%) and *Adequate Preparation* (2%).

Although there was a low number of Doctoral students (45) who were surveyed in December 2007, there was an increase of 8% for *Excellent Preparation*. It is relevant to note, however, that 13% of the respondents (13%) who did not fill in this question.
